*Shoegasm* Clare Anthony, 2012-10-13 The last two decades have seen an explosion of creativity in footwear design. Sexy laced-up sandals, sky-high platform heels, and outrageously decorated shoes are seen on fashionable women everywhere, from the catwalk to the street.

**The Oxford Guide to the Malayo-Polynesian Languages of Southeast Asia** Alexander Adelaar, Antoinette Schapper, 2024-06-27 This volume presents the most wide-ranging treatment available today of the Malayo-Polynesian languages of Southeast Asia and their outliers. It offers a comprehensive account of the historical relations and typological diversity in the group, including current debates in their prehistories and descriptive priorities for future study.

**A Grammar of Tukang Besi** Mark Donohue, 2011-05-12 The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

*Negation and Polarity* Danielle Forget, 1997-01-01 In the last decade, there has been a revival of interest regarding negation and polarity, with much cross-fertilization between semantic and syntactic approaches. The papers in the present volume address key issues regarding the syntax and semantics of negation and polarity, including both synchronic and diachronic perspectives. Central to the discussions are the distribution of negative markers and the structure of the clause, negative concord phenomena, licensing of polarity items, similarities between Neg-movement and wh-movement. The papers, by main contributors to the field, reflect different theoretical frameworks, including Principles and Parameters and Minimalist approaches, Head-Driven Phrase Structure Grammar, Formal Semantics, or approaches interested in pragmatics. The volume is of interest to syntacticians, semanticians, historical linguists, typologists, and philosophers.

**Grammaticalization Scenarios from Africa, the Americas, and the Pacific** Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic

description of grammaticalization processes in genealogically and structurally diverse languages. To address the problem of the limitations of the secondary sources for grammaticalization studies, the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire.

**Negation in Non-Standard British English** Lieselotte Anderwald, 2003-08-27 Despite the advances of radio and television and increasing mobility and urbanization, spoken English is by no means becoming more like the written standard. English dialect grammar, however, is still a new and relatively undeveloped area of research, and most studies to date are either restricted regionally, or based on impressionistic statements. This book provides the first thorough empirical study of the field of non-standard negation across Great Britain.

**Basic Linguistic Theory Volume 3** R. M. W. Dixon, 2012-05-25 Basic Linguistic Theory provides a fundamental characterization of the nature of human languages and a comprehensive guide to their description and analysis. In crystal-clear prose, R. M. W. Dixon describes how to go about doing linguistics. He shows how grammatical structures and rules may be worked out on the basis of inductive generalisations, and explains the steps by which an attested grammar and lexicon can be built up from observed utterances. He describes how the grammars and vocabulary of one language may be compared to others of the same or different families, explains the methods involved in cross-linguistic parametric analyses, and shows how to interpret the results. Volume 3 introduces and examines key grammatical topics, each from a cross-linguistic perspective. The subjects include number systems, negation, reflexives and reciprocals, passives, causatives, comparative constructions, and questions. The final chapter discusses the relation between linguistic explanation and the culture and world-view of the linguist and speakers of the language he or she is describing. The book ends with a guide to sources, a consideration of the number of languages in the world, a glossary, and indexes of authors, languages, and subjects covering all three volumes. Volume 1 addresses the methodology for recording, analysing, and comparing languages and includes chapters on analysis, typology, phonology, the lexicon, and field linguistics. Volume 2, like the present work, considers underlying principles of grammatical organization, and has chapters devoted to the word, nouns and verbs, adjectives, transitivity, copula constructions, pronouns and demonstratives, possession, relative clauses and complementation. Basic Linguistic Theory is the triumphant outcome of a lifetime's thinking about every aspect and manifestation of language. The volumes comprise a one-stop introduction for undergraduate and graduate students of linguistics, as well as for those in neighbouring disciplines, such as psychology and anthropology.

**Leaf Your Troubles Behind** Karen Hugg, 2022-07-15 Have you ever felt happier after a walk in the woods or fiddling with houseplants but your hectic life stressed you out again? In our rushed, tech-based, indoor society, we may yearn for a break but only manage to get through a noisy day and collapse in bed. Regaining a peaceful mind seems beyond reach. But what if there were easy, low-cost activities to heal the soul? What if we could regularly access tranquility? How would we do

that? The answer may be in the simplest, most abundant thing all around us: plants. Plants are like a magic pill for our mental health. Growing science tells us they lower heart rates, make us more relaxed and productive, boost our immune system, help us live longer, and provide air, food, fragrance, and beauty. In *Leaf Your Troubles Behind: How to Destress and Grow Happiness Through Plants*, horticulturalist Karen Hugg draws on the science and two decades of professional gardening experience to help readers reduce stress and increase happiness. Through her original, approachable system of “Green Leisure,” you will: -discover nature’s scientifically proven power to heal us from stress -explore what “green leisure” activities are right for you -create a soothing green lounge at home, either via plants or just photos and décor -gain confidence in growing low-maintenance but rewarding plants, indoors and out -develop “green leisure” habits to ensure care for your soul any time of year With personal stories, the latest research, and fun easy-to-do activities, Karen guides readers in delving into the wonders of plants while “leafing” their daily stress behind and growing joy.

Here - Hither - Hence and Related Categories Julia Nintemann, Maja Robbers, Nicole Hober, 2020-07-20 As a follow-up study to the global comparison of spatial interrogatives (*Studia Typologica* 20), the present book examines the spatial declarative counterparts which are provided by the expression class of spatial deictic adverbs. In a functionally motivated typological approach, equivalents of Early Modern English *here - hither - hence* and *there - thither - thence* are identified across a sample of 250 languages from all macro-areas. These are also quantitatively assessed to extrapolate areal and global trends of coding patterns. The formal relationships between spatial interrogative and spatial declarative paradigms are analyzed with a focus on the syncretism of categories and of individual cells. Qualitative discussions of patterns precede in-depth treatments of problematic cases and other relevant issues related to the research topic. The quantitative results strongly point to areal linguistic trends concerning the distribution of distinct and non-distinct coding of the three spatial relations *Place*, *Goal*, and *Source*. Additional aspects such as quantitative evaluations of constructional complexity are addressed subsequently.
