

Teorías De La Luz

Lorenzo de la Torre

Introducción a los conceptos y teorías de las ciencias físicas Gerald James Holton, Stephen G. Brush, 1996-10

Quizás la característica más sorprendente de este libro es el énfasis que pone en la naturaleza del descubrimiento, el razonamiento y la formación de conceptos como un tópico fascinante. Esto significa que los aspectos históricos y filosóficos de la exposición no son meramente un ingrediente dulce para conseguir que el lector digiera el texto lo más fácilmente posible, sino que se presentan por su propio interés intrínseco.

La teoría del todo Stephen Hawking, 2010-09-30 Una manera clara y amena de acercarse a los misterios del universo.

En esta esclarecedora obra, el gran físico británico Stephen Hawking nos ofrece una historia del universo, del big bang a los agujeros negros. En siete pasos, Hawking logra explicar la historia del universo, desde las primeras teorías del mundo griego y de la época medieval hasta las más complejas teorías actuales, siempre con su característico tono didáctico y accesible a todos los públicos. Newton, Einstein, la mecánica cuántica, los agujeros negros y la teoría de la gran unificación desfilan por estas páginas acercando al lector los misterios del universo. Reseña: «Un libro exquisito. En definitiva, auténtica poesía del infinito.» Leer

Óptica R. W. Ditchburn, 1982 Este libro está destinado a proporcionar, en los doce primeros capítulos, un curso de Óptica física para alumnos de un primer curso de Física. Los capítulos del 13 al 20 pretenden dar al postgraduado conocimientos de la teoría electromagnética de la luz y de la teoría cuántica de la interacción entre radiación y materia.

Teorías de la relatividad del movimiento uniforme Ángel Luis López Ramos, 1999

Una teoría para la educación Wilfred Carr, 1996 Wilfred CARR es, actualmente, uno de los filósofos más brillantes que trabajan en el seno de la rica tradición británica de la filosofía de la educación. En este libro nos ofrece una sólida justificación para reconstruir la teoría y la investigación en educación como forma de investigación crítica. Con esta perspectiva, afronta un conjunto de cuestiones filosóficas importantes: ¿En qué consiste la teoría de la educación? ¿Quiénes la elaboran? ¿Qué es una práctica educativa? ¿Cómo se relacionan teoría y práctica? ¿Qué función desempeñan los valores en la investigación educativa? ¿Es posible una auténtica ciencia de la educación? Apelando a los desarrollos de la teoría crítica, la filosofía de la ciencia y la filosofía de las ciencias sociales, el autor responde a estas cuestiones con una gran claridad, perspicacia y rigor, reivindicando la idea de una ciencia de la educación que no sea «sobre» la educación, sino «para la

educación»: una ciencia realmente comprometida con la promoción de los valores e ideales educativos. Como Wilfred CARR destaca, «hay que oponerse ala tentación de interpretar la teoría de la educación en términos de ideas convencionales de pureza teórica y de acuerdo con la clasificación vigente de disciplinas académicas. La teoría de la educación sólo comenzará a cumplir su cometido original cuando abandone el aislamiento que ella misma se ha impuesto, su ignorancia práctica autocomplaciente y su búsqueda autoindulgente de categoría académica. En la educación, la teoría es una dimensión indispensable de la práctica».

Introducción a la limpieza con láser Martin Cooper, 2005-11-22 Introducción a la limpieza y conservación con láser es el primer libro que se ha escrito sobre este tema. El desarrollo del láser como un instrumento práctico ha supuesto un avance significativo en la mejora de las técnicas de conservación, pero ha sido únicamente durante los últimos cinco años cuando los conservadores han comenzado a darse cuenta de las grandes posibilidades de la tecnología láser. La limpieza extremadamente selectiva que ofrece da como resultado un trabajo de gran calidad a la vez que reduce al mínimo cualquier posible daño. El libro pionero de Martin Cooper permitirá entender a todos aquellos interesados en la conservación de obras de arte los fundamentos de la técnica de limpieza con láser y conocer tanto sus ventajas como sus limitaciones para un uso responsable y generalizado y, por tanto, para una mejor conservación del patrimonio artístico.
