*Richard Neutra* José Vela Castillo, 2003 Revisión de la arquitectura de Richard J. Neutra desde unos presupuestos teóricos que apuntan a la arquitectura como resultado de un proceso de creación natural, entendida tanto en su acepción de perteneciente a la Naturaleza como en aquella otra que habla de una cierta sencillez de la misma.

La experiencia de la arquitectura Steen Eiler Rasmussen, 2004 Este libro trata de cómo percibimos las cosas que nos rodean y, en especial, la arquitectura. Con un lenguaje claro y preciso, el autor va describiendo las sensaciones que experimentamos ante los objetos cotidianos, desde una taza de té hasta una raqueta de tenis, para tratar de explicar así cómo se puede disfrutar mejor de los edificios que configuran nuestro entorno.

**Casa Construction** Michael Gary Devloo, 2008-08-20 Casa Construction aims to teach people in the construction industry the English or Spanish they need to better communicate, and better their construction knowledge. More than an English-Spanish dictionary of construction terms, Casa Construction is a guidebook to understanding residential construction concepts in both English and Spanish. It can be used as both a construction reference manual and a language learning tool. This first volume Casa Construction, Exterior highlights all exterior construction trades involved in home building construction. Construction concepts and processes are explained from the critical planning stages through exterior finish work. The book concludes with important chapters on construction management and construction safety. The book is divided into chapters by construction trades or topics which follow the order of a normal home-building project. Left side pages are written in English while the corresponding right side pages give a direct translation in Spanish. The reader can reference a particular process, task, or word in either English or Spanish and get a clear understanding of the concept in their own language. The reader can then easily view an explanation of the same concept in the unknown language on the page beside it. With this reference format of side-by-side English and Spanish the reader can relate word to word and paragraph to paragraph for each concept explained. Key words, definitions, and useful phrases are provided in each chapter for a quick language learning reference. Photos and diagrams are used to give visual explanations. Web references are included in the text to provide a starting point for additional research on more complex topics. For more information on using this first-of-its-kind construction reference manual, as well as information on additional products, and free online resources, see Casa Construction online at: [www.casaconstructionbook.com](http://www.casaconstructionbook.com)

Casas unifamiliares Christian Schittich,2013-01-07 The private single family house is still very much the preferred choice of home. Yet in recent years there have been many changes not only in the personal situations of the residents, their expectations and desires, but also in the rising costs of energy and raw materials. This has meant that issues such as multi-functionality, the use of innovative building materials or energy-efficient building methods are increasing in significance.

These topical developments have been taken into consideration. The authors introduce floor plan solutions using contemporary projects which bear in mind changing family structures. At the same time, the contributions provide an in-depth introduction to planning single family houses, from the design of the floor plan to useful tips for the realisation. In addition to this fundamental information, 22 projects are documented, providing ideas and inspiration for planners, students and clients. The international selection of projects highlights current trends in planning and designing single family housing and reveals the tried and tested basics.
