

Happiness In The Darkest Of Times

Jaime Villalovos

Defenses Against the Dark Arts John S. Nelson, 2021-01-11 As the publishing sensation of the last half-century, Harry Potter dominates early education in politics. Children, tweens, teens, and adults love it; and most students come to college knowing at least some of it. This dark fantasy analyzes politics in strikingly practical and institutional ways. Like ancient Sophists, modern Machiavellians, and postmodern Nietzscheans, the Potter books treat politics as dark arts and our defenses against them. The Potter saga overflows with drama, humor, and insight into ours as dark times of terrible troubles. These reach from racism, sexism, and specism to fascism, terrorism, autocracy, and worse. Harry and his friends respond with detailed, entertaining takes on many ideologies, movements, and styles of current politics. Defenses Against the Dark Arts argues that Potter performances of magic show us how and why to leap into political action. This includes the high politics of governments and elections, and especially the everyday politics of families, schools, businesses, media, and popular cultures. It explores Potter versions of idealism, realism, feminism, and environmentalism. It clarifies Potter accounts of bureaucracy, nationalism, and patronage. And it analyzes Potter resistance through existentialism and anarchism. The emphasis is on learning to face and defend against dark arts in dark times.

Operation Happiness Kristi Ling, 2016-03-01 In *Operation Happiness*, happiness strategist and life coach Kristi Ling teaches you how to create immediate, positive shifts in your life by proving that happiness is a skill that can be cultivated, learned, and mastered--much like playing an instrument. After experiencing multiple devastating events, Ling spent years studying the science of happiness and focused on identifying and testing specific emotional support tools. During this process, she discovered something that goes against everything we've been lead to believe about happiness: it isn't just something you feel; it's something you do. Based on this discovery, Ling narrowed down the road to happiness to three powerful steps: Change Your View, Change Your Mornings, and create new habits, the foundational principles for *Operation Happiness*. Part memoir and part how-to, *Operation Happiness* combines compelling personal stories, inspiring perspective shifts, and big ah-ha moments with specific how-to's and clear actionable steps to help you create a solid foundation for sustainable happiness that will propel you into a new, light-filled way of living.

Watching Movies with Christian Eyes Too Susan Maluschka, 2021-11-19 Being a teenager is hard work. Thanks to a combination of hormone overload, peer pressure, and social beliefs, teens and even preteens often feel misunderstood or alienated and are treated as unimportant or an outcast. These feelings are a combination of many things but generally come down to trying to figure out your place in the world from under your parent's thumb. Sports and video games sometimes help you escape the pressures of life for a little while. but they are not solutions. You need answers that can help you get a clearer picture of where you're going in life and what you want to be like when you get there. Through movies, we can see the best and worst in ourselves. These studies will help you as a young adult (ages eleven to sixteen) to see beyond the movie's storyline and into the heart of the feelings and issues the characters are dealing with. If you haven't had to deal with some of these issues yet, hang on. They're coming. You need to give serious thought now about how you will choose to deal with these issues when they do come up. No one can do it for you. Going through these questions is a good way to get started thinking. The world is ever-changing, but we have the one thing that will never change--God's Word. Living in this world can be rough, but you can be the one to make it better. Not all of the movies are rated to be seen by someone your age, but they don't have to be. You don't have to see the movies to do this study. The questions will guide you through the scenes so you can focus on the issues without dealing with the emotions that accompany visual images. Despite this, some topics may still be too sensitive for some people. For this reason, movies that focus solely on death or evil are noted with an asterisk on the

Contents page because viewer discretion is advised.

The Uncertain Image Ulrik Ekman, Daniela Agostinho, Nanna Bonde Thylstrup, Kristin Veel, 2020-04-28 Citizens of networked societies are almost incessantly accompanied by ecologies of images. These ecologies of still and moving images present a paradox of uncertainties emerging along with certainties. Images appear more certain as the technical capacities that render them visible increase. At the same time, images are touched by more uncertainty as their numbers, manipulabilities, and contingencies multiply. With the emergence of big data, the image is becoming a dominant vehicle for the construction and presentation of the truth of data. Images present themselves as so many promises of the certainty, predictability, and intelligibility offered by data. The focus of this book is twofold. It analyses the kinds of images appearing today, showing how they are marked by a return to modern photographic emphases on high resolution, clarity, and realistic representation. Secondly, it discusses the ways in which the uncertainty of images is increasingly underscored within such reiterated emphases on allegedly certain visual truths. This often involves renewed encounters with noise, grain, glitch, blur, vagueness, and indistinctness. This book provides the reader with an intriguing transdisciplinary investigation of the uncertainly certain relation between the cultural imagination and the techno-aesthetic regime of big data and ubiquitous computing. This book was originally published as a special issue of *Digital Creativity*.

The Mind Gateway Lucy Mambu, 2020-05-29 Life is a battleground. Every single one of us will face difficult times. It is war! And the war is intense. Challenges and hurdles are part of everyday life. Problems and difficulties are companions of every human being. It is a fact that, as long as we are walking through this journey called life, we are bound to face challenges and fight battles. It is the fight to win the battles, overcome the challenges and crossover the obstacles that leave us journeying through life with a dysfunctional and skewed mindset. When we encounter painful experiences, the pain sinks deep into the brain. When this happens, the painful memories outweigh the happy memories in the vortex of the mind. This book is written to help you know that through the transformation of the mind, you have the power in your hands to turn your circumstances around for your good. It's all in the mind and our mindset is everything. Our brains are programmed to think in a certain way and we as human beings have the power to reprogram our mind to think the way we want it to think, break out of mental imprisonment, win the battles of the mind and ultimately become success conscious.
