Pros and Cons John Bertram Askew, 1912

Pros and Cons S. Clara Kim, 2001 This book provides in-depth analyses of ten major controversial social policy issues currently on the national debate forum that are closely related to our lives and community. The key topics are: abortion, affirmative action policy, the death penalty, gun control, health care reform, human cloning, physician-assisted suicide, social security reform, school voucher program, and welfare reform. For those interested in sociology and political science.

The Biblical Truth about America's Death Penalty Dale S. Recinella, 2015-12-01 While secular support for capital punishment in America seems to be waning, religious conservatives, particularly in the Bible belt, remain staunch advocates of the death penalty, citing biblical law and practice to defend government-sanctioned killing. Dale S. Recinella compares biblical teaching about the death penalty, including such passages as eye for eye, tooth for tooth, life for life, with the nation's current system of capital punishment, and offers persuasive arguments for a faith-based moratorium on -- and eventual abolition of -- executions. Framing his careful and incisive analysis as a legal brief to those who believe the Bible mandates the ultimate punishment, the author addresses two critical areas of inquiry: what do the scriptures tell us about who is deserving of death and who has the authority to kill, and what do they tell us about the required standards for execution and the plight of victims' families. Recinella's examination of the Hebrew Torah, or Christian Pentateuch, and the Talmud reveals that the biblical death penalty was not a simple system of swift retribution, but a complex and practical set of laws that guided capital courts established under the Sanhedrin. His scrutiny of these texts, the Christian doctrine of atonement, and Romans 13 in the Pauline Epistles, draws parallels between the traditional biblical arguments used in favor of capital punishment and those used as the basis for pro-slavery positions in the nineteenth century. Demonstrating that both approaches are unsubstantiated in biblical terms, Recinella debunks the accepted religious reasoning for support of the death penalty and shows instead that the Bible's strict conditions for sanctioning execution are at odds with the arbitrary

ways in which capital punishment is administered in the United States. He provides convincing evidence that a sentence of death in today's criminal justice system in fact fails to meet both the Bible's exacting procedural requirements and its strict limitations on judicial authority. By providing actual scriptural language and foundation to counter the position that biblical truth justifies a pro-death penalty stance, this thoughtful, solidly researched, and well-reasoned work will give pause to religious fundamentalists and challenge them to rethink their strongly held views on capital punishment.

Pros and Cons Debbie Newman, Trevor Sather, Ben Woolgar, 2013-10-08 Pros and Cons: A Debaters Handbook offers a unique and invaluable guide to the arguments both for and against over 140 current controversies and global issues. Since it was first published in 1896 the handbook has been regularly updated and this nineteenth edition includes new entries on topics such as the right to possess nuclear weapons, the bailing out of failing industries, the protection of indigenous languages and the torture of suspected terrorists. Equal coverage is given to both sides of each debate in a dual column format which allows for easy comparison. Each entry also includes a list of related topics and suggestions for possible motions. The introductory essay describes debating technique, covering the rules, structure and type of debate, and offering tips on how to become a successful speaker. The book is then divided into eight thematic sections, where specific subjects are covered individually.

The International Library of Essays on Capital Punishment, Volume 2 Peter Hodgkinson, 2016-12-05 The essays selected for this volume develop conventional abolition discourse and explore the conceptual framework through which abolition is understood and posited. Of particular interest is the attention given to an integral but often forgotten element of the abolition debate: alternatives to capital punishment. The volume also provides an account of strategies employed by the abolition community which challenges tired methodologies and offers a level of transparency previously unseen. This collection tackles complex but fundamental components of the capital punishment debate using empirical data and expert observations and is essential reading for those wishing to comprehend the fundamental issues which underpin capital punishment discourse.

Linguistic Tools for Written Communication Reshmi Dutta-Flanders, 2024-06-28 This book uses a linguistically and stylistically grounded analytical approach to written discourse to explain the patterns that appear when evaluating academic essays, and to explore the potential of 'nativized' linguistic tendencies as strategies in written communication. As 'linguistic behaviour', these strategies constitute a multinorm, and the author argues that comprehensive awareness of a written norm in a multilingual context is not about language rules for ironing out inequalities, but rather about varieties of linguistic practices that construct alternative strategies and patterns in written discourse. The book combines topics such as study skills, English as a Second Language and English for Academic Purposes, but grounds them within a World Englishes and syntactic paradigm, exploring why students write in a certain way due to their linguistic instincts, as well as helping students

to see practical examples of what this means from the immediate perspective of sentence construction. It will be of interest to scholars of Education, Language and Linguistics, Study Skills, EAP and World Englishes, as well as students across disciplines who are encountering the academic essay as a form for the first time.

Capital Punishment: New Perspectives Peter Hodgkinson, 2016-04-08 This collection asks questions about the received wisdom of the debate about capital punishment. Woven through the book, questions are asked of, and remedies proposed for, a raft of issues identified as having been overlooked in the traditional discourse. It provides a long overdue review of the disparate groups and strategies that lay claim to abolitionism. The authors argue that capital litigators should use their skills challenging the abuses not just of process, but of the conditions in which the condemned await their fate, namely prison conditions, education, leisure, visits, medical services, etc. In the aftermath of successful constitutional challenges it is the beneficiaries (arguably those who are considered successes, having been 'saved' from the death penalty and now serving living death penalties of one sort or another) who are suffering the cruel and inhumane alternative. Part I of the book offers a selection of diverse, nuanced examinations of death penalty phenomena, scrutinizing complexities frequently omitted from the narrative of academics and activists. It offers a challenging and comprehensive analysis of issues critical to the abolition debate. Part II offers examinations of countries usually absent from academic analysis to provide an understanding of the status of the debate locally, with opportunities for wider application.

The Mammoth Book of Bizarre Crimes Robin Odell, 2010-03-25 You couldn't make it up: incredible real-life criminal cases A fascinating A-Z of murderous crimes which spans the globe and the centuries in uncovering the extremes of human criminality in all its strangeness. This collection of unusual, if not sensational, murder cases recalls strange crimes of the past and offers insights into particularly macabre and shocking modern murders. Many of the cases also shed light on advances in crime detection, law enforcement and forensic science. Cases include: Krystian Bala, the Polish writer who killed a rival, and then used the murder as the plot for a novel; Alexander Pichuskin, who was stopped one short of killing the 64 victims he needed to 'fill a chess board'; John Lee, 'the man they could not hang' who survived three attempts to execute him; and Adelaide Bartlett, who was accused of killing her husband with chloroform, but was acquitted because no one could work out how she had done it - and she wouldn't say.

The Case for Capital Punishment Alfred B. Heilbrun Jr., 2012-12-03 As a punishment for our most serious crime—the intentional killing of a victim in an egregious way—the death penalty naturally attracts opposing moral views. One view says that the state should never execute a criminal no matter what the crime may be. The other view requires execution as justice is sought for the victim. This book considers a third possible view: capital punishment should be judged by its pragmatic value to society. Does the prospect of possible execution save lives by deterring the act of murder? Heilbrun presents evidence concerning whether state death penalties demonstrate the two necessary properties of a true deterrent: a reduction

in intentional killing when present and an increase when removed. The Case for Capital Punishment contains an analysis of rarely-considered factors that influence the deterrence of murder and a discussion of the common criticisms of capital punishment.

Grief, Loss, and Treatment for Death Row Families Sandra Joy, 2013-12-05 The families of death row inmates are rarely considered in public discourse regarding the death penalty. They have largely been forgotten, and their pain has not been acknowledged by the rest of society. These families experience a unique grief process as they are confronted with the loss of their loved one to death row and brace themselves for the possibility of an execution. Death row families are disenfranchised from their grief by the surrounding community, and their; mental health needs exacerbated as they struggle in isolation with the ambiguous loss that comes with the fear that the state will kill their loved one. *Grief, Loss, and Treatment for Death Row Families* describes the grief that families experience from the time of their loved one's arrest through his or her execution. In each chapter, Sandra Joy guides the reader through the grief process experienced by the families, offering clinical interventions that can be used by mental health professionals who are given the opportunity to work with these families at various stages of their grief. The author conducted over seventy qualitative interviews with family members from Delaware who either currently have a loved one on death row or have survived the execution of their loved one. Delaware was chosen because though it has a relatively small death row, it is ranked third in the nation with its rate of per capita executions. This book provides an in-depth awareness of the grieving process of death row families, as well as ways that professionals can intervene to assist them in healing. With increased awareness and effective clinical treatment, we can ensure that the families of death row inmates are forgotten no more.

Preventive Justice Andrew Ashworth, Lucia Zedner, 2014-03-27 This book arises from a three-year study of Preventive Justice directed by Professor Andrew Ashworth and Professor Lucia Zedner at the University of Oxford. The study seeks to develop an account of the principles and values that should guide and limit the state's use of preventive techniques that involve coercion against the individual. States today are increasingly using criminal law or criminal law-like tools to try to prevent or reduce the risk of anticipated future harm. Such measures include criminalizing conduct at an early stage in order to allow authorities to intervene; incapacitating suspected future wrongdoers; and imposing extended sentences or indefinite on past wrongdoers on the basis of their predicted future conduct - all in the name of public protection and security. The chief justification for the state's use of coercion is protecting the public from harm. Although the rationales and justifications of state punishment have been explored extensively, the scope, limits and principles of preventive justice have attracted little doctrinal or conceptual analysis. This book re-assesses the foundations for the range of coercive measures that states now take in the name of prevention and public protection, focussing particularly on coercive measures involving deprivation of liberty. It examines whether these measures are justified, whether they distort the proper boundaries between criminal and

civil law, or whether they signal a larger change in the architecture of security. In so doing, it sets out to establish a framework for what we call 'Preventive Justice'.
