A Handbook of Weather Folk-Lore: Being a Collection of Proverbial Sayings in Various Languages Relating to the Weather, with Explanatory and Illustrative Notes Charles Swainson, 1873

Stormy Weather D. Scala, 2003-12-04 In the coming presidential primaries, no state is as important in setting the stage - or affecting the odds - as New Hampshire. This small, mountainous, proudly distinctive state holds the first primary and the results, both real and in comparison to expectations, can greatly influence the competition for the highest office in the land. Candidates who do well can create momentum and gain support, while those who do worse than expected can be counted out. Scala explains the distinctiveness of New Hampshire politics and how the candidates create strategies to appeal to the state's voters. New Hampshire's sympathy for reformist candidates has the paradoxical affect of jumpstarting the campaigns of those candidates least representative of Democratic voters nationally. The implications for Democratic chances to win the presidency in 2004 are discussed.

They Never Said It : A Book of Fake Quotes, Misquotes, and Misleading Attributions Paul F. Boller Jr. Emeritus Professor of History Texas Christian University, Oklahoma John George Jr. Professor of Political Science and Sociology Central State University, 1989-05-18 Abraham Lincoln never said, You cannot fool all the people all the time. Thomas Jefferson never said, That government is best which governs least. And Horace Greeley never said, Go west, young man. In *They Never Said It*, Paul Boller, Jr., and John George examine hundreds of misquotations, incorrect attributions, and blatant fabrications, outlining the origins of the quotes and revealing why they should be consigned to the historical trashcan. Many of the misquotes are quite harmless. Some are inadvertent misquotes that have become popular (Shakespeare actually said, The best part of valor is discretion), others, the inventions of reporters embellishing a story (Franklin Roosevelt never opened

a speech to a DAR group with the salutation, My fellow immigrants). But some of the quotes, such as Charles Darwin's supposed deathbed recantation of evolution, are blatantly dishonest and falsify the historical record. And others are chillingly vicious, filled with virulent racial and religious prejudices that completely distort the views of the person supposedly quoted and spread distrust and hatred among the gullible. These include the forged remarks attributed to Benjamin Franklin that Jews should be excluded from America, and the fabricated condemnation of Catholics attributed to Lincoln. An entertaining and yet thought-provoking book, *They Never Said It* sorts out a great deal of history and sets it right, going beyond a mere catalog of popular misconceptions to reveal how conservatives and liberals, atheists and evangelists, all have at times twisted and even invented the words of eminent figures to promote their own ends. It is the ultimate debunking reference, a perfect complement to handbooks of quotations.

Quotationary - The A-Z Book of Quotations Nasser Amiri, 2024-06-27 Compiled over many years by Nasser Amiri, this is by far the most comprehensive collection ever compiled of carefully selected quotations from the world's great philosophers, writers, historians, musicians and thinkers. Quotationary is a source of inspiration for every writer, book-lover and thinker. It contains the thoughts of many of the finest minds since ancient man started to express his wit and wisdom in aphoristic form. It is inspirational, instructive, amusing and literary; alongside a dictionary and thesaurus it is a must-have purchase for any author, writer, journalist or anyone working with words.

What Sheep Think About the Weather Amelia Thomas, 2025-11-04 Are animals trying to tell us something—and have we been too distracted to notice? It started with a hummingbird dive-bombing Amelia Thomas over her morning coffee, and a pair of piglets who just wouldn't stay put. Soon Amelia, journalist and new farmer, begins to question the communications of the creatures all around her: her pigs, her dogs, the pheasant family inhabiting her wood, her 'difficult' big red horse: even the earwigs in the farm's dark, damp corners. Are they all just animals reacting instinctually to the world around them—or are they trying to communicate something deeper? Driven by lifelong curiosity, Amelia embarks on a journey to uncover what animals truly seek to say to humans. On the way, along with ground-breaking chimps and circumspect octopuses, she'll meet an extraordinary cast of experts, from animal behaviorists and anthrozoologists to trackers and psychologists, and even explore the surprising insights of pet psychics, A.I. researchers, and animal mindfulness practitioners. Each perspective offers a new layer of understanding about the subtle, complex ways animals connect with us—and will deepen our appreciation for every creature with whom we share our planet. In *What Sheep Think About the Weather*, Amelia chronicles her sometimes difficult discoveries with humor, heart, and awe. More than just a memoir, this book is a call to listen—not only to the animals we love but to the untamed world around us. What if the answers to some of humanity's greatest questions have been whispered to us all along?

The Internet Weather James W. Moore,2002-08-14 A provocative and compelling way to look at the future world of work What will work be like in the future? Futurists often try to answer this question by looking at how the Internet and technology have changed our lives, but in *The Internet Weather*, James Moore asserts it's far more useful-and even essential-to view the future by examining those things that don't change: the human desire for time, privacy, trust, and truth. Understanding this, Moore says, can help managers change the way they manage, and, in doing so, retain employees and improve their businesses. In this riveting book, Moore shares insights gleaned from his consulting career and imparts advice he has given clients to help them change their behavior and improve business and personal performance. He also questions assumptions about the New Economy and offers predictions about the future of work to help managers see where to focus their energy and attention.

The Weather Is Here, Wish You Were Beautiful Gordon S. Jackson,2009 This compilation of more than 500 quotations captures the lure of the open road, the magic of far-off places, and the mystery of the road not taken. Jackson's collection includes both familiar sayings and equally insightful observations by unknown authors and travelers.

The Lost History of “Talking to Computers” William Meisel,2025-03-17 Much science fiction has humans talking to computers, an early example being HAL in the movie *2001* in 1968. That vision motivated many people to attempt making the imagined technology real, including the author, who founded a company developing speech recognition technology in the 1980s. Speech recognition was an early part of Artificial Intelligence, computers doing a task that had previously been exclusive to humans, and proved to be more difficult than early pioneers expected. *The Lost History of “Talking to Computers”* documents 27 years of those efforts; the source of the history is the author’s 309 monthly issues of a newsletter tracking the hundreds of companies trying to make a business out of this challenging technology. Today, we talk to computers frequently on our smartphones (e.g., Apple’s Siri or Google Assistant) or to a home speaker (e.g., Amazon’s Alexa) and often when we telephone a customer service number. Most doctors use computer transcription of their notes for Electronic Healthcare Systems. Speech recognition is teaching how to speak a new language and finding specific content in a video file. How did we get here and where will it take us? What can we learn from this history that has implications for the huge investments in more general AI today? Readers will be amazed at how many companies were inspired by this challenge beginning more than three decades ago.
