Chapter authors speak from experience as well as theoretical grounding, and include practitioners, researchers, and formal and informal leaders. Topics include transformational leadership across generations; developing a research agenda in library leadership; methodologies for studying library leadership; connections between leadership models and library-focused research; engaging with business, psychology, and educational administration literature; leadership styles; organizational culture; the role of mentoring in leadership; and the role of women in academic library leadership. Two chapters highlight the dichotomy between positional leadership and socially constructed leadership roles. The research methods used include case study, survey, and action research. Consensus or Conflict? Huiyao Wang,Alistair Michie,2021-09-28 This open access book brings together leading international scholars and policy-makers to explore the challenges and dilemmas of globalization and governance in an era increasingly defined by economic crises, widespread populism, retreating internationalism, and a looming cold war between the United States and China. It provides the diversity of views on those widely concerned topics such as global governance, climate change, global health, migration, S&T revolution, financial market, and sustainable development. It is a truly unique book. Never before has such an authoritative group of essayists come together to develop deep new thinking about global governance that is relevant to current shared global challenges. They express deep concerns about the historically unprecedented upheavals in the world. They describe the unparalleled turbulence that mankind is facing in the form of multiple crises, any one of which has the potential to bring civilization to its knees. The most obvious of these is the threat posed by climate change. They spell out why these perils pose a stark choice for the human race. They stress how any path that leads to conflict increases the risk of catastrophe. In this context, the common thread is that a consensus must be reached about the future of our world. They have put forward many ideas and potential new policies, reflecting their vision of what this consensus should be and how it is the only way forward for the human race.

A Critique of Creativity and Complexity Don Ambrose,Bharath Sriraman,Kathleen M. Pierce,2014-11-04 In an increasingly complex world the natural human inclination is to oversimplify issues and problems to make them seem more comprehensible and less threatening. This tendency usually generates forms of dogmatism that diminish our ability to think creatively and to develop worthy talents. Fortunately, complexity theory is giving us ways to make sense of intricate, evolving phenomena. This book represents a broad, interdisciplinary application of complexity theory to a wide variety of phenomena in general education, STEM education, learner diversity and special education, social-emotional development, organizational leadership, urban planning, and the history of philosophy. The contributors provide nuanced analyses of the structures and dynamics of complex adaptive systems in these academic and professional fields.
