**Irene Tinker**

*Street Foods* R. V. Bhat,A. P. Simopoulos,Berthold Koletzko,2000-07 This publication focuses on street foods in selected developed and developing countries, including information on nutritional, economic, safety and regulatory aspects and comparing consumption patterns as well as the profiles of the street food vendor in different cultures. Street foods are inexpensive and available foods that in many countries form an integral part of the diet because they are consumed with regularity and consistency across all income groups, but particularly among the urban poor and, in some countries, children. International organizations have paid particular attention to the safety of street foods and much less to the composition and preservation of their nutritional quality. The street food trade is large and complex, providing an important means of generating income, particularly for women, and it is an affordable source of food for many millions of people. Street foods have therefore been considered as a way of reducing problems of urban food insecurity and as a possible vehicle for micronutrient supplementation. Scientists and policy makers in the areas of international health, nutrition, food and trade as well as physicians, nutritionists, dietitians, food scientists, anthropologists, sociologists will particularly benefit from this publication.

*Street Food around the World* Bruce Kraig,Colleen Taylor Sen,2013-09-09 In this encyclopedia, two experienced world travelers and numerous contributors provide a fascinating worldwide survey of street foods and recipes to document the importance of casual cuisine to every culture, covering everything from dumplings to hot dogs and kebabs to tacos. Street foods run deep throughout human history and show the movements of peoples and their foods across the globe. For example, mandoo, manti, momo, and baozi: all of these types of dumplings originated in Central Asia and spread across the Old World beginning in the 12th century. This encyclopedia surveys common street foods in about 100 countries and regions of the world, clearly depicting how fast foods of the common people fit into a country or a region's environments, cultural history, and economy. The entries provide engaging information about specific foods as well as coverage of vendor and food stall culture and issues. An appendix of recipes allows for hands-on learning and provides opportunities for readers to taste international street foods at home.

**Street Foods** Irene Tinker,1997-03-27 Street foods are sold in almost every country in the world. Many urban and rural people depend on them for one or more meals each day. This book explores this world of entrepreneurs in developing

countries. When all of the participants in the delivery are counted, including local farmers, food processors, and street vendors, one realizes the enormous size of this industry. Research conducted by the authors with vendors, local community leaders, and public health officials, worked not only to collect data, but to raise the hygiene of the food that is sold.

*MasterChef: Street Food of the World* Genevieve Taylor, 2017-03-09 MasterChef: Street Food of the World is a no-holds-barred celebration of a food trend that continues to grow exponentially, delighting and enticing foodies. This exciting new book takes inspiration from the hugely successful pop up restaurants that continue to delight in their sheer theatre, as well as the street food vans and street food festivals that proliferate worldwide. From affordable snacks to the more up-market, this collection will focus on the celebration of fresh and local ingredients and different cultures and cuisines. Often quick and easy to make, these recipes will delight the home chef who wants to create sensational street snacks in their own kitchens. What the World Eats Faith D'Aluisio, 2008-08-01 Sitting down to a daily family meal has long been a tradition for billions of people. But in every corner of the world this age-old custom is rapidly changing. From increased trade between countries to the expansion of global food corporations like Kraft and Nestlé, current events are having a tremendous impact on our eating habits. Chances are your supermarket is stocking a variety of international foods, and American fast food chains like McDonald's and Kentucky Fried Chicken are popping up all over the planet. For the first time in history, more people are overfed than underfed. And while some people still have barely enough to eat, others overeat to the point of illness. To find out how mealtime is changing in real homes, authors Peter Menzel and Faith D'Aluisio visited families around the world to

observe and photograph what they eat during the course of one week. They joined parents while they shopped at mega grocery stores and outdoor markets, and participated in a feast where a single goat was shared among many families. They watched moms making dinner in kitchens and over cooking fires, and they sat down to eat with twenty-five families in twenty-one countries--if you're keeping track, that's about 525 meals! The foods dished up ranged from hunted seal and spit-roasted guinea pig to U.N.-rationed grains and gallons of Coca-Cola. As Peter and Faith ate and talked with families, they learned firsthand about food consumption around the world and its corresponding causes and effects. The resulting family portraits offer a fascinating glimpse into the cultural similarities and differences served on dinner plates around the globe. This book has been selected as a Common Core State Standards Text Exemplar (Grades 2-3, Read-Aloud Informational Texts) in Appendix B.

India, Sri Lanka and the SAARC Region Lopamudra Maitra Bajpai,2020-10-28 This book examines the historical and socio-cultural connections across the SAARC region, with a special focus on the relationship between India and Sri Lanka. It investigates hitherto unexplored narratives of history, popular culture and intangible heritage in the region to identify the cultural parallels and intersections that link them together. In doing so, the volume moves away from an organised and authorised heritage discourse and encourages possibilities of new understandings and re-interpretations of cross-cultural communication and its sub-texts. Based on original ethnographic work, the book discusses themes such as cultural ties between India and Sri Lanka, exchanges between Arthur C. Clarke in Sri Lanka and Satyajit Ray in India, cultural connectivity reflected through mythology and folklore, the influence of Rabindranath Tagore on modern dance in Sri Lanka, the introduction of railways in Sri Lanka, narrative scrolls and masked dance forms across SAARC countries, Hindi cinema as the pioneer of cultural connectivity, and women's writing across South Asia. Lucid and compelling, this book will be useful for scholars and researchers of cultural studies, South Asian studies, cultural anthropology, sociology, popular culture, cross-cultural communication, gender studies, political sociology, cultural history, diplomacy, international relations and heritage studies. It will also appeal to general readers interested in the linkages between India and Sri Lanka.

**Adaptation of a food environment typology for urban Sri Lanka** Marshall, Quinn,Hewavidana, Budni H.,2025-04-23 As a sub-study within the R5N evaluation, the International Food Policy Research Institute (IFPRI), University of Peradeniya, and Johns Hopkins University collected food environment data in 45 Grama Niladhari (GN) Divisions across 5 Districts of rural Sri Lanka from December 2020 to March 2024. These communities were in areas where the World Food Programme was targeting a nutrition sensitive resilience program (R5N) to smallholder farming families. The communities were in the agro ecological dry zone of Sri Lanka. The R5N program sought to increase their access to water for irrigation via creation and rehabilitation of community and household irrigation schemes, while also improving nutrition through a behavior change

communication activity. In these contexts, the primary access points for food purchases are through periodic open-air markets (known as pola) and small village retail shops. Many of the communities were in relatively remote areas where the density of food vendors was low. Data collected primarily focused on food prices and food availability as a means of monitoring the cost of a healthy diet and the availability of nutritious food through monthly follow-ups. Other data collected have described market and shop characteristics—such as size, access to roads, electricity, and cold storage.

**Resilient Urbanism** Gihan Karunaratne, 2025-05-08 As urban populations grow unprecedentedly, cities worldwide face pressures from rapid expansion, climate change, and social inequalities. Resilient Urbanism critically examines how cities, towns, and informal settlements adapt to these multifaceted challenges, exploring urban resilience in the 21st century. This volume investigates resilience across a variety of urban contexts, from megacities in the Global South to suburban and coastal regions, through interdisciplinary essays. The contributors examine how urban communities confront crises, navigate urbanization, adapt to climate change, and respond to socioeconomic transformations using innovative and, at times, unconventional strategies. Case studies highlight the lived experiences of urban dwellers, from informal settlements in Maputo, Rio de Janeiro, and Hanoi to the challenges of achieving energy efficiency in Buenos Aires. By interrogating dominant discourses on urban resilience, Resilient Urbanism offers a reimagined perspective on how cities and their inhabitants address uncertainty and change. It emphasizes the everyday practices of urban residents and explores the sociopolitical dynamics of urbanization, presenting resilience not merely as a theoretical framework but as a lived, evolving process. This work sheds light on how cities withstand crises and actively reshape themselves in response to these disruptions. This volume is an essential resource for scholars, urban planners, policymakers, and professionals concerned with the future of cities. It underscores that urban resilience is not just a theoretical concept but a vital imperative for navigating the complexities of a rapidly changing global landscape.

**The Encyclopedia of the Sri Lankan Diaspora** Peter Reeves, 2013 Well over a million people of Sri Lankan origin live outside South Asia. The Encyclopedia of the Sri Lanka Diaspora is the first comprehensive study of the lives, culture, beliefs and attitudes of immigrants and refugees from this island. The volume is a joint publication between the Institute of South Asian Studies, NUS, and Editions Didier Millet. It focuses on the relationship between culture and economy in the Sri Lanka diaspora in the context of globalisation, increased transnational culture flows and new communication technologies. In addition to the geographic mapping of the Sri Lanka diaspora in the various continents, thematic chapters include topics on “long distance nationalism”, citizenship, Sinhala, Tamil and Burgher diaspora identities, religion and the spread of Buddhism, as well as the Sri Lankan cultural impact on other nations.

*The Vagabond's Way* Rolf Potts, 2023-10-03 "Thought-provoking, encouraging, and inspiring" (Gretchen Rubin) reflections on the power of travel to transform our daily lives—from the iconoclastic travel writer, scholar, and author of *Vagabonding* For readers who dream of travel, yearn to get back out on the road, or want to enrich a journey they're currently on, *The Vagabond's Way* explores and celebrates the life-altering essence of travel all year long. Each day of the year features a meditation on an aspect of the journey, anchored by words of wisdom from a variety of thinkers—from Stoic philosopher Seneca and poet Maya Angelou to Trappist monk Thomas Merton and Grover from Sesame Street. Iconoclastic travel writer and scholar Rolf Potts embraces the ragged-edged, harder-to-quantify aspects of travel that inevitably change travelers' lives for the better in unexpected ways. The book's various sections mirror the phases of a trip, including • dreaming and planning the journey: "All life-affecting journeys—and the unexpected wonders they promise—become real the moment you decide they will happen." • embracing the rhythms of the journey: "The most poignant experiences on the road occur in those quiet moments when we recognize beauty in the ordinary." • finding richer travel experiences: "Developing an instinct to venture beyond the obvious on the road allows you to see places as mysteries to be investigated." • expanding your comfort zone: "No moment of instant gratification can compare to savoring an experience that has been earned by enduring the adversity that comes with it." *The Vagabond's Way* encourages you to sustain the mindset of a journey, even when you aren't able to travel, and affirms that travel is as much a way of being as it is an act of movement.

*Food Safety Law in China* Francis Snyder,2015-12-22 This book is the first major study of the making of transnational food safety law in China. Francis Snyder shows how the 2008 melamine infant formula crisis led to China's first food safety law and new food safety standards, substantial reforms in government policy and closer relations with international organisations. He also identifies current and future challenges and makes recommendations for dealing with them. Chinese food safety law today is influenced strongly by cross-border factors. While transnational regimes help to shape domestic decisions, many institutions deeply embedded in Chinese society have played key roles in this transformation. Francis Snyder emphasises that, in finding its own path toward ensuring food safety, China can both learn from and teach other countries. In May 2017 this title has been awarded a 'Gourmand World Cookbook Award' in Yantai, Shandong Province, China: 'Best in the World' in two categories: 'Best Wine Law Book' and 'Food Safety Institutions'.

**Sensory Evaluation and Consumer Acceptance of New Food Products** Ana Isabel de Almeida Costa,Maria Joao P Monteiro,Elsa Lamy,2024-08-14 Large amounts of money, time and effort are devoted to sensory and consumer research in food and beverage companies in an attempt to maximize the chances of new products succeeding in the marketplace. Food Politics Robert L. Paarlberg, 2023 Covering the many important changes in food markets and food politics that have shaped both global and local farming and eating over the past decade, this compact and authoritative primer lays out everything you need to know to understand today's global food landscape. The politics of food is changing fast. In rich countries, obesity is now a more serious problem than hunger. Consumers once satisfied with cheap and convenient food now want food that is also safe, nutritious, fresh, and grown by local farmers using fewer chemicals. Heavily subsidized and underregulated commercial farmers are facing stronger push back from environmentalists and consumer activists, and food companies are under the microscope. Where does power lie in this increasingly complex global food system? Moreover, what is the future of food politics, both in the United States and beyond? The third edition of *Food Politics: What Everyone Needs to Know*(R) has been thoroughly updated to reflect the latest developments and research on today's global food landscape, including the realities of food markets, farm production methods, food manufacturing, and dietary health challenges. New material covers the rise of China in world food markets and global food politics, the unabated and increasing risks to farming from climate change, the impact COVID-19 had on incomes and hunger, the equally shocking impact from the war in Ukraine on food prices and trade, and surprising scientific and technical breakthroughs such as the genome editing of crops (CRISPR) and the marketing of cell-cultured (animal-free) meats. As well, each chapter has been updated with new data on population growth, hunger and food security, trade conflicts, humanitarian aid, carbon farming, regenerative agriculture, holistic grazing, animal welfare, genetically engineered food, and more. Discussing the politics and policies that continue to shape our contemporary food system, Robert Paarlberg challenges myths and critiques more than a few of today's fashionable beliefs about farming and food. For those ready to have their thinking about food politics informed, but also challenged, this is the book to read.
