**Fantasy Pieces** Harald Krebs,1999 This book presents a theory of metrical conflict and applies it to the music of Schumann, thereby placing the composer's distinctive metrical style in full focus. It describes the various categories of metrical conflict that characterize Schumann's work, investigates how states of conflict are introduced and then manipulated and resolved in his compositions, and studies the interaction of such metrical conflict with form, pitch structure, and text. Throughout the text, Krebs intersperses his own theoretical assertions with Schumannesque dialogues between Florestan and Eusebius, who comment on the theory at hand while also discussing and illustrating relevant aspects of their metrical practices.

Comic Crime Earl F. Bargainnier,1987 The actual world of crime is not a subject for laughter, but rather for anger or tears. The world of fiction, however, is a different matter. Most crime fiction is much nearer the comic than the tragic. In the oldest sense of the term comedy - that no matter the difficulties, misunderstandings, or even deaths, the evil are thwarted and the good rewarded - crime fiction is essentially comic. The following eleven original essays cover a wide range in time, authors, forms of fiction, and types of comedy. I hope readers will be both informed and entertained by this excursion into British and American humor and homicide, comedy and crime. --
