SPAL ,2005

La investigación de la actividad metalúrgica durante el III milenio A.N.E. en el suroeste de la Península Ibérica Moisés Rodríguez Bayona,2008 Given the need for systematic research into the prehistory of the southwest region of Andalucía in the south of Spain, a comprehensive research proposal has been designed, based on the concept of initial class societies. In this historical dynamic, the south of the Iberian Peninsula, the southwest and the province of Huelva, prove to be the ideal spatial context, as they allow, for the first time, an evaluation of the formation mechanisms of the first stable asymmetric forms of organization by studying the mining-metallurgical activity and the social organization that came with it. The sequential development of this work begins with the definition of its general objectives, in Chapter II, from an archaeometric and archaeometallurgical point of view, supported by the application of metallographic studies within a spatial, chronological and contextual framework and on very specific evidence - metal products and remains - specified in Chapter III. In Chapter IV the conceptual definitions of metallurgy, archaeometallurgy and metallography are discussed, as well as the role played in the development of our discipline by the specific studies here presented and whose application is evaluated in Chapter V, both in the different areas of the specific peninsular geography and, particularly, in the southwest of the Iberian Peninsula. In Chapter VI, through the so-called Huelva case, the main features of the archaeological practice and its scientific production in the southwest are evaluated. Chapter VII presents the compositional and metallographic analyses. The results of the tests carried out are given in Chapter VIII. Chapter IX contains a reflection on the assessment of the metallurgical activity in the third millennium B.C.E. as regards the definition of its model of historical interpretation.

Prehistoric Mining and Metallurgy in South West Iberian Peninsula Mark A. Hunt Ortiz,2003 A technological and often technical study of mining and metalworking in south west Iberia from the Chalcolithic to the Late Bronze Age.
