Influence of FinTech on Management Transformation Sghari, Amira, Mezghani, Karim, 2020-11-27 Digital financial services are starting to become increasingly popular with consumers, thereby fostering a favorable climate for digital entrepreneurship: mobile payment, Blockchain, etc. Research trying to understand and explain this phenomenon focuses on FinTech. Some scholars regard “FinTech” as financial innovations that upset the market while others view them as startups, based on financial innovations, that have changed the ecosystem. There are many open-ended questions about FinTech’s business models, how it relates to blockchain, and whether this is a collaborative relationship between traditional financial players or a competitive relationship. Noting the lack of research work on these themes, this book attempts to shed light on this area to bridge the gap between the discourse of practitioners and the literature. *Influence of FinTech on Management Transformation* is an innovative reference book that defines FinTech and its ecosystem as well as concepts in relation to management transformations caused by FinTech and shares new theoretical and empirical frameworks, useful experiences, and best practices to deal with new technological changes. The chapters are divided into three interrelated sections: “Insights From the Blockchain Technology”; “Managerial and Cultural Transformations in the Era of FinTech”; and “Empirical Experiences and Applications.” This book is a valuable reference tool for financial planners/advisors, managers, accountants, financial analysts, compliance experts, practitioners, researchers, academicians, and students interested in the influence of FinTech on management transformation.

People Managing Forests Carol J.P Colfer,Yvonne Byron,2010-09-30 How do we extend the 'conservation ethic' to include the cultural links between local populations and their physical environments? Can considerations of human capital be incorporated into the definition and measurement of sustainability in managed forests? Can forests be managed in a manner that fulfills traditional goals for ecological integrity while also addressing the well-being of its human residents? In this groundbreaking work, an international team of investigators apply a diverse range of social science methods to focus on the interests of the stakeholders living in the most intimate proximity to managed forests. Using examples from North America, Asia, Africa, and Latin America, they explore the overlapping systems that characterize the management of tropical forests. *People Managing Forests* builds on criteria and indicators first tested by the editors and their colleagues in the mid-1990s. The researchers address topics such as intergenerational access to resources, gender relations and forest utilization, and equity in both forest-rich and forest-poor contexts.
