

En Qu Consiste La Divisin Internacional Del Trabajo

Vania Bambirra

La nueva división internacional del trabajo Folker Fröbel, Jürgen Heinrichs, Otto Kreye, 1980 Desde la recesión mundial generalizada de 1975, las cifras de paro en los principales países capitalistas avanzados han permanecido estables o han crecido considerablemente: los países industrializados ya no parecen capaces de volver a la anterior situación de pleno empleo, incluso si su crecimiento económico continúa. Sin embargo, si se contempla la situación a nivel mundial, puede comprobarse que muchas empresas y ramas industriales que han reducido su número de puestos de trabajo en los países centrales del sistema capitalista mundial han creado, simultáneamente, un número superior de puestos de trabajo en los países periféricos, países de mano de obra barata, en muchos casos sometidos a severos regímenes políticos que facilitan aún más la sobreexplotación de la fuerza de trabajo y que, dado su bajo nivel de industrialización, están dispuestos a conceder excepcionales condiciones fiscales y financieras a los inversores procedentes de las economías desarrolladas. Sin embargo, esta industrialización se orienta a la reexportación a los países centrales: los trabajadores del Tercer Mundo son demasiado pobres para ofrecer un mercado de interés. Así, los beneficios y la ,marcha de las empresas durante la crisis han seguido siendo, en muchos casos, más que satisfactorios. De esta forma se traza el cuadro de un nuevo tipo de industrialización de los países en desarrollo, dentro de la tendencia a la constitución de una nueva división internacional del trabajo. que no sería sino una etapa más en un proceso secular de transformación de la división del trabajo en el seno de lo que Wallerstein ha denominado la economía-mundo capitalista. Los autores cuestionan desde esta perspectiva e significado de la actual crisis mundial, presentándola como una mutación en la división internacional del trabajo provocada por los cambios en las condiciones de operación de la economía de las empresas. Folker Frobel, Jürgen Heinrichs y Otto Kreye son colaboradores del Max Planck Institut en Starnberg, República Federal de Alemania.

Teoría del comercio internacional Ricardo Torres Gaytán, 1990 El propósito es subrayar algunos de los principales factores que generaron y siguen generando el complicado proceso del comercio entre los países desarrollados y entre éstos y los de menor desarrollo. Aborda las principales teorías del comercio internacional, cuyo origen se centra en las ideas de los mercantilistas, e incluye un análisis de la balanza de pagos y de los aspectos monetarios más importantes que de ella se derivan.

Imperialismo y comercio internacional Esthela Gutiérrez Garza, 1990-01-01 El crecimiento cero de la economía

mexicana se explica por la política de austeridad impuesta por el gobierno de Miguel de la Madrid. La carga de la deuda externa llegó a representar el 65% del PIB. La inflación amenazó con ser incontrolable, se dispararon las tasas de interés, los créditos se encarecieron, la inversión se contrajo, la capacidad ociosa se incrementó dañando al capital productivo y favoreciendo al capital especulativo. El salario mínimo sufrió una pérdida del 52% de su poder adquisitivo. Pero no todo fue negativo pues gracias a la política de austeridad surgió un amplio frente democrático, nacionalista, antimonetarista y popular.

World Economic Outlook, April 2019 International Monetary Fund. Research Dept., 2019-06-13 After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from

emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US-China trade deal, but they remain slightly more restrictive than in the fall.

América Latina: nuevas relaciones hemisféricas e integración Darío Salinas Figueredo, 2017-11-06 Esta obra busca comprender los procesos políticos actuales de América Latina. Se estudia la relación geopolítica post-guerra fría y las reformulaciones de las políticas de Estados Unidos hacia la región; también se analiza la relación con Rusia y China, y cierra en los procesos de integración, desarrollo y problemática en la globalización capitalista.

El capitalismo dependiente latinoamericano Vania Bambirra, 1999 Resultado de los estudios realizados por el equipo de investigación del Centro de Estudios Socio-Económicos (CESO) de la Universidad de Chile sobre las relaciones de dependencia en América Latina, esta obra contribuye al paso de las cuestiones teóricas generales al estudio de las manifestaciones históricas específicas, tomando como núcleo central la acumulación y reproducción dependientes.

Tecnología y poder Rafael de la Cruz, 1987 Intenta explorar las relaciones que se establecen entre la lógica tecnoeconómica del capitalismo y la estructura de clases. En especial se dirige a comprobar la existencia de las bases materiales de reproducción de una clase social distinta a la burguesía y al proletariado, una clase de trabajadores intelectuales (en particular de los tecnócratas), inscrita en el modo de producción capitalista.

Argentina, Brasil Marcelo Gullo, 2005

La nueva división internacional del trabajo Folker Frobel, Folker Fröbel, Jürgen Heinrichs, Otto Kreye, 1981 La actual crisis mundial es presentada por los autores como una mutación en la división internacional del trabajo provocada por los cambios en las condiciones de operación de la economía de las empresas; esto se ha traducido en un descenso del empleo en los países capitalistas avanzados y en la creación de más puestos de trabajo en los países periféricos, cuya industrialización se orienta a la reexportación.

Análisis y perspectivas de la globalización Ana María Aragonés, 2005

Espacios de comunicación Javier Esteinou Madrid, 1998

El síndrome de la globalización James H. Mittelman, 2002 En este libro, James Mittelman explica la dinámica sistémica y las innumerables consecuencias de la globalización, concentrándose en la interacción existente entre las fuerzas de mercado- orientadas en algunos casos por el estado- y las necesidades de la sociedad. Mittelman revela que la globalización dista mucho de ser un fenómeno unificado; más bien, es un síndrome de procesos y actividades: una serie de ideas y un

marco político. Más específicamente, la globalización está motivada por una división cambiante del trabajo y el poder, manifestada en un nuevo regionalismo e impugnada por movimientos de resistencia incipientes. El autor argumenta que la comprensión profunda de la globalización requiere entender sus dimensiones culturales. Desde esta perspectiva, Mittelman tiene en cuenta la voz de los que resultan afectados por esta tendencia: los que le oponen resistencia y los que resultan perjudicados. El síndrome de la globalización es uno de los primeros libros en presentar un análisis holístico y lo cultural, que une agentes y múltiples estructuras, y que interrelaciona diferentes escenarios locales, regionales y globales. Los descubrimientos de Mittelman se derivan principalmente de los mundos no occidentales. Proporciona un análisis multiregional de Asia oriental, epicentro de la globalización, y África meridional, nodo clave dentro del continente más marginado. La evidencia revela que, no obstante los numerosos beneficios que ofrece a algunos, la globalización se ha convertido en una preocupante correlación de profundas tensiones que han generado toda una serie de escenarios alternativos.

Un Siglo de Devaluaciones Del Peso Mexicano Ricardo Torres Gaytán, 1990-01-01 En un marco en el que el desarrollo está condicionado por las necesidades del área desarrollada se ha sucedido un siglo de devaluaciones de la moneda mexicana, motivo de este análisis que comprende desde los años setenta del siglo xix hasta los setenta del siglo xx. Se trata de una exposición sencilla para un público más amplio que el profesional de la economía, pero ofrece un material valioso en términos de historia de la moneda y de la política monetaria.
