*Urban Development in Asia and Africa* Yuji Murayama, Courage Kamusoko, Akio Yamashita, Ronald C. Estoque, 2017-03-29

This book examines the urban growth trends and patterns of various rapidly growing metropolitan regions in developing Asian and African nations from the perspective of geography. State-of-the-art geospatial tools and techniques, including geographic information system/science and remote sensing, were used to facilitate the analysis. In addition to the empirical results, the methodological approaches employed and discussed in this book showcase the potential of geospatial analysis, e.g. land-change modeling for improving our understanding of the trends and patterns of urban growth in Asia and Africa. Furthermore, given the complexity of the urban growth process across the world, issues raised in this book will contribute to the improvement of future geospatial analysis of urban growth in the developing regions. This book is written for researchers, academicians, practitioners, and graduate students. The inclusion of the origin and brief history of each of the selected metropolitan regions, including the analysis of their urban primacy, spatiotemporal patterns of urban land-use changes, driving forces of urban development, and implications for future sustainable development, makes the book an important reference for various related studies.

Cities in the 21st Century Oriol Nel-lo, Renata Mele, 2016-02-19 Cities in the 21st Century provides an overview of contemporary urban development. Written by more than thirty major academic specialists from different countries, it provides information on and analysis of the global network of cities, changes in urban form, environmental problems, the role of technologies and knowledge, socioeconomic developments, and finally, the challenge of urban governance. In the mid-20th century, architect and planner Josep Lluís Sert wondered if cities could survive; in the early 21st century, we see that cities have not only survived but have grown as never before. Cities today are engines of production and trade, forges of scientific and technological innovation, and crucibles of social change. Urbanization is a major driver of change in contemporary societies; it is a process that involves acute social inequalities and serious environmental problems, but also offers opportunities to move towards a future of greater prosperity, environmental sustainability, and social justice. With case studies on thirty cities in five continents and a selection of infographics illustrating these dynamic cities, this edited volume is an essential resource for planners and students of urbanization and urban change.

*Ethno-religious Identification and Intergroup Contact Avoidance* Menandro Sarion Abanes, 2014 This study focuses on the latent aspects of an ethno-religious conflict, describing why and how people avoid contact with 'out-groups.' Their contact avoidance is largely based on the notion of power. The book shows how contact avoidance towards out-groups is related to people's ethno-religious identification. This is explained by various factors, such as a perceived group threat, out-group distrust, fundamentalism, quantity of contact, and direct experiences of violence. Finally, the book illustrates how education, mass media, and the history of conflict are related with intergroup contact avoidance. **Water Policy in the Philippines** Agnes C. Rola, Juan M. Pulhin, Rosalie Arcala Hall, 2018-01-29 This book describes challenges in the policy and practices of the various water sectors in the Philippines that have led to water conflicts. Such conflicts arise in the nature of rural-urban competition, trans-administrative boundary issues, and inconsistencies between customary and state rules, and even within state rules. Using inter-, multi- and trans-disciplinary approaches, and analysing from various scales - community, local and national governments - the book discusses policies and strategies needed towards achieving water security especially for the poor. Reflective of the complex and urgent water policy and governance issues in many developing countries, the book offers valuable lessons and insights to policy makers, water sector managers, planners and regulators as well as to academics, researchers and students.

*Historical Dictionary of the Philippines* Artemio R. Guillermo, 2011-12-16 Asia is one of the most rapidly developing regions in the world, and knowledge of the individual countries is crucial for our understanding of the area. The Republic of the Philippines, composed of a chain of islands in Southeast Asia, became a Spanish colony during the 16th century and was then ceded to the United States following the Spanish-American War. After independence in the 20th century, the Filipino people suffered under the 20-year rule of the dictator Ferdinand Marcos, which ended as a result of a people power movement in 1986. Since then, the history of the Philippines has been marked by several more political coups, but a growing economy and democratic elections are increasing stability in the country. Artemio R. Guillermo covers more than four centuries of Filipino history in this newly expanded and updated third edition of the Historical Dictionary of the Philippines, which contains more than four hundred entries on important persons, places, events, and institutions. An updated

introduction with a detailed chronology precedes the dictionary and lays out the current situation in the region, while a comprehensive bibliography at the end of the dictionary leads the reader to additional sources. This book is an excellent access point for students, researchers, and anyone wanting to know more about the Philippines.

**The Report: Philippines 2016** Oxford Business Group,2016-04-08 The Philippines emergence as a growth leader has been building gradually since the 1990s, following a long period of low growth and political upheaval. As of the 2010s improved governance under the administration of President Benigno Aquino III has helped to accelerate foreign direct investment (FDI) in business process outsourcing while reviving FDI into the manufacturing sector. This, and a demographic bulge in the young adult bracket, helped bring the average pace of growth in the first half of the 2010s to 6.3%, beating all the country's main South-east Asian peers.

**Towards A Liveable And Sustainable Urban Environment: Eco-cities In East Asia** Liang Fook Lye,Gang Chen,2010-06-17 With cities rapidly encroaching onto surrounding lands, the notion of “eco-city” proposes an innovative yet pragmatic approach to designing, building and operating cities in a way that the destructive impact of human urban activity upon nature will be significantly reduced.This book comprises of papers from a workshop organized by the East Asian Institute on Eco-cities in East Asia on 27 February 2009 in Singapore. Contributed by scholars, officials and environmental specialists from Japan, China, Malaysia, Indonesia, Thailand and the Philippines, the papers focus on how individual governments in these countries undertake eco-city projects. **Rising India and Indian Communities in East Asia** K Kesavapany,A Mani,P Ramasamy,2008 This edited volume containing thirty-five chapters focuses on three main contemporary issues: the phenomenon of new Indians in the past five decades, the impact of rising India on settled Indian communities, and the recent migrants. **Mega-urban Regions in Pacific Asia** Gavin W. Jones,2008 Southeast Asia contains four urban conglomerates of the sort that this study characterizes as Mega-Urban Regions â Jakarta, Manila, Bangkok and Ho Chi Minh. These locations are examined in this book, along with Taipei and Shanghai. Because the administrative boundaries of the cities at the core of these zones do not include the entire urban area, the significance of the broader urban community has largely escaped scholarly attention. The authors base their analysis on actual agglomeration size rather than administrative boundaries, and draw on unpublished census data to study the dynamics of these massive urban zones, considering area and population size as well as social and demographic patterns of change in core, inner and outer zones. They conclude that these mega-urban regions continue to increase their share of national populations, and zones immediately beyond the official metropolitan boundaries are where the most dramatic changes are occurring.

**The Philippines** David Joel Steinberg,2018-02-19 A unified nation with a single people, the Philippines is also a highly fragmented, plural society. Divided between uplander and lowlander, rich and poor, Christian and Muslim, between those of one ethnic, linguistic, and geographic region and those of another, the nation is a complex mosaic formed by conflicting forces of consensus and national identity and of division and instability.It is not possible to comprehend the many changes in the Philippines?such as the rise and fall of Ferdinand Marcos or the revolution that toppled him?without an awareness of the religious, cultural, and economic forces that have shaped the history of these islands. These forces formed the focus of the first edition of The Philippines. Of that 1982 edition, the late Benigno Aquino Jr., noted that ?anyone wanting to understand the Philippines and the Filipinos today must include this book in his ``must' reading list.?The fourth edition has been updated through the final years of the Ramos presidency, and contains a new section on the impact of President Estrada.
