*Medicinal and Aromatic Plants: The Basics of Industrial Application* M. Paz Arraiza, 2017-10-31 This book provides readers a fundamental understanding of the science and applications of medicinal and aromatic plant materials. Chapters of this handbook covers the basics of ethnobotany, (bio)active compounds and their natural sources. Information about the cosmetic, nutritional, medicinal and industrial uses (dyes, tannins and biocides) is also presented. Readers will also learn about concepts central to quality control processes, sustainable management, wild harvesting and the economic valuation of the industrial impact of endemic plants. The volume also presents a case study of the wormwood (*Artemisia absinthium* L.), which is helpful in explaining the above concepts. This book is intended as a handbook for undergraduate students and teaching professionals in research and higher education institutions involved in agricultural engineering, pharmacy, forestry, natural product chemistry. Non experts interested in aromatic and medicinal plant agriculture, transformation and commercialization will also find the content informative.

*Medicinal and Aromatic Plants of South America Vol. 2* Ákos Máthé, Arnaldo Bandoni, 2021-04-15 This volume, as the seventh of the series Medicinal and Aromatic Plants of the World, deals with the medicinal and aromatic plant (MAPs) treasures of the so-called Southern Cone, the three southernmost countries (Argentina, Chile and Uruguay) of South America. Similarly to the previous volumes of the series, the main focus is to collect and provide information on major aspects of botany, traditional usage, chemistry, production / collection practices, trade and utilization of this specific group of plants. The contributors, who are recognized professionals and specialist of the domain, have collected and present state of the art information on 41 species. Most of these are not only of interest from the scientific point of view, but hold also a potential for the prospective utilization of the decreasing, occasionally overexploited / endangered medicinal plant resources of this huge continent. The book is expected to serve as a source of information also on some less known or less studied species. As such the volume is expected to support future research and public health professionals.

*Pharmacological Properties of Native Plants from Argentina* María Alejandra Alvarez, 2019-09-06 The aim of this book is to offer information about the Pharmacological Properties of Native Plants from Argentina to students, researchers and graduates interested in the fields of Ethnobotany, Pharmacognosy, Phytochemistry, Pharmacy, and Medicine. The book

includes summary information about the native plants from Argentina with medical activity comprising their botanical characteristics, distribution, characteristics of the regions where they grow, ethnobotanical information, chemical data, biological activity, establishment of in vitro cultures, toxicity, and legal status.

**Ethnobotany** Jose L. Martinez,Amner Munoz-Acevedo,Mahendra Rai,2019-01-15 Ethnobotany: Local Knowledge and Traditions discusses various plants that have actually been used in traditional medicine for a specific ailment. It describes the biological effectiveness (activities) related to each sickness which have been scientifically verified. This book will also discuss the bioactivities established/determined that are promising and have potential. Finally, this book will be an appropriate consultation tool for scientists/professionals/experts such as ethnobotanists, botanists, cell/molecular biologists, chemists, pharmacists, pharmacologists, environmentalists/ecologists.

**Nature(s) in Construction** María Lelia Pochettino,Aylen Capparelli,Pablo C. Stampella,Diego Andreoni,2024-09-14 This book provides the state of the art of ethnobiology in Argentina and related Latin American countries, highlighting timely trends and topics. It synthesizes studies resulting from the III Jornadas Argentinas de Etnobiología y Sociedad (III JAES—3rd Argentinian Meeting of Ethnobiology and Society), convened in La Plata in 2021. As a relatively new academic development, ethnobiology integrates approaches from different points of view, such as biology, anthropology, geography, history, linguistics, and, in a crucial recent advance, local perspectives. Consequently, this volume contains 33 contributions from 86 authors of different countries, orientations, and disciplines—but all related to interrelationships between people/s and the natural environment. Chapters cover a diverse array of topics, ranging from biocultural relationships and their historical construction through time to conservation of biocultural and agrobiodiversity, ethnomycology, ethnophycology, and meliponiculture and beyond. The volume's main goal is to propitiate the preservation of biocultural diversity through the application of ethnobiological wisdom in a global context characterized by the accelerated loss of traditional knowledge. The contributions aim to transcend the nature/culture dichotomy, emphasizing the inextricable relationship between communities and their environment and the importance of acting jointly in the construction of the inhabited landscape and local identity.

**Archaeologies of Smoking, Pipes and Transatlantic Connections** Sarah de Barros Viana Hissa,2024-10-23 This volume presents a global study of the economic and cultural global systems in which smoking materials, practices and ideas circulate, intertwine, and transform. This book compiles original work authored by researchers from the Americas, Africa, and Europe to elicit a comparative archaeology of smoking and pipes through histories and case studies from localities and

regions on both sides of the Atlantic. Consequently, the book is divided into four sections divided by region. The first chapters focus on Amerindian pipes and smoking, and these are followed by research on smoking and clay pipe use in post-17th century Europe. Chapters on the production and use of clay smoking pipes in Brazil and a reflection on the influence of pipes and smoking in Senegambia comprise the final two sections respectively. Taken together, this volume explores a wide range of issues, such as economic and cultural relations between old and new worlds; the effects of colonization in different parts of the globe; circulation of ideas, practices, and objects in hegemonic and non-hegemonic transatlantic connections; techniques and styles of making and decorating pipes; materialization and expression of ethnicities and of their blurred frontiers; changes and continuities observed in smoking materials and their inferred meanings. The book compiles fresh insights on the complex and diverse history of smoking and transatlantic economic and cultural interactions associated with it. It is of interest to both historical and pre-historical archaeologists researching material culture in several regions of the world, but also historians and anthropologists interested in material culture and global cultural systems.

Medicinal and Aromatic Plants of South America Ulysses Paulino Albuquerque, Umesh Patil, Ákos Máthé, 2018-10-24 This volume in the series deals with the major Medicinal and Aromatic Plants (MAPs) of South America, providing information on major aspects of this specific group of plants on that continent (botany, traditional usage, chemistry, production/collection practices, trade and utilization). Brazil, in particular, offers an immense amount of biodiversity, including plants with great pharmacological interest and ethno-medicinal importance. Contributions are from internationally recognized professionals, specialists of the Medicinal and Aromatic Plant domain and have been invited mostly from the members of the International Society for Horticultural Science and International Council for Medicinal and Aromatic Plants.

**Guía medicinal y espiritual de plantas tropicales** Dra. Goretti Virgili López, 2017-12-12 De la mano de Adán Ureña, un curandero local de la República Dominicana, la Dra. Goretti Virgili profundizó en el aprendizaje de las propiedades de las plantas medicinales para la sanación. Dada su formación científica, ha querido documentar los conocimientos transmitidos oralmente a lo largo de varias generaciones del uso tradicional de estas plantas en República Dominicana y en el trópico americano. En su viaje a la selva peruana encontró estas plantas caribeñas y muchas otras utilizadas por indígenas amazónicos. Para complementar este libro realizó estudios de nutrición y fitoterapia para así poner en manos del lector un manual que le ayude a ampliar su conocimiento en mejorar la salud y combatir enfermedades con plantas que nos ofrece la propia naturaleza. En la actualidad Goretti imparte cursos para transmitir todo este conocimiento.

Ethnobotany José L. Martinez, Alfred Maroyi, Marcelo L. Wagner, 2023-02-24 In this book we present recent studies that

have been carried out on some widely used medicinal plants. The need for new and alternative treatments stem from the lack of efficiency of existing remedies for certain illnesses. We have compiled information that may be useful to researchers in their quest to develop new drugs.

**Ecology and Evolution of Plants under Domestication in the Neotropics** Alejandro Casas, Ana H. Ladio, Charles R. Clement, 2019-09-25 The Neotropical area is a main setting of the earliest experiences of domestication of plants, and evolutionary processes guided by humans, which continue being active in the area. Studies comprised in this Research Topic show a general panorama about similarities and particularities of processes of domestication for different plant groups and regions, some of them illustrate how the domestication processes originated and diffused, how landscape domestication has operated and continues being practiced and others discuss some of the main challenges for designing policies for biosafety and conservation of plant genetic resources. It is an attempt to identify main topics for research on evolution under domestication, and opportunities that researchers can find in the Neotropics to understand how and why these processes occurred in the past and present.
