Agua, cultura y sociedad en México Patricia Ávila García, 2002

Hidráulica agraria y sociedad feudal Josep Torró Abad, Enric Guinot Rodríguez, 2015-05-16 L'estudi de les pràctiques d'hidráulica agrària desenvolupades durant l'Edat Mitjana ha mostrat que no ens trobem davant fenòmens purament «etnogràfics» o solucions universals sense valor històric. En aquesta obra col·lectiva s'ofereixen, d'una banda, treballs representatius de regions on s'inicia l'expansió agrària en el marc de la cristallització del sistema feudal (Catalunya Vella, Lluçanoves, Borgonya) i, per un altre, diversos estudis sobre les transformacions produïdes en territori conquistats durant els segles XII (regió de Terol, vall del Segre), XIII (regne de València) i finals del XV (regne de Granada). A través de tots ells s'examina la diversitat de mitjans geogràfics (humits i àrids) on es despleguen tècniques hidràuliques aplicades al cultiu, els prats i la molinaria.

La nueva generación de derechos humanos. Origen y justificación María Eugenia Rodríguez Palop, 2018-06-07 Sobre la denominada “tercera generación de derechos humanos” se han vertido en los últimos años una gran cantidad de críticas y acotaciones. Una generación compuesta, principalmente, por el derecho al medio ambiente, al desarrollo, a la paz, a la autodeterminación de los pueblos y al patrimonio común de la humanidad, y orientada a la protección de intereses colectivos de carácter planetario. En la mayor parte de las ocasiones, estas reivindicaciones han generado un rechazo considerable, estimulado por el intrincado debate conceptual que siempre acompaña al discurso de los derechos, y, sobre todo, por las dificultades que presenta el análisis de su estructura interna y de su eventual articulación jurídica. Este libro intenta dibujar una mapa que nos ayude a comprender el horizonte que se abre con estos nuevos derechos, analizando el contexto histórico en el que vieron la luz, su titularidad, objeto de protección y fundamento moral, y a fin de proponer, finalmente, el modelo político y jurídico en el que podrían encontrar acomodo. Todo ello bajo el presupuesto de que hay buenas razones para dinamizar una discusión, siempre pospuesta, pero que, desde hace décadas muchos consideran urgente.

Crisis institucional del agua Alejandro Vergara Blanco, 2015 Este sólido ensayo jurídico surge desde la práctica del ejercicio del Derecho de Aguas y se enfoca en las políticas públicas, en el contexto de una creciente preocupación de políticos y autoridades administrativas por este tema. Está dirigido a todos los profesionales vinculados al uso y gestión del agua. A través de una sencilla descripción institucional y jurídica, el autor expone sus ideas sobre la administración, gestión y justicia de los recursos hídricos, polemiza y propone cambios, a la vez que sintetiza sus ideas jurídicas, poniendo énfasis en la descripción de las dificultades que observa en esta materia.

Nociones de hidrogeología para ambientólogos Antonio Pulido Bosch, 2007-11-13 Nociones de Hidrogeología para Ambientólogos ha sido concebida como una obra para ayudar a los estudiantes de Ciencias Ambientales a comprender mejor el complejo y apasionante mundo de las aguas subterráneas en su vertiente de recurso a conservar y a utilizar de manera adecuada; de agente erosivo; y de soporte de vida, posiblemente el aspecto que más nos puede interesar en este contexto. Pretende ser una obra que permita al alumno seguir con aprovechamiento las enseñanzas de la disciplina en estos estudios.

Agua y ciudades Judith Domínguez, Carlos López, 2023-07-31 El agua y las ciudades son una preocupación obligada en nuestros tiempos. A medida que las ciudades crecen, demandan más recursos, energía y agua. México es un país predominantemente urbano con dinámicas económicas diversas, pero, en todas ellas, la gestión del agua representa un gran desafío ambiental, económico y social. Esta obra colectiva es una reflexión de investigadores, profesores y egresados del Centro de Estudios Demográficos, Urbanos y Ambientales de El Colegio de México que aborda diversas facetas de la

problemática hídrica urbana. Es producto de un diálogo multidisciplinario sobre la complejidad de este fenómeno, que busca aportar orientaciones para superar la crisis hídrica desde el punto de vista teórico-conceptual y de la gestión. En la obra se tratan temas urgentes y de actualidad, como la seguridad hídrica, el derecho humano al agua, la compleja administración y gobernanza de los sistemas de agua urbana, sus nexos con las dinámicas económica y demográfica en México, las demandas de agua, sus aspectos económicos o los servicios ambientales que nos proporcionan los ríos urbanos.

Agua, el futuro ineludible Boris Graizbord, Jesús Arroyo Alejandro, 2019 A viejos problemas, como la gran proporción de personas sin acceso al agua ni al saneamiento, o el aumento de la tierra de riego y su productividad, se han sumado otros nuevos, como acuíferos sobreexplotados, exportación de agua a través del intercambio comercial de frutas y hortalizas, urbanización y prácticas agrícolas que afectan las reservas de los acuíferos, y la cada vez más pobre calidad de las aguas superficiales. En este libro se sugiere que el problema del agua tiene cuatro facetas interrelacionadas: provisión, y saneamiento, agua como insumo natural, contaminación de embalses y riesgos causados por fenómenos hidrometeorológicos extremos, como sequías e inundaciones. Problemas que agravan el cambio climático y que primero debemos frenar, para luego adaptarnos a las nuevas condiciones. Todo ello aderezado por los conflictos que suscita la búsqueda de soluciones. Desde lo local hasta lo global, solucionar estos problemas, así como las fallas del mercado y de administración del agua y de la preservación del medio natural, se ha vuelto una necesidad ineludible, inevitable e impostergable. El libro es un amplio recorrido por la temática del agua, un intento relativamente profundo y riguroso de mostrar la necesidad de enfrentar el enorme reto de mantener el recurso hídrico en México como el patrimonio que es. Aborda tres temas generales: futuros del agua, donde se identifican retos y oportunidades; la gestión del agua, con varios ejemplos en distintos contextos, y lo relacionado con los problemas de administración, con trabajos que sugieren soluciones normativas y técnico-operativas. Esta compilación es el resultado de invitar a expertos con el fin de imaginar posibles situaciones y escudriñar en la incertidumbre de un futuro del agua que está por llegar, si bien para algunos ya nos ha rebasado. Los autores son especialistas en sus temas, con imaginación transdisciplinaria y capacidad analítica, lo que garantiza la calidad de los trabajos aquí publicados.-- Cover page 4.

Creación vs. Evolución, ¿Qué fue antes de lo que Conocemos? Frederick Guttman, Esta tesis expone estudios científicos de grandes eminencias, desde el área de las matemáticas, la microbiología, la física, la química, la biología, la paleontología, la arqueología y la antropología, entre otras, para refutar los planteamientos de la Teoría de la Evolución. Incluye la investigación de los orígenes masónicos del darwinismo, cuyo fin es una guerra antirreligiosa, no de carácter filantrópico. Asimismo constata diversas manipulaciones científicas para promover el evolucionismo como una filosofía empírica aceptada sin abertura a discusión académica o pública. Podrá encontrar en todas estas investigaciones y resultados realizados que hay un complot perpetuado por la francmasonería para remover la ideología abrahámico-bíblica de la mentalidad occidental con fines de introducir un pensamiento anárquico, apático, insensible y desesperanzador en la sociedad. Este libro no tiene por finalidad promover proselitismo o religión, sino desvelar las verdaderas intenciones de los planteamientos evolutivos del darwinismo, y la conspiración que se ha perpetuado por parte de las altas esferas – adeptos de la masonería y otras sociedades secretas muy poderosas – para destruir los valores humanos y todo conocimiento sobre la verdad del origen de la vida y del hombre. Finalmente, quedará la evidencia de la plausibilidad de la Teoría de la Panspermia Dirigida como verdadero origen de la vida, la intervención “inteligente” desde fuera de nuestro planeta, de manera “deliberada”.
