Gretchen Schmelzer, PhD

The Year of Magical Thinking Joan Didion, 2005-10-04 NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • From one of America's iconic writers, a stunning book of electric honesty and passion that explores an intensely personal yet universal experience: a portrait of a marriage—and a life, in good times and bad—that will speak to anyone who has ever loved a husband or wife or child. One of The New York Times's 100 Best Books of the 21st Century Several days before Christmas 2003, John Gregory Dunne and Joan Didion saw their only daughter, Quintana, fall ill with what seemed at first flu, then pneumonia, then complete septic shock. She was put into an induced coma and placed on life support. Days later—the night before New Year's Eve—the Dunes were just sitting down to dinner after visiting the hospital when John Gregory Dunne suffered a massive and fatal coronary. In a second, this close, symbiotic partnership of forty years was over. Four weeks later, their daughter pulled through. Two months after that, arriving at LAX, she collapsed and underwent six hours of brain surgery at UCLA Medical Center to relieve a massive hematoma. This powerful book is Didion's attempt to make sense of the “weeks and then months that cut loose any fixed idea I ever had about death, about illness ... about marriage and children and memory ... about the shallowness of sanity, about life itself.

The Year of Magical Thinking Joan Didion, 2009-04-02 In this dramatic adaptation of her award-winning, bestselling memoir, Joan Didion transforms the story of the sudden and unexpected loss of her husband and their only daughter into a stunning and powerful one-woman play. “This happened on December 30, 2003. That may seem a while ago but it won't when it happens to you....” Michiko Kakutani in The New York Times called the memoir that was the basis for the play, “an indelible portrait of loss and grief ... a haunting portrait of a four-decade-long marriage. The first theatrical production of The Year of Magical Thinking opened at the Booth Theatre on March 29, 2007, starring Vanessa Redgrave and directed by David Hare.

About Grief Ron Marasco, Brian Shuff, 2010-09-16 *About Grief* is an unorthodox learning approach to a difficult and profoundly human experience. The authors are not physicians or psychologists, so the book is without clinical jargon. It is not a memoir of personal grief, so there is no wrenching saga to work through. And it is not a touchyfeely inspirational book, so, as the authors put it, There are no doves on the jacket.

The Mother of All Booklists William Patrick Martin, 2014-12-24 *The Mother of All Booklists: The 500 Most Recommended Nonfiction Reads for Ages 3 to 103* is written for parents, grandparents, and teachers unfamiliar with the

bewildering array of award and recommended reading lists. This book is a long overdue composite of all the major booklists. It brings together over 100 of the most influential book awards and reading lists from leading magazines, newspapers, reference books, schools, libraries, parenting organizations, and professional groups from across the country. The Mother of All Booklists is to reading books what the website Rotten Tomatoes is to watching movies—the ultimate, one-stop, synthesizing resource for finding out what is best. Mother is not the opinion of one book critic, but the aggregate opinion of an army of critics. Organized into five age group lists each with one hundred books—preschoolers (ages 3-5), early readers (ages 5-9), middle readers (ages 9-13), young adults (ages 13-17), and adults (ages 18+)—The Mother of All Booklists amalgamates the knowledge of the best English-language booklists in the United States, including a few from Canada and Great Britain. Each of the 500 books is annotated, describing the contents of the book and suggesting why the book is unique and important. Each includes a picture of the book cover.

The Truth About Grief Ruth Davis Konigsberg, 2011-01-04 The five stages of grief are so deeply imbedded in our culture that no American can escape them. Every time we experience loss—a personal or national one—we hear them recited: denial, anger, bargaining, depression, and acceptance. The stages are invoked to explain everything from how we will recover from the death of a loved one to a sudden environmental catastrophe or to the trading away of a basketball star. But the stunning fact is that there is no validity to the stages that were proposed by psychiatrist Elisabeth Kübler-Ross more than forty years ago. In *The Truth About Grief*, Ruth Davis Konigsberg shows how the five stages were based on no science but nonetheless became national myth. She explains that current research paints a completely different picture of how we actually grieve. It turns out people are pretty well programmed to get over loss. Grieving should not be a strictly regimented process, she argues; nor is the best remedy for pain always to examine it or express it at great length. The strength of Konigsberg's message is its liberating force: there is no manual to grieving; you can do it freestyle. In the course of clarifying our picture of grief, Konigsberg tells its history, revealing how social and cultural forces have shaped our approach to loss from the Gettysburg Address through 9/11. She examines how the American version of grief has spread to the rest of the world and contrasts it with the interpretations of other cultures—like the Chinese, who focus more on their bond with the deceased than on the emotional impact of bereavement. Konigsberg also offers a close look at Kübler-Ross herself: who she borrowed from to come up with her theory, and how she went from being a pioneering psychiatrist to a New Age healer who sought the guidance of two spirits named Salem and Pedro and declared that death did not exist. Deeply researched and provocative, *The Truth About Grief* draws on history, culture, and science to upend our country's most entrenched beliefs about its most common experience.

Narrative Medicine James Phelan, 2022-10-27 *Narrative Medicine: A Rhetorical Rx* rests on the principles that storytelling is central to medical encounters between caregivers and patients and that narrative competence enhances medical

competence. Thus, the book's goal is to develop the narrative competence of its reader. Grounded in the rhetorical theory of narrative that Phelan has been constructing over the course of his career, this volume utilizes a three-step method: Offering a jargon-free explication of core concepts of narrative such as character, progression, perspective, time, and space. Demonstrating how to use those concepts to interpret a diverse group of medical narratives, including two graphic memoirs. Pointing to the relevance of those demonstrations for caregiver-patient interactions. *Narrative Medicine: A Rhetorical Rx* is the ideal volume for undergraduate students interested in pursuing careers in healthcare, students in medical and allied health professional schools, and graduate students in the health humanities and social sciences.

Design Discourse David Franke, Alex Reid, 2010-10-06 *Design Discourse: Composing and Revising Programs in Professional and Technical Writing* addresses the complexities of developing professional and technical writing programs. The essays in the collection offer reflections on efforts to bridge two cultures—what the editors characterize as the “art and science of writing”—often by addressing explicitly the tensions between them. *Design Discourse* offers insights into the high-stakes decisions made by program designers as they seek to “function at the intersection of the practical and the abstract, the human and the technical.”

Contemporary Second- and Third-Person Autobiographical Writing Christina Schönberger-Stepien, 2023-03-31 This book explores 21st-century uses of the second- and third-person perspective in Anglophone autobiographical narratives by canonical male writers. Through detailed readings of contemporary autobiographical works by Paul Auster, Julian Barnes, J.M. Coetzee, and Salman Rushdie, the study demonstrates the multiple aesthetic, rhetorical, and un/ethical implications of the choice of narrative perspective as well as the uncommon step of articulating the self from a perspective which is not I. Drawing on (rhetorical) narratology and autobiography theory, the book engages with questions and tensions of subjectivity

and relationality, the interplay of distance and proximity resulting from the narrative perspective, and its effects on the relationship between autobiographer, text, and reader. In addition, the book traces relevant guiding principles that the authors use to navigate their self-narratives in relation to others, such as questions of embodiment, visibility, grief, ethics, and politics. Situating the narratives in their socio-political and cultural context, the book uncovers to what extent these autobiographical narratives reflect the authors' position between self-withdrawal and self-promotion as well as their response to questions of male agency, self-stylisation, and celebrity status.

The Routledge Introduction to American Life Writing Amy Monticello, Jason Tucker, 2023-07-31 The stories of lived experience offer powerful representations of a nation's complex and often fractured identity. Personal narratives have taken many forms in American literature. From the letters and journals of the famous and the lesser known to the memoirs of former slaves to hit true crime podcasts to lyric essays to the curated archives we keep on social media, life writing has been a tool of both the influential and the disenfranchised to spark cultural and political evolution, to help define the larger identity of the nation, and to claim a sense of belonging within it. Taken together, individual stories of real American lives weave a tapestry of history, humanity, and art while raising questions about the veracity of memory and the slippery nature of truth. This volume surveys the forms of life writing that have contributed to the richness of American literature and shaped American discourse. It examines life writing as a rhetorical tool for social change and explores how technological advancement has allowed ordinary Americans to chronicle and share their lives with others.

A Cool Customer Jacob Bacharach, 2018 Reflecting on his brother's death from opioid addiction, Jacob Bacharach turns Didion's masterpiece into a blueprint for grief and self-discovery Literary Nonfiction. Essay. Reading Joan Didion's iconic memoir *The Year of Magical Thinking*, Jacob Bacharach's thoughts are never far from his brother, Nate, who died of an opioid addiction. Although he tries to be a cool customer like Didion, he finds Nate's story breaking through the text, stirring memories of their tight-knit childhood and defying his attempts to find the truth about a tragic death. In *A COOL CUSTOMER*, Bacharach turns *The Year of Magical Thinking* into a blueprint for grief and self-discovery that anyone can follow. This book is part of a new series from Fiction Advocate called Afterwords. Bacharach smartly weaves his family story with a literate discussion of Didion's narratives and cultural position to make a snappy and inviting book you could easily read in one sitting.--Rebecca Foster

Loss, Grief and Existential Awareness Mai-Britt Guldin, Carlo Leget, 2024-12-17 Loss, Grief and Existential Awareness introduces the Integrated Process Model (IPM), a new interdisciplinary and interprofessional model for grief research, education, and accompaniment that distinguishes and integrates five dimensions of grief: physical, emotional, cognitive, social, and spiritual. Central in this book is the insight that grief is connected to love because it is rooted in losing what is meaningful and dear to us. Once we recognize this, grief can become a window to existential awareness. Combining research

on the physical, emotional, cognitive, social, and spiritual dimensions of grief, the integrated process approach connects this quest for a personal and authentic answer to the big questions in life with the philosophical and therapeutic tradition of existential thinking. Structured in an accessible, informative manner with gradual information building, the book presents the IPM approach at the beginning and then turns to it as a model throughout the book, so the reader gradually will start to deepen their understanding and memorize the framework. The structure is enhanced with boxes with existential reflections and exercises to engage the reader and case presentations of grieving persons who are followed throughout the book. This book is meant for everyone who is interested in a deeper understanding of how loss and grief can help opening the door to a more meaningful way of living. It is especially helpful for healthcare professionals, therapists, counsellors, chaplains, and researchers.

Journey Through Trauma Gretchen Schmelzer, PhD, 2018-02-06 As a therapist, Gretchen Schmelzer has watched far too many people quit during treatment for trauma recovery. They find it too difficult or frightening, or they decide that it's just too late for them. Schmelzer wrote *Journey Through Trauma* specifically for survivors to help them understand the terrain of the healing process and stay on the path. She begins by laying out three important assumptions that support a survivor's healing: that it is possible, that it requires courage and that it cannot be done alone. Traumas that happen more than once - child abuse, sexual abuse, domestic violence, gang violence, war - are all relational traumas. They are traumas that happen inside a relationship and therefore must be healed inside a relationship, whether that relationship is with a therapist or within a group. She then guides readers through the five phases that every survivor must negotiate: Preparation, Unintegration, Identification, Integration and Consolidation. She creates a mental map of the healing process that helps survivors recognize where they are in their journey to health, see where the hard parts occur and persevere in the process of getting well. Since the cycle of healing repeated trauma is not linear, the survivor comes to understand that circling back around to a previous stage actually means progress as well as facing new challenges. Ultimately, the healing journey is one of trust, as survivors come to trust their capacity to rely on help from others and to trust themselves and the work they have done.

Theatre and Therapy Fintan Walsh, 2024-09-19 What is the relationship between theatre and therapy? How has this relationship developed over time, with a new contemporary focus on mental wellbeing? How is therapy put on the couch by theatrical performance? *Theatre and Therapy* explores the evolution of links between theatre and therapy by considering actor training, theatre in therapeutic contexts, and contemporary theatre and performance practice. The book illuminates some of the connections and frictions between theatre and therapy, drawing on a range of examples that includes theatre performance, documentary theatre, solo performance, comedy, method acting and dramatherapy. This concise study traverses some of the changing interactions between theatre and therapy, and in this revised edition, takes into account

shifting attitudes and approaches to theatre as a therapeutically inspired practice and tool.

Writing Widowhood Jeffrey Berman, 2015-10-07 Explores how memoirs of widowhood can help us understand the reality of bereavement and the critical role of writing and reading in recovery. The death of a beloved spouse after a lifetime of companionship is a life-changing experience. To help understand the reality of bereavement, Jeffrey Berman focuses on five extraordinary American writers—Joan Didion, Sandra Gilbert, Gail Godwin, Kay Redfield Jamison, and Joyce Carol Oates—each of whom has written a memoir of spousal loss. In each chapter, Berman gives an overview of the writer's life and art before widowhood, including her early preoccupation with death, and then discusses the writer's memoir and her life as a widow. He discovers that writing was, for all of these authors, both a solace and a lifeline, enabling them to maintain bonds with their lost loved ones while simultaneously moving on with their lives. These memoirs of widowhood, Berman maintains, reveal not only courage and resilience in the face of loss, but also the critical role of writing and reading in bereavement and recovery. *Writing Widowhood* is a stunning achievement that combines biography, literary history, and theoretical and philosophical exploration into the nature of grief as well as mental illness—all seamlessly executed. Berman elegantly and lucidly conveys a range of theories and perspectives to suit both academic and general readers. Berman never compromises complexity while remaining accessible and straightforward throughout. — Virginia L. Blum, author of *Flesh Wounds: The Culture of Cosmetic Surgery* *Writing Widowhood* contributes to the field of autobiography/biography, and particularly to women's writing within that generic field, by discussing five memoirs which Berman categorizes as the "widow memoir." No other critic that I know has shaped commentaries into a newly defined genre. Berman's book, thus, makes an important contribution to the overall field. — Linda Wagner-Martin, author of *Telling Women's Lives: The New Biography*
