Bases botánico-ecológicas para la restauración de la cubierta vegetal de la Sierra de Gádor (Almería) Esther Giménez Luque, 2004-12-22 Estudio de las bases botánico-ecológicas necesarias para la restauración de la cubierta vegetal de la Sierra de Gádor (Almería). Se realiza el análisis bioclimático según la metodología propuesta por Rivas Martínez. Se analizan y discuten las fronteras biogeográficas incluidas en el área de estudio. Se estudian desde el punto de vista fitosociológico 34 clases, 59 órdenes, 92 alianzas, 115 asociaciones y 9 comunidades, describiéndose por primera vez 3 asociaciones y 2 subasociaciones. Se estudia el paisaje vegetal mediante las series de vegetación, describiéndose y cartografiándose cada una de ellas (7 series climatófilas, 5 edafófilas y 2 complejos de vegetación). Se presenta el catálogo florístico del territorio, que consta de 1540 táxones, aportando para cada uno de ellos datos relativos a su ecología, fitosociología, biogeografía, biotipo y abundancia relativa. Finalmente se realiza el análisis del catálogo florístico en el que se incluye el análisis del espectro biológico, biogeográfico, análisis de abundancia relativa de los distintos tipos biológicos y biogeográficos y análisis de bioindicadores. Se presenta el mapa de series de vegetación a escala 1:50000.

Manual de Radiología para Técnicos Stewart C. Bushong, 2005-10 Nueva edición de la obra mas conocida e implantada en radiología para técnicos. El objetivo de este manual es triple: transmitir conocimientos básicos de física radiológica, preparar a los estudiantes para sus exámenes y proporcionar una base de conocimientos para que los radiólogos en ejercicio puedan tomar decisiones documentadas sobre factores técnicos, calidad de la imagen diagnóstica y tratamiento de la radiación para los pacientes y el personal. Proporciona una presentación sólida de la ciencia radiológica, incluidas las bases de la física radiológica, técnicas de imagen, radiobiología y protección radiológica. Algunos de los temas más importantes tratados son la mamografía, fluoroscopia, procedimientos intervencionistas, tomografía computerizada espiral con múltiples cortes y los diversos modos emergentes de imagen digital. Esta edición también presenta objetivos de aprendizaje, numerosas ilustraciones, más de 750 en esta ocasión, perspectivas globales y resúmenes de los capítulos para animar a los estudiantes al estudio y facilitar el aprendizaje. Las preguntas al final de cada capítulo incluyen ejercicios de definición, preguntas de respuestas cortas y cálculos. A pesar de que la ciencia radiológica no puede separarse de las matemáticas, este manual no asume que los lectores tengan una base matemática y todas las ecuaciones van seguidas de problemas de ejemplo con una aplicación clínica directa para una más fácil comprensión. Esta nueva edición ha sido totalmente renovada e incluye numerosas actualizaciones en las áreas de técnicas de imagen especiales, donde se han

producido los mayores avances en tecnología radiológica. Existe una nueva sección sobre tomografía computarizada espiral con múltiples cortes, presenta innovaciones como la radiografía digital y las características de las técnicas asociadas al empleo de silicio amorfo y selenio amorfo. Incluye también una nueva discusión sobre dispositivos acoplados por carga y las ventajas para los procedimientos intervencionistas, así como los avances en composición de dianas, compresión e imagen digital para la mamografía. La octava edición también incluye más definiciones en el texto y referencias del capítulo. Todos los términos en negrita se definen la primera vez que aparecen y se recogen en un glosario, lo que resulta de gran ayuda para los estudiantes.

El diseño curricular como puente entre universidad y sociedad MORENO FLORES, JOAQUÍN, 2021-06-24 Por fin se publica una nueva forma de diseñar planes de estudio universitarios que rompe categóricamente el alejamiento entre lo que se enseña en los Templos del Saber y lo que la Empresa y la Sociedad necesitan.; Una nueva forma de proceder que traslada contundentemente la realidad profesional a las aulas, enriquecida, además, por el saber académico que fundamenta, da sentido científico y amuebla el entendimiento de nuestros estudiantes. Proezas que surgen, a lo largo de las páginas de este libro, de manera coherente como consecuencia de decisiones tomadas a partir de indicadores objetivos, establecidos a través de procedimientos rigurosos y bien justificados y que conducen a resultados tendencialmente ciertos. Acciones, todas ellas, ejecutadas dentro de un planteamiento institucional que implica en los procedimientos a todo el profesorado relacionado (no solo a los más influyentes) a la empresa y al alumnado vinculados.; Esta obra se dirige a los estudiosos de la disciplina de Diseño Curricular, al profesorado universitario, preocupado en formar dentro del saber (entendimiento) y del saber hacer (competencias), a las Escuelas Técnicas Superiores y Facultades, inquietas por la actualización de sus planes de estudio en una sociedad que cambia a la velocidad del rayo, a las empresas, interesadas en colaborar en la definición de los perfiles de los egresados que deben emplear, a los alumnos que quieren comprender por qué deben aprender esto y no aquello, lo que aporta cada pedacito de conocimiento a su formación y a su competencia (en especial a los profesores, profesionales y alumnos de Ingeniería de Edificación o Arquitectura Técnica, Grado elegido como ilustración de las ideas desarrolladas detrás de esta cubierta), y, finalmente, a las fundaciones e instituciones cuya misión sea acercar los mundos de la Universidad, la Empresa y la Sociedad.; Joaquín Moreno Flores, coordinador de la obra, es profesor titular del Departamento de Matemática Aplicada en la Universidad Politécnica de Valencia. El equipo de autores son profesores de destacadas universidades españolas (Universidad de Alicante, Universidad de Castilla-La Mancha, Universitat de Lleida, Universidad Politécnica de Madrid, Universidad de Sevilla y Universidad Politécnica de Valencia).; El Solucionario a los problemas planteados en este libro está disponible en la pestaña Material complementario.

Informe 2016 sobre el estado del sistema educativo. Curso 2014-2015 , El Informe sobre el estado del sistema educativo

da cumplimiento a lo establecido, por primera vez, en el artículo 33.1 de la Ley Orgánica 8/1985, de 3 de julio, reguladora del Derecho a la Educación por el cual se atribuye al Consejo Escolar del Estado la competencia de su elaboración y aprobación con una periodicidad anual. La presente edición de 2016, ofrece la información más relevante del sistema educativo español referidos al curso 2014-2015 y se atiene a un modelo cuya estructura y principios básicos de elaboración pretenden conciliar el rigor intelectual y académico con las exigencias de la participación de los diferentes sectores afectados. La edición que se presenta, de acuerdo con lo previsto en los apartados 2 y 3 del artículo 4 del Reglamento de funcionamiento del Consejo Escolar del Estado (ORDEN ESD/3669/ 2008, de 9 de diciembre), mantiene la estructura de los informes elaborados con anterioridad, distinguiéndose en el mismo dos partes perfectamente diferenciadas, una descriptiva, que se corresponde con los capítulos A, B, C, y D, y otra valorativa-propositiva incluida en el capítulo E. El Capítulo A recoge, en primer lugar, una descripción sintética de las principales iniciativas adoptadas por las diferentes instituciones principales de la Unión Europea a lo largo del segundo semestre de 2014 y del primero de 2015 en materia de educación y formación. A continuación, se profundiza en los factores demográficos, los factores socioeducativos y los factores socioeconómicos que caracterizan lo esencial del contexto español y que resulta de interés para la educación. El Capítulo B describe, en términos cuantitativos, los inputs que operan sobre nuestro sistema educativo, entendidos éstos como el conjunto de los recursos públicos y privados, materiales y humanos que se ponen a disposición del sistema para el desarrollo de sus procesos y el logro de los resultados deseados. El Capítulo C se centra en la descripción de los principales procesos y políticas que se han desarrollado por el Ministerio de Educación, Cultura y Deporte a lo largo del curso 2014-2015 en el plano estatal y se describen, asimismo, las políticas propias de su ámbito de gestión directa. La ordenación de las enseñanzas, la igualdad de oportunidades y la calidad educativa constituyen los ámbitos en los que se centran las principales novedades. El Capítulo D comprende aquello que resulta, en lo inmediato, de aplicar al sistema ese amplio y complejo conjunto de recursos, de políticas y de influencias descrito en los capítulos anteriores. La escolarización, que concierne al acceso, la permanencia y la progresión de los alumnos en el sistema reglado; los resultados académicos que se derivan de la evaluación interna; los de rendimiento escolar que proporcionan las diferentes evaluaciones externas realizadas en el periodo de referencia del informe, así como el seguimiento de los indicadores asociados a la estrategia europea ET2020 configuran lo esencial de este capítulo. El Capítulo E constituye la aportación por excelencia de las diferentes personas, grupos y sectores que están representados en el Consejo Escolar del Estado. Con el propósito de facilitar la identificación de las numerosas propuestas de mejora que han gozado, mediante procedimientos democráticos, de los apoyos suficientes en el proceso de tramitación, se han organizado aquéllas atendiendo a su temática y con una referencia explícita a su finalidad.

Problemas de termodinámica técnica José Segura Clavell, Juan Rodríguez, 1990 Este libro es complemento indispensable de la obra Termodinámica técnica. Su desarrollo es tal que resuelve todos los problemas que se plantean al

finalizar cada uno de los capítulos al final de la obra. Se incluyen también en este libro, tablas y diagramas imprescindibles para la resolución de la mayor parte de los problemas que se plantean.

Gestión de bases de datos. 2ª Edición (GRADO SUPERIOR) José Eduardo Córcoles Tendero, La presente obra está dirigida a los estudiantes del Ciclo Formativo Administración de Sistemas Informáticos en Red de Grado Superior, en concreto para el módulo profesional Gestión de Bases de Datos. Se cubren con cierto detalle los distintos modelos de datos predominantes en el mercado, así como los sistemas de software de bases de datos que permiten su implementación física. En primer lugar, se verán los sistemas de almacenamiento para estudiar después el modelo relacional como ejemplo de modelado que más se ha impuesto desde su creación en los años 70. Después, se estudiará cómo se tratan los datos utilizando un gestor o software de bases de datos bastante extendido y bien documentado como es MySQL y el lenguaje genérico (independiente del software) SQL, que permite llevar a cabo las distintas operaciones (consulta, inserción, modificación y borrado de datos). Posteriormente, se verá en detalle el proceso clásico de desarrollo de bases de datos, desde su concepción mediante un modelo conceptual hasta su implementación en un sistema informático. Por último, se desarrollará un ejemplo de software de bases de datos avanzado que utiliza conceptos de la orientación a objetos. Se trata de Oracle, un sistema gestor de bases objeto-relacionales que incorpora conceptos de bases de datos y de objetos tal y como se definieron según el estándar SQL1999. Todo ello con numerosos ejemplos y complementado con una serie de apéndices que amplían y completan los conceptos explicados. Así mismo, se incorporan test de conocimientos y ejercicios propuestos con la finalidad de comprobar que los objetivos de cada capítulo se han asimilado correctamente. Además, reúne los recursos necesarios para incrementar la didáctica del libro, tales como un glosario con los términos informáticos necesarios, bibliografía y documentos para ampliación de los conocimientos.
