The Gendered Score: Music in 1940s Melodrama and the Woman's Film Heather Laing, 2017-07-05 Heather Laing examines, for the first time, the issues of gender and emotion that underpin the classical style of film scoring, but that have until now remained unquestioned and untheorized, thus providing a benchmark for thinking on more recent and alternative styles of scoring. Many theorists have discussed this type of music in film as a signifier of emotion and 'the feminine', a capacity in which it is frequently associated with female characters. The full effect of such an association on either female or male characterization, however, has not been examined. This book considers the effects of this association by progress through three stages: cultural-historical precedents, the generic parameters of melodrama and the woman's film, and the narrativization of music in film through diegetic performance and the presence of musicians as characters. Case studies of specific films provide textual and musical analyses, and the genres of melodrama and the woman's film have been chosen as representative not only of the epitome of the Hollywood scoring style, but also of the narrative association of women, emotion and music. Laing leads to the conclusion that music functions as more than merely a signifier of emotion. Rather, it takes a crucial role in both indicating and determining how emotion is actually understood as part of the construction of gender and its representation in film.

Stephen Sondheim Joanne Gordon, 2014-04-23 Stephen Sondheim is an artist with many contradictory facets: he is an avant-garde composer and lyricist working in the populist art form, an apparently dry and acerbic critic who captures all the ambivalent pain of passion, an intellectual whose work contains some of the funniest bawdy lines on the Broadway stage. He has chosen to confront an audience that is usually looking for escapist literature with the very issues it has fled to the theatre to avoid. This collection of original essays takes particular pains to present Sondheim's diversity in a chronological plan that

illustrates how each new work grew out of the previous one. Some of the topics covered are the evolution of Sondheim's female characters, who take us far beyond the usual sweet ingenues; the Roman farce antecedents of *A Funny Thing Happened on the Way to the Forum* and the resemblances between Sondheim's chorus and the chorus in ancient Greek drama; Sondheim and the concept musical; and Sondheim's maturing philosophy. All students of the modern theatre and the modern musical will want to read this book.

The Music of Mzilikazi Khumalo Thomas Pooley, Naomi André, Innocentia Mhlambi, Donato Somma, 2024-07-11 Mzilikazi Khumalo (1932-2021), an iconic figure in choral music in South Africa, rose to prominence as one of Africa's leading composers of art music. This is a work of music history. Biographical essays on Khumalo's major works, including those for choir, orchestra, and opera are complemented by contextual studies of his compositions and arrangements as well as reflections on his roles as editor, conductor, and music director. Specifically in the context of South Africa's cultural and political transition from Apartheid to democracy, Khumalo's key role in establishing the Nation Building Massed Choir Festival, a multi-racial institution that forged an inclusive space for music, in the 1980s is discussed as evidence of his importance and relevance in South African culture. Khumalo's major works are studied in relation to contemporary art music, choral composition, and traditional song. These are *UShaka KaSenzangakhona* (1996), an African epic, and *Princess Magogo KaDinuzulu* (2002), one of the first indigenous African operas. Khumalo's artistic collaborators provide insight into their experiences working on these major projects, documenting the relationships the composer cultivated with his peers. This volume addresses a lacuna in the literature on South African art music which until recently tended to focus on works in the classical tradition and shows that Khumalo is a composer without peer in his synthesis of classical and choral, traditional and contemporary.

Orchestral "Pops" Music Lucy Manning, 2013-10-10 In this second edition of *Orchestral "Pops" Music: A Handbook*, Lucy Manning brings forward to the present her remarkable compendium of information about this form of orchestral music. Since the appearance of the first edition in 2008, this work has proven critical to successful "pops" concert programming. With changes in publishers and agents, the discontinuation of the publication of certain original material or, worst of all, presses

going out of business, music directors, orchestra conductors, and professional instrumentalists face formidable challenges in tracking down accurate information about this vast repertoire. This revised handbook alleviates the time-consuming task of researching these changes by offering a list of works for orchestral “pops” concerts that is comprehensive, informative, and current. Manning’s emphasis on clarity and accuracy gives users an indispensable tool for gathering vital information on the style, instrumentation, and availability of the repertoire listed, as well as notes on its performance. The user-friendly appendices include expanded instrumentation choices, easy-to-find durations, and handy title cross-references. In addition to corrections and updates, this new edition of *Orchestral “Pops” Music* includes at least 1,000 new title listings. *Orchestral “Pops” Music: A Handbook* is the ideal tool for working conductors and orchestral librarians, as well as music program directors at colleges, conservatories, and orchestras.

Film/Music Analysis Emilio Audissino,2025-08-08 The field of Film-Music Studies has been increasingly dominated by musicologists; this book brings the discipline back squarely into the domain of Film Studies, offering an approach in which music and visuals are seen as equal players in the game. Blending Neoformalism with Gestalt psychology and Leonard B. Meyer's musicology, this study treats music as a cinematic element, offering scholars and students of both music and film a set of tools to help them analyse the wide-ranging impact that music has in films. This second edition provides an updated survey of the field and a new chapter featuring additional case studies, including a novel analytical category for studying the contemporary 'sound-design style' film music.

Song Sheets to Software Elizabeth C. Axford,2004-06-24 The second edition continues to be a valuable source to printed music, music software, and Web sites useful to musicians, and includes interesting essays on the history of printed music, copyright laws, music theory fundamentals, and other topics. Many questions posed by musicians and others concerned with music production and instruction are answered with short, effective explanations (e. g., the duration of copyright, the concept of fair use, writing lead sheets, publishing music). Axford's volume will be especially useful to young musicians or others beginning a career in some aspect of music. A useful section, *Web Sites for Musicians*, reveals the book's currency: very few dead links were detected, attesting to careful updating from the first edition. The section *Tech Talk: Terms A - Z* provides brief definitions for many new terms used by musicians or technology specialists. A valuable desk reference for everyone involved in the music industry.
