The Body Bears the Burden Robert Scaer, 2014-01-03 When *The Body Bears the Burden* made its debut in 2001, it changed the way people thought about trauma, PTSD, and the treatment of chronic stress disorders. Here, clinicians will find detailed, thorough explorations of some of neurobiology's fundamental tenets, the connections between mind, brain, and body, and the many and varied ways that symptoms of traumatic stress become visible to those who know to look for them.

You Don't LOOK Sick! Joy Selak, Steven Overman, 2005-03-08 “Coming to terms with this reality was a lot like accepting

the death of a loved one.” *You Don’t LOOK Sick!: Living Well with Invisible Chronic Illness* chronicles a patient’s true-life accounts and her physician’s compassionate commentary as they take a journey through the three stages of chronic illness—Getting Sick, Being Sick, and Living Well. This resource helps you focus on building a meaningful life that contains illness as opposed to a life of frustration and fear. Designed for patients in at all stages of the chronic illness journey, this book will also be illuminating for caregivers and loved ones. From the book: “I’ve learned that having a chronic illness is not a prison sentence. It does not mean I must spend the rest of my life feeling depressed and angry, locked away from the world inside my little sick box. It does not mean that I am useless and no longer have any gifts to share, but it may mean that I must develop some new ones.” *You Don’t LOOK Sick!* addresses practical aspects of chronic illness, such as: hiring a doctor managing chronic pain coping with grief and the loss of function winning battles with health and disability insurers countering the social bias against the chronically ill recognizing the limitations of chronics illness care and charting a path for change In *You Don’t LOOK Sick!: Living Well with Invisible Chronic Illness*, you will find stories, dialogue, humor, examples, and analogy of the three stages to illustrate a challenging but navigable journey. You will also find suggested reading materials for learning to live well, medical Internet resources, illness-specific Web sites, names and addresses of national associations, and a bibliography of medical books by topic. The short chapters and straightforward language of the book will be helpful for readers who are weary and dispirited. From the authors: “I’ve learned that having a chronic illness is not a prison sentence. It does not mean I must spend the rest of my life feeling depressed and angry, locked away from the world inside my little sick box. It does not mean that I am useless and no longer have any gifts to share, but it may mean that I must develop some new ones.” —Joy H. Selak “My goal is to work with patients so that, like world class athletes, they can perform at their peak capacity. My job is more than giving answers; I must educate, counsel and encourage patients to set goals and implement a personal care program as well as take appropriate medications.” —Dr. Steven Overman The authors are experienced public speakers. If you wish to inquire about their availability to speak to patients or health care professionals, please contact Joy Selak by email at JoyWrites@austin.rr.com.

(Re)Writing War in Contemporary Literature and Culture Cristina Pividori, David Owen, 2024-07-09 (Re)Writing War in Contemporary Literature and Culture: Beyond Post-Memory is an exploration of war narratives through the lens of postmemory, offering a critical re-evaluation of how contemporary literature and cultural products reshape our understanding of past conflicts. This volume presents a rich tapestry of perspectives, drawing from an array of conflicts and incorporating insights from international experts across various disciplines, including contemporary literature, film studies, visual arts, and cultural studies. It critically builds upon and extends Marianne Hirsch's concept of postmemory, engaging with complex themes like the ethical dimensions of war writing, the authenticity of representations, and the creative power of art in reimagining traumatic events. This study not only challenges traditional boundaries in war literature and memory

studies but also resonates with contemporary concerns about societal engagement with violent pasts, making it a significant addition to scholarly discourse and essential reading for those interested in the intersection of history, memory, and literature.

Heal Your PTSD Michele Rosenthal, 2015-09-01 As a teenager, Michele Rosenthal was diagnosed with an illness so rare none of her doctor's had actually seen a case. She recovered, but found as an adult that she was suffering from a storehouse of nightmarish memories from her near-fatal illness. For years she experienced PTSD, until she developed tools that worked to heal her symptoms. In *Heal Your PTSD*, Rosenthal applies the tools and ideas she developed from reclaiming her own life after trauma. As she says, "We're all individual in our traumas, but completely universal in our post-trauma experience. Every trauma survivor needs education, compassion, creativity, ideas, hope, and belief, to name a few." She tackles post trauma identity, the science of the brain and body (as it relates to trauma), common problems and how to resolve them, how to gain (and maintain) momentum, and so much more. She provides readers not only with healing thoughts on each topic, but actionable steps for moving forward with their lives.

In an Unspoken Voice Peter A. Levine, Ph.D., 2012-10-30 Unraveling trauma in the body, brain and mind—a revolution in treatment. Now in 17 languages. In this culmination of his life's work, Peter A. Levine draws on his broad experience as a clinician, a student of comparative brain research, a stress scientist and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body, brain and psyche. *In an Unspoken Voice* is based on the idea that trauma is neither a disease nor a disorder, but rather an injury caused by fright, helplessness and loss that can be healed by engaging our innate capacity to self-regulate high states of arousal and intense emotions. Enriched with a coherent theoretical framework and compelling case examples, the book elegantly blends the latest findings in biology, neuroscience and body-oriented psychotherapy to show that when we bring together animal instinct and reason, we can become more whole human beings.

Running Away From ME Ali Christensen, Mark Bristow, 2012-06-01 Life doesn't have to be over when you are chronically ill, you just have to reinvent yourself and what you do... Fibromyalgia affects between 3-6 million people (of which 90% are women) and up to 17 million people worldwide suffer from CFS/ME. The average timescale for recovery is 7 years. This story is proof that great strides can be made within a year if the right tools are used. This book is for anyone who is suffering from a long term illness, chronic pain, or depression and their families and close friends to offer hope with an optimistic message. The book does not prescribe a miracle cure, but instead explores the journey of the sufferer, and the real life issues that surround long term illness such as money issues, depression, claiming support packages and trying to keep a family together. The book was written during the worst part of the illness and describes in details the emotional and physical feelings that were happening at the time.

Cancer, Trauma & Emotions Brandon LaGreca, 2024-09-04 Could unresolved trauma be the missing piece in understanding cancer? In “Cancer, Trauma & Emotions,” integrative oncology expert and cancer survivor Brandon LaGreca presents a revolutionary approach to understanding cancer by addressing its deep emotional and traumatic roots. Drawing on research in mind-body science, epigenetics, and neuroscience, LaGreca reveals how adverse childhood experiences, unresolved trauma, and the “Type C” personality coalesce to create the conditions for cancer to develop and thrive. He explains the mechanisms by which emotional wounds impact our physiology and gene expression, potentially leading to disease. But this book offers more than just theory—it provides a comprehensive toolkit for healing. LaGreca explores a wide range of evidence-based therapies to resolve trauma and restore emotional well-being, including psychotherapy, EMDR, Somatic Experiencing, energy medicine, meditation, and more. He emphasizes the critical importance of addressing the spiritual dimension of healing and tapping into the wisdom of the heart. The book includes powerful patient stories and practical exercises to help readers apply these healing strategies. Whether you are a cancer patient seeking a more holistic approach to treatment, a survivor looking to prevent recurrence, or a healthcare practitioner wanting to better support your patients, this groundbreaking book offers invaluable insights and strategies. By illuminating the deep connections between our emotions, life experiences, and physical health, “Cancer, Trauma & Emotions” provides a roadmap for true healing and empowerment. This book will change the way you think about cancer—and life itself.

Violent Trauma, Culture, and Power Michelle Walsh, 2017-02-16 This book is an interdisciplinary exploration of the intertwining impact of violent trauma, culture, and power through case studies of two ministries serving in different demographic contexts within the United States. Mass shootings continue to rise in the United States, including in religious and school contexts, and the U.S. also is ground zero for the now international Black Lives Matter movement. The author shows how all forms of violent trauma impact more than individuals –devastating communal relationships and practices of religious or spiritual meaning-making in the aftermath, and assesses how these impacts differ according to lived experiences with culture and power. Looking at the two ministries, an urban grassroots lay ministry organization that serves surviving family members in the aftermath of homicide, and a denominational ministry that served a church in the aftermath of a political and religiously motivated shooting, the author develops trauma-specific interdisciplinary tools for lived religion studies. This book powerfully utilizes an intersectional lens to highlight the inter-connections to be found for those working in faith communities, as well as mental health. Walsh provides the reader with an opportunity to explore and develop theoretical and practice perspectives that include: race and ethnicity, religion and spirituality, social class and ability, sexual orientation, immigration and refugee status, and explores the impact that oppression and discrimination have on our communities and society. I highly recommend this book for those who are engaged in working to combat domination at the local, national and global levels. - Gary Bailey, Simmons College, USA

Healing and Peacebuilding after War Julianne Funk,Nancy Good,Marie E. Berry,2020-05-27 This book brings together multiple perspectives to examine the strengths and limitations of efforts to promote healing and peacebuilding after war, focusing on the aftermath of the traumatic armed conflict in Bosnia and Herzegovina. This book begins with a simple premise: trauma that is not transformed is transferred. Drawing on multidisciplinary insights from academics, peace practitioners and trauma experts, this book examines the limitations of our current strategies for promoting healing and peacebuilding after war while offering inroads into best practices to prevent future violence through psychosocial trauma recovery and the healing of memories. The contributions create a conversation that allows readers to critically rethink the deeper roots and mechanisms of trauma created by the war. Collectively, the authors provide strategic recommendations to policymakers, peace practitioners, donors and international organizations engaged in work in Bosnia and Herzegovina - strategies that can be applied to other countries rebuilding after war. This volume will be of much interest to students of conflict resolution, peacebuilding, social psychology, Balkan politics and International Relations in general.
