Decentralizing Education in Transition Societies Ariel Fiszbein, 2001-01-01 This book is about education system reform in Central and Eastern Europe, with emphasis on decentralization and management. In the past, local authorities served as implementation arms of the central ministry, while finance and decision-making were controlled by the central government, leaving local communities with little influence. New education laws in most countries of the region have altered this balance.

A moderate approach may be the least disruptive short-term solution for societies undergoing socioeconomic transition. In 1997 the World Bank Institute participated in a research project to study intergovernmental roles in the delivery of education services in the Czech Republic, Hungary, Poland, Albania, Bulgaria, and Romania. Each country assembled a research team of academics, educators, and policy advisors led by an education specialist. Each team produced a report, which was discussed and revised during four information-sharing seminars, and they are presented here. The challenge these countries face is how to develop new institutions that can effectively enlist state, civil-society, and private-sector resources to achieve educational goals. This book should be of interest to educators and other readers interested in Central and Eastern European area studies. Its multidisciplinary methodology will also provide useful insights to development policymakers in other sectors. (RT)

How Autism is Reshaping Special Education Mark K. Claypool, John M. McLaughlin, 2017-02-08 Special education in the United States is based on the concept of access—public schools are open to all children. But access is no longer a sufficient foundation. Approaches and accommodations that lead to academic success are increasingly demanded for those with learning disabilities. Functional, independent-living, and employable skills are requisite, but rare, for those with serious handicapping conditions. Since the last reauthorization of the Individuals with Disabilities Act, four events have transpired that will have a dramatic impact on the next iteration of the federal law: the increase in the number of children diagnosed

with autism, the rise of applied behavior analysis, the birth of social media, and the reality of unbundling. In *How Autism Is Reshaping Special Education: The Unbundling of IDEA*, Claypool and McLaughlin explore the effect of these events on a special education process burdened by regulation, where advances in the behavioral sciences and neurosciences blur the lines between education and medicine, and where social media fosters aggressive advocacy for specific disabilities. 2018 International Book Awards: Finalist Education/Academic 2018 Next Generation Indie Book Awards: Finalist Education/Academic (Non-Fiction) 2017 Best Book Awards: Finalist Education/Academic

NOAA's Education Program National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee for the Review of the NOAA Education Program, 2010-07-23 There is a national need to educate the public about the ocean, coastal resources, atmosphere and climate. The National Oceanic and Atmospheric Administration (NOAA), the agency responsible for understanding and predicting changes in the Earth's environment and conserving and managing coastal and marine resources to meet the nation's economic, social and environmental needs, has a broad mandate to engage and coordinate education initiatives on these topics. Since its creation in 1970, the NOAA has supported a variety of education projects that cover a range of topics related to the agency's scientific and stewardship mission. NOAA uses formal and informal learning environments to enhance understanding of science, technology, engineering and mathematics (STEM) and to advance environmental education. The work of this agency overlaps and complements the missions of other federal agencies, institutions of higher education, private and nonprofit organizations. Coordination among these agencies and organizations has been challenging. Limited education resources and the inherently global nature of NOAA's mission make strategic partnerships critical in order for the agency to accomplish its goals. Additionally, clear education goals, planning, and strategic use of resources are critical aspects for effective partnerships. NOAA's Education Program: Review and Critique provides a summary of the national education context for NOAA's role in education which is twofold: first is to advance the environmental literacy of the nation, and second is to promote a diverse workforce in ocean, coastal, Great Lakes, atmospheric and climate sciences. The book also describes the strengths and weaknesses of the education strategic plan, the education evaluation approach of the agency and strategies for improving the evaluation process.
