American Home Cooking Tim Miller, 2017-07-01 *American Home Cooking* provides an answer to the question of why, in the face of all the modern technology we have for saving time, Americans still spend time in their kitchens cooking. Americans eat four to five meals per week in a restaurant and buy millions of dollars' worth of convenience foods. Cooking, especially from scratch, is clearly on its way out. However, if this is true, why do we spend so much money on kitchen appliances both large and small? Why are so many cooking shows and cookbooks published each year if so few people actually cook? In *American Home Cooking*, Timothy Miller argues that there are historical reasons behind the reality of American cooking. There are some factors that, over the past two hundred years, have kept us close to our kitchens, while there are other factors that have worked to push us away from our kitchens. At one end of the cooking and eating continuum is preparing meals from scratch: all ingredients are raw and unprocessed and, in extreme cases, grown at the home. On the other end of the spectrum is dining out at a restaurant, where no cooking is done but the family is still fed. All dining experiences exist along this continuum, and Miller considers how American dining has moved along the continuum. He looks

at a number of different groups and trends that have affected the state of the American kitchen, stretching back to the early 1800s. These include food and appliance companies, the restaurant industry, the home economics movement of the early 20th century, and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s. And yet the kitchen is still, most often, the center of the home and the place where most people expect to cook and eat – even if they don't.

Secondary English and Literacy Avril Haworth, Christopher Turner, Margaret Whiteley, 2004-01-31 The authors present a rigorous and informed view of ideas and approaches that is at the same time professionally and practically focused.

Animalities Michael Lundblad, 2017-05-24 New and cutting-edge work in animality studies, human-animal studies, and posthumanism. Representations of animality continue to proliferate in various kinds of literary and cultural texts. This pioneering volume explores the critical interface between animal and animality studies, marking out the terrain in relation to twentieth-century literature and film. The range of texts considered here is intentionally broad, answering questions like, how do contemporary writers such as Amitav Ghosh, Terry Tempest Williams, and Indra Sinha help us to think about not only animals but also humans as animals? What kinds of creatures are being constructed by contemporary artists such as Patricia Piccinini, Alexis Rockman, and Michael Pestel? How do animalities animate such diverse texts as the poetry of two women publishing under the name of a Michael Field, or an early film by Thomas Edison depicting the electrocution of a circus elephant named Topsy? Connecting these issues to fields as diverse as environmental studies and ecocriticism, queer theory, gender studies, feminist theory, illness and disability studies, postcolonial theory, and biopolitics, the volume also raises further questions about disciplinarity itself, while hoping to inspire further work beyond the human in future interdisciplinary scholarship.

Key Features 10 provocative case studies focused on representations and discourses of animals and animality in twentieth- and twenty-first-century literature, art, and film in English. New work from both internationally renowned and emerging figures in the burgeoning fields of animality studies, human-animal studies, and posthumanism, suggesting innovative and significant new directions to explore. Broad introduction to the kinds of questions scholars in the humanities have considered in relation to animals and animality.
