River.Space.Design Martin Prominski,Antje Stokman,Daniel Stimberg,Hinnerk Voermanek,Susanne Zeller,Katarina Bajc,2017-05-22 Urban riverbanks are attractive locations and highly prized recreational environments. However, they must meet the requirements of flood control, open space design and ecology at the same time, often a challenging task for the designer. This book is the product of extensive research that identified some 60 best-practice examples and subjected them to a comparative analysis. The result is a systematic catalog of effective strategies and innovative design tools that provides readers with an inspiring overview of the broad spectrum of design possibilities for river spaces. Each project is illustrated with photographs taken especially for the book and each design strategy and tool is explained by diagrams. This revised edition introduces ten new case studies chiefly from North America.

River.Space.Design Martin Prominski,Antje Stokman,Daniel Stimberg,Hinnerk Voermanek,Susanne Zeller,Katarina Bajc,Nengshi Zheng,2023-03-20 Urban riverbanks are attractive locations and highly prized recreational environments. However, they must meet the requirements of flood control, open space design and ecology at the same time, often a challenging task for the designer in very confined spaces. The book, the result of a study lasting several years, subjects more than 60 exemplary projects to a comparative analysis. The result is a systematic catalogue of strategies and innovative design tools. The designer and planner thus obtains an overview of the range of design possibilities. Eight new case studies from China, Italy, New Zealand, the Netherlands, Germany and Switzerland were selected and added for the enlarged edition of this reference work on riverbank design.

Innovating Strategies and Solutions for Urban Performance and Regeneration Cristina Piselli,Haşim Altan,Osman Balaban,Peleg Kremer,2022-07-01 This book focuses on enhancing urban regeneration performance and strategies that pave the way toward sustainable urban development models and solutions. The book at hand thoroughly examines the latest studies on the regeneration of urban areas and attempts at alleviating the negative impacts associated with high population density and urban heat effects. It gathers contributions that combine theoretical reflections and international case studies on urban regeneration and transformation with the single goal of tackling existing social and economic imbalances and developing new solutions. The primary audience of this book will be from the field of architecture and urban planning, offering new insights on how to address the myriad of problems that our cities are facing.

River.Space.Design Martin Prominski,Antje Stokman,Daniel Stimberg,Hinnerk Voermanek,Susanne Zeller,2012-12-13

Urban riverbanks are attractive locations and highly prized recreational environments. The designs of urban river landscapes must fulfill a broad range of requirements: flood control, open space design, and ecology are as a rule the three dominant themes, and they must often be reconciled within a very restricted space. The river must be understood as a process: governed by changing water levels, shifting seasons, erosion, and sedimentation, the river environment is not a static entity but constantly changing—the design must be flexible and take this into account. This book is the product of a multi-year study that subjected more than fifty Western European projects to a comparative analysis. The result is a systematic catalog of effective strategies and innovative design elements. First, designers and planners are given an overview of the broad and varied spectrum of design possibilities. The book's process-oriented approach is especially helpful where the focus is on long-term, sustainable measures. The publication consists of two linked volumes that enable the reader to consult the systematic catalog and the case study section side by side. The easy-to-navigate structure and an extensive glossary provide further guidance, while the work's highly distinctive design makes it visually appealing as well and invites the reader to leaf through and explore it.

Food Urbanism Craig Verzone,Cristina Woods,2021-07-05

With an increasing interest in quality of nutrition and health, urban food production has begun to occur inside the growing cities worldwide and risks to compete with other urban needs. The book introduces typologies, tools, evaluation methods and strategies, and shows the practical applications of the methods. Multiple projects illustrate solutions that augment quality via the insertion of food production entities into the urban realm.

River, Space, Design Martin Prominski,Antje Stokman,Daniel Stimberg,Susanne Zeller,2012

River. Space. Design is a systematically organised reference book for the design and planning of river spaces. Urban river landscapes need to unite a broad range of requirements - most notably flood control, ecological considerations and open space design - often within tight space constraints. Taking a processoriented approach, this book offers concrete guidelines for sustainable longterm interventions. Arranged in two volumes, this book contains a comparative analysis of more than 50 successful projects alongside rivers and streams in Europe, and dissects them into their individual design elements. The result is a catalogue of effective design strategies and tools that provides readers with an attractive and inspiring overview of the broad and varied spectrum of design possibilities for river spaces. Each project is illustrated with photographes taken especially for the book and each principle is illustrated with explanatory diagrams. The book's interdisciplinary structure is of interest to landscape architects, architects, engineers, urban planners and hydrologists alike.

Cambridge Global English Stage 8 Coursebook with Audio CD Chris Barker,Libby Mitchell,2014-05-22

Cambridge Global English Stages 7-9 follow the Cambridge Lower Secondary English as a Second Language (ESL) Curriculum Framework.

Coursebook 8 is organised into eighteen thematic units of study based on the Cambridge International English Scheme of Work for Stage 8. The topics and situations in Cambridge Global English have been selected to reflect this diversity and encourage learning about each other's lives through the medium of English. It presents realistic listening, speaking, reading and writing tasks, as well as end-of-unit projects similar to those students might encounter in the context of a first-language school. After every other unit, there is a literature spread, featuring authentic texts from a variety of sources. CEFR Level - B1

Artistic Approaches to Cultural Mapping Nancy Duxbury, W.F. Garrett-Petts, Alys Longley, 2018-09-03 Making space for imagination can shift research and community planning from a reflective stance to a future forming orientation and practice. Cultural mapping is an emerging discourse of collaborative, community-based inquiry and advocacy. This book looks at artistic approaches to cultural mapping, focusing on imaginative cartography. It emphasizes the importance of creative process that engages with the felt sense of community experiences, an element often missing from conventional mapping practices. International artistic contributions in this book reveal the creative research practices and languages of artists, a prerequisite to understanding the multi-modal interface of cultural mapping. The book examines how contemporary artistic approaches can challenge conventional asset mapping by animating and honouring the local, giving voice and definition to the vernacular, or recognizing the notion of place as inhabited by story and history. It explores the processes of seeing and listening and the importance of the aesthetic as a key component of community self-expression and self-representation. Innovative contributions in this book champion inclusion and experimentation, expose unacknowledged power relations, and catalyze identity formation, through multiple modes of artistic representation and performance. It will be a valuable resource for individuals involved with creative research methods, performance, and cultural mapping as well as social and urban planning.

The SketchUp Workflow for Architecture Michael Brightman, 2018-06-25 A guide for leveraging SketchUp for any project size, type, or style. New construction or renovation. The revised and updated second edition of The SketchUp Workflow for Architecture offers guidelines for taking SketchUp to the next level in order to incorporate it into every phase of the architectural design process. The text walks through each step of the SketchUp process from the early stages of schematic design and model organization for both renovation and new construction projects to final documentation and shows how to maximize the LayOut toolset for drafting and presentations. Written by a noted expert in the field, the text is

filled with tips and techniques to access the power of SketchUp and its related suite of tools. The book presents a flexible workflow method that helps to make common design tasks easier and gives users the information needed to incorporate varying degrees of SketchUp into their design process. Filled with best practices for organizing projects and drafting schematics, this resource also includes suggestions for working with LayOut, an underused but valuable component of SketchUp Pro. In addition, tutorial videos compliment the text and clearly demonstrate more advanced methods. This important text: Presents intermediate and advanced techniques for architects who want to use SketchUp in all stages of the design process Includes in-depth explanations on using the LayOut tool set that contains example plans, details, sections, presentations, and other information Updates the first edition to reflect the changes to SketchUp 2018 and the core functionalities, menus, tools, inferences, arc tools, reporting, and much more Written by a SketchUp authorized trainer who has an active online platform and extensive connections within the SketchUp community Contains accompanying tutorial videos that demonstrate some of the more advanced SketchUp tips and tricks Written for professional architects, as well as professionals in interior design and landscape architecture, The SketchUp Workflow for Architecture offers a revised and updated resource for using SketchUp in all aspects of the architectural design process.

Experimental Museology Marianne Achiam, Michael Haldrup, Kirsten Drotner, 2021-06-28 Experimental Museology scrutinizes innovative endeavours to transform museum interactions with the world. Analysing cutting-edge cases from around the globe, the volume demonstrates how museums can design, apply and assess new modes of audience engagement and participation. Written by an interdisciplinary group of researchers and research-led professionals, the book argues that museum transformations must be focused on conceptualizing and documenting the everyday challenges and choices facing museums, especially in relation to wider social, political and economic ramifications. In order to illuminate the complexity of these challenges, the volume is structured into three related key dimensions of museum practice - namely institutions, representations and users. Each chapter is based on a curatorial design proposed and performed in collaboration between university-based academics and a museum. Taken together, the chapters provide insights into a diversity of geographical contexts, fields and museums, thus building a comprehensive and reflexive repository of design practices and formative experiments that can help strengthen future museum research and design. Experimental Museology will be of great value to academics and students in the fields of museum, gallery and heritage studies, as well as architecture, design, communication and cultural studies. It will also be of interest to museum professionals and anyone else who is interested in learning more about experimentation and design as resources in museums.
