Joyce G. Saricks

Anne McCaffrey Anne McCaffrey, 1980

Dragonquest Anne McCaffrey, 2002-02-26 FINALIST FOR THE LOCUS AWARD • The second novel in the legendary and magical New York Times bestselling series featuring dragons, adventure, romance, and heroism, from Hugo and Nebula Award-winning author Anne McCaffrey “Pern was one of the first fantasy worlds I fell into, and I am forever grateful.”—Leigh Bardugo, author of Ninth House Lessa and her golden queen dragon may have given their world a fighting chance against the deadly Thread by bringing several hundred dragons and their riders forward in time, but this has also caused other problems to arise. The Oldtimers, as they are known, are having a difficult time adjusting to their more modern world, and tensions are rising. Worse, Threadfall is becoming more unpredictable, which makes it harder to combat. Inspired by Lessa’s example, brown dragonrider F’nor hatches a bold plan to cut through these growing tensions by destroying the Thread at its source: the mysterious Red Star. But his quest to go where no man—or dragon—has gone before will risk not only his life, but the heart of a woman who has already lost far more than she can bear. Don’t miss the original trilogy from Anne McCaffrey’s beloved Dragonriders of Pern series: DRAGONFLIGHT • DRAGONQUEST • THE WHITE DRAGON

Dragonseye Anne McCaffrey, 1997-12-27 In Anne McCaffrey’s New York Times bestselling *Dragonseye*, join Weyrleaders, Holders, and Craftmasters in the creation of the legendary Star Stones and the teaching ballads of Pern! It’s been two hundred years since the deadly Thread fell like rain upon Pern, devouring everything in its path. No one alive remembers that first horrific onslaught and no one believes in its return—except for the dragonriders. For two centuries they have been practicing and training, passing down from generation to generation the formidable Threadfighting techniques. Now the ominous signs are appearing: the violent winter storms and volcanic eruptions that are said to herald the approach of the Red Star and its lethal spawn. But one stubborn Lord Holder, Chalkin of Bitra, refuses to believe—and that disbelief could spell disaster. So as the dragonriders desperately train to face a terrifying enemy, they and the other Lord Holders must find a way to deal with Chalkin—before history repeats itself and unleashes its virulence on all of Pern. . . .

The Mind Pool Charles Sheffield,1993 In the 23rd century, out of all the races of the galaxy, only humanity has discovered the secret of travel between the stars. When a threat to all life arises from non-living cyborgs, suddenly the peculiar human virtues of valor and stubbornness make the despised Earthlings the saviors of all.

Touched By The Gods Lawrence Watt-Evans,1998-12-15 When the baby Malledd is born to an ordinary family in a small country town, the oracles name him the true chosen Champion of the Domdur Empire. Should the Empire find itself at war, Malledd will be the one to lead them to victory, by the gods' decree. But all has been at peace for generations, and Malledd disbelieves the prophecy. He is, he says, just an ordinary smith, and goes about his life being just that. Now, in the dark hills of the Eastern lands, a centuries-old promise has come to its end, and an army of undead soldiers led by a dark magician threatens to topple the Empire. An Imperial Army is quickly gathered, and the Champion sought for. Will he answer his call? Or will the Empire fall because of one man's refusal to be anything other than normal?

Gateways to Forever Mike Ashley, 2007-04-01 This third volume in Mike Ashley's four-volume study of the science-fiction magazines focuses on the turbulent years of the 1970s, when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science-fiction magazines. Not only were they struggling to survive within the economic climate, they also had to cope with the death of the father of modern science fiction, John W. Campbell, Jr., while facing new and potentially threatening opposition. The market for science fiction diversified as never before, with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science fiction in college, the start of role-playing gaming magazines, underground and adult comics and, with the success of *Star Wars*, media magazines. This volume explores how the traditional science-fiction magazines coped with this, from the death of Campbell to the start of the major popular science magazine *Omni* and the first dreams of the Internet.

Matters of Care María Puig de la Bellacasa, 2017-03-21 To care can feel good, or it can feel bad. It can do good, it can oppress. But what is care? A moral obligation? A burden? A joy? Is it only human? In *Matters of Care*, María Puig de la Bellacasa presents a powerful challenge to conventional notions of care, exploring its significance as an ethical and political obligation for thinking in the more than human worlds of technoscience and naturecultures. *Matters of Care* contests the view that care is something only humans do, and argues for extending to non-humans the consideration of agencies and communities that make the living web of care by considering how care circulates in the natural world. The first of the book's two parts, "Knowledge Politics," defines the motivations for expanding the ethico-political meanings of care, focusing on discussions in science and technology that engage with sociotechnical assemblages and objects as lively, politically charged "things." The second part, "Speculative Ethics in Antiecollogical Times," considers everyday ecologies of sustaining and perpetuating life for their potential to transform our entrenched relations to natural worlds as "resources." From the ethics and politics of care to experiential research on care to feminist science and technology studies, *Matters of Care* is a singular contribution to an emerging interdisciplinary debate that expands agency beyond the human to ask how our understandings of care must shift if we broaden the world.
