Titration in Nonaqueous Solvents Huber Walter,2012-12-02 Titrations in Nonaqueous Solvents discuss the theory, practice, and data on acidic and basic strength of nonaqueous solvents. This book is organized into three parts encompassing six chapters. The first part considers the general principles of acids and bases and methods of end-point determination. This part also covers the fundamentals, advantages, and limitations of titration instruments, such as potentiometers, burets, titration vessels, and electrodes. The classification of titration solvents according to their functions as color indicators and titrant solutions is provided in this part. The remaining parts describe the analytical procedures for acidity and basicity of nonaqueous solvents. These parts also provide a tabulated data on the acidic and basic strengths, stability, and dissociation constants of various titration solvents. Analytical chemists, and analytical chemistry teachers and students will find this book invaluable.

Amino Acids, Peptides and Proteins G. C. Barrett,J. S. Davies,2002 In an ever-increasing domain of activity Amino Acids Peptides and Proteins provides an annual compilation of the world's research effort into this important area of

biological chemistry. Volume 33 provides a review of literature published during 2000. Comprising a comprehensive review of significant developments at this biology/chemistry interface each volume opens with an overview of amino acids and their applications. Work on peptides is reviewed over several chapters ranging from current trends in their synthesis and conformational and structural analysis to peptidomimetics and the discovery of peptide-related molecules in nature. The application of advanced techniques in structural elucidation is incorporated into all chapters whilst periodic chapters on metal complexes of amino acids peptides and beta-lactams extend the scope of coverage. Efficient searching of specialist topics is facilitated by the sub-division of chapters into discrete subject areas allowing annual trends to be monitored. All researchers in the pharmaceutical and allied industries and at the biology/chemistry interface in academia will find this an indispensable reference source.
