Healing the Soul of a Woman Joyce Meyer,2018-09-11 Internationally renowned Bible teacher Joyce Meyer draws on her own history of abuse to show women how Christ's redeeming love heals emotional wounds and brings joy to life. Can a woman who has been deeply hurt by life's circumstances be healed, heart and soul? If she has been wounded by a man she loved and trusted, can she love and trust again? As a woman who endured years of abuse, abandonment, and betrayal by those closest to her, Joyce Meyer can answer with a resounding yes! Meyer's positivity comes from living her own journey, and from seeing so many women who don't believe they can fully overcome their pain--or even know where to begin--find the guidance they need in the life-changing wisdom of the Bible. Meyer's bestseller *Beauty for Ashes* told of her personal story of healing. Now, with the passage of more time, *HEALING THE SOUL OF A WOMAN* delves deeper into Joyce's story and the journey of healing for all women. Each chapter guides you through whatever obstacles may be holding you back to find your true destiny as God's beloved. God can heal all pain, and He wants to do this in you. Let *HEALING THE SOUL OF A WOMAN* be the first step toward the wonderful, joyful future God intends for you.

EBOOK: Learning Spaces: Creating Opportunities for Knowledge Creation in Academic Life Maggi Savin-Baden, 2007-11-16 "This is a timely and important book which seeks to reclaim universities as places of learning. It is jargon free and forcefully argued. It should be on every principal and vice-chancellor's list of essential reading." Jon Nixon, Professor of Educational Studies, University of Sheffield The ability to have or to find space in academic life seems to be increasingly difficult since we seem to be consumed by teaching and bidding, overwhelmed by emails and underwhelmed by long arduous meetings. This book explores the concept of learning spaces, the idea that there are diverse forms of spaces within the life and life world of the academic where opportunities to reflect and critique their own unique learning position occur. *Learning Spaces* sets out to challenge the notion that academic thinking can take place in cramped, busy working spaces, and argues instead for a need to recognise and promote new opportunities for learning spaces to emerge in academic life. The book examines the ideas that: Learning spaces are increasingly absent in academic life The creation and re-creation of learning spaces is vital for the survival of the academic community The absence of learning spaces is resulting in increasing dissolution and fragmentation of academic identities Learning spaces need to be valued and possibly redefined in order to regain and maintain the intellectual health of academe In offering possibilities for creative learning spaces, this innovative book provides key reading for those interested in the future of universities including educational developers, researchers, managers and policy makers.

Prevention First Anand K. Parekh, 2024-10-29 Deaths from preventable diseases have decreased life expectancy in the United States for the first time in a century, making it clear that we must deal with the crisis by embracing prevention as our nation's top health sector priority. In *Prevention First*, Dr. Anand K. Parekh, chief medical advisor of the Bipartisan Policy Center, argues that disease prevention must be our nation's top health policy priority. Building a personal culture of prevention, he writes, is not enough; elected officials and policymakers must play a greater role in reducing preventable deaths. This second edition includes important new developments in health policy, including US responses to and lessons learned from the COVID-19 pandemic and the addition of learning objectives and key takeaways in each chapter to aid students and faculty. Drawing on his experiences as a clinician, public servant, and policy advisor, Dr. Parekh provides examples of prevention in action from across the country, giving readers a view into why prevention-first policies are important and how they can be accomplished. Throughout the book, he demonstrates that, in order to optimize health in America, we must leverage health insurance programs to promote disease prevention, expand primary care, attend to the social determinants of health, support making the healthier choice the easy choice for individuals, and increase public health investments. Providing concrete steps that federal policymakers should take to promote prevention both within and outside our healthcare sector, *Prevention First* not only sounds the alarm about the terrible consequences of preventable disease but serves as a rallying cry that we can and must do better in this country to reduce preventable deaths.

Projection and Personality Development via the Eight-Function Model Carol Shumate, 2021-01-25 Jung considered

personality development critical for the survival of the human race, not just for personal fulfillment, but how can personality be developed? Carol Shumate shows how John Beebe's revolutionary eight-function/eight-archetype model of personality type can be applied to guide development for each of the sixteen Myers-Briggs types, making explicit the implications of Jung's eight-function model. Based on reports from participants at Beebe's workshops and using examples of historic figures like Abraham Lincoln, this is the first book to detail how the unconscious aspects of the functions tend to manifest for each type. *Projection and Personality Development via the Eight-Function Model* can assist readers in realizing the transformation that Jung himself experienced. It will be key reading for Jungian analysts and psychotherapists, academics and scholars of Jungian and post-Jungian studies, and practitioners of psychological type.

The Economics of Inequality, Discrimination, Poverty, and Mobility Robert S. Rycroft, 2017-09-01 If there was any question before, there is no longer a question today: inequality, discrimination, poverty, and mobility are prominent national issues. The notion of The American Dream has been sold to generations of young Americans as the idea that working hard and following your dreams will allow you to break through any barriers in your path and inevitably lead to success. However, recent findings on inequality, discrimination, poverty, and mobility show that The American Reality is very different. The second edition of this introductory-level text brings together the essential materials on what economists have to say about these findings and brings students up to date with current thinking. It covers several ground-shattering events, such as: the election of Barack Obama followed by Donald Trump; the passage of the Affordable Care Act and attempts to repeal it; and the publication of Thomas Piketty's *Capital in the 21st Century*, among many others. With an emphasis on data, theory, and policy, this book tackles these issues by exploring three key questions in each chapter: What do the data tell us about what has been happening to the American economy? What are the economic theories needed to understand what has been happening? What are the policy ideas and controversies associated with these economic problems? Key controversies are highlighted in each chapter to drive classroom discussion, and end-of-chapter questions develop student understanding. This clearly written text is ideally suited to a wide variety of courses on contemporary economic conditions, inequality, and social economics in the United States.

Classics and Irish Politics, 1916-2016 Isabelle Torrance, Donncha O'Rourke, 2020-10-28 This collection addresses how models from ancient Greece and Rome have permeated Irish political discourse in the century since 1916. The 1916 Easter Rising, when Irish nationalists rose up against British imperial forces, became almost instantly mythologized in Irish political memory as a turning point in the nation's history that paved the way for Irish independence. Its centenary has provided a natural point for reflection on Irish politics, and this volume highlights an unexplored element in Irish political discourse, namely its frequent reliance on, reference to, and tensions with classical Greek and Roman models. Topics covered include the reception and rejection of classical culture in Ireland; the politics of Irish language engagement with Greek and Roman models; the intersection of Irish literature with scholarship in Classics and Celtic Studies; the use of classical referents to articulate political inequalities across gender, sexual, and class hierarchies; meditations on the Northern Irish conflict through classical literature; and the political implications of neoclassical material culture in Irish society. As the only country colonized by Britain with a pre-existing indigenous heritage of expertise in classical languages and literature, postcolonial Ireland represents a unique case in the field of classical reception. This book opens a window on a rich and varied dialogue between significant figures in Irish cultural history and the Greek and Roman sources that have inspired them, a dialogue that is firmly rooted in Ireland's historical past and continues to be ever-evolving.

Cats in Australia Chris Dickman, John Woinarski, Sarah Legge, 2019-06-01 Across the world, cats are loved as pets or are kept or tolerated for their role in controlling some animal pests. But cats, both pets and feral, also kill many native animals and this toll can be enormous. Cats have been remarkably successful in Australia, spreading pervasively across the continent and many islands, occurring in all environments, and proving to be adept and adaptable hunters. A large proportion of Australia's distinctive fauna is threatened and recent research highlights the significant role that cats play in the decline and extinction of native species. *Cats in Australia* brings this research together, documenting the extent to which cats have subverted, and are continuing to subvert, Australia's biodiversity. But the book does much more than spotlight the impacts of cats on Australian nature. It describes the origins of cats and their global spread, their long-standing and varying relationship with people, their global impacts and their ecology. It also seeks to describe the challenge of managing cats, and the options available to constrain their impacts.

Ecofeminism, Second Edition Carol J. Adams, Lori Gruen, 2021-12-16 This new edition of *Ecofeminism: Feminist Intersections with Other Animals and the Earth* begins with an historical, grounding overview that situates ecofeminist theory and activism within the larger field of ecocriticism and provides a timeline for important publications and events. Throughout the book, authors engage with intersections of gender, sexuality, gender expression, race, disability, and species to address the various ways that sexism, heteronormativity, racism, colonialism, and ableism are informed by and support animal oppression. This collection is broken down into three separate sections: -Affect includes contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more-than-human world -Context explores the complexities of appreciating difference and the possibilities of living less violently -Climate, new to the second edition, provides an overview of our climate crisis as well as the climate for critical discussion and debate about ecofeminist ideas and actions Drawing on animal studies, environmental studies, feminist/gender studies, and practical ethics, the ecofeminist contributors to this volume stress the need to move beyond binaries and attend to context over universal judgments; spotlight the importance of care as well as justice, emotion as well as reason; and work to undo the logic of domination and its material implications.
