English Pronunciation Instruction Anastazija Kirkova-Naskova,Alice Henderson,Jonás Fouz-González,2021-10-13 English Pronunciation Instruction: Research-based insights presents recent research on L2 English pronunciation including pedagogical implications and applications, and seeks to bridge the gulf between pronunciation research and teaching practice. The volume's 15 chapters cover a range of aspects that are central to pronunciation teaching, including the teaching of different segmental and suprasegmental features, teachers' and learners' views and practices, types and sources of learners' errors, feedback and assessment, tools and strategies for pronunciation instruction, reactions towards accented speech, as well as the connection between research and teaching. Chapters offer a fully developed section on pedagogical implications with insightful suggestions for classroom instruction. This format and the variety of topics will be informative for researchers, language teachers, and students interested in English pronunciation, as it explores the diverse challenges learners of different L1 backgrounds face, and also provides research-informed techniques and recommendations on how to cope with them.

Criminal Justice in International Society Willem de Lint,Marinella Marmo,Nerida Chazal,2014-01-03 This book adopts a critical criminological approach to analyze the production, representation and role of crime in the emerging international order. It analyzes the role of power and its influence on the dynamics of criminalization at an international level, facilitating an examination of the geopolitics of international criminal justice. Such an approach to crime is well-developed in domestic criminology; however, this critical approach is yet to be used to explore the relationship between power, crime and justice in an international setting. This book brings together contrasting opinions on how courts, prosecutors, judges, NGOs, and other bodies act to reflexively produce the social reality of international justice. In doing this, it bridges the gaps between the fields of sociology, criminology, international relations, political science, and international law to explore the problems and prospects of international criminal justice and illustrate the role of crime and criminalization in a complex, evolving, and contested international society.

Politicide - New PDF Version Victor Sharpe, 2011-12 This third volume of Politicide, like the two previous volumes, is a further compilation of the highly acclaimed and published articles written by the author over a period of many years. Each chapter details various aspects of the Arab and Muslim war against Israel, the total refusal by the Muslim and Arab world to accept the rebirth of Israel in its ancestral homeland, and the relentless attempts to murder the embattled Jewish State. Politicide is the word originally coined by an Israeli statesman to describe just such an act of State murder. This book is a must read for all who wish to better understand the background to the conflict. It provides an easily readable account of the Biblical and post-Biblical history of the Jewish homeland along with an immense amount of vital and current information.

Forging a Socio-Legal Approach to Environmental Harms Tiffany Bergin, Emanuela Orlando, 2017-06-14 Environmental harms exert a significant toll and pose substantial economic costs on societies around the world. Although such harms have been studied from both legal and social science perspectives, these disciplinary-specific approaches are not, on their own, fully able to address the complexity of these environmental challenges. Many legal approaches, for example, are limited by their inattention to the motivations behind environmental offences, whereas many social science approaches are hindered by an insufficient grounding in current legislative frameworks. This edited collection constitutes a pioneering attempt to overcome these limitations by uniting legal and social science perspectives. Together, the book's contributors forge an innovative socio-legal approach to more effectively respond to, and to prevent, environmental harms around the world. Integrating theoretical and empirical work, the book presents carefully selected illustrations of how legal and social science scholarship can be brought together to improve policies. The various chapters examine how a socio-legal approach can

ultimately lead to a more comprehensive understanding of environmental harms, as well as to innovative and effective responses to such environmental offences.

Pronunciation in EFL Instruction Jolanta Szpyra-Kozłowska, 2014-12-05 In view of recent debates on the global spread of English and its international lingua franca role, what pronunciation models are appropriate for millions of EFL learners? Which aspects of English phonetics should be taught to foreign students and which can be neglected with little loss to successful communication? How can English pronunciation be taught in an interesting and effective way which is both learner- and teacher-friendly, in accordance with the latest scholarly and technological achievements? This research-based book addresses these and many other fundamental issues that are currently at the centre of pronunciation teaching. It offers a wealth of new theoretical ideas and practical solutions to various phonodidactic problems that arise in EFL contexts, approaching pronunciation instruction from global and local perspectives and supporting its theoretical claims with extensive empirical evidence. It will be of interest to EFL teachers and teacher trainers, pronunciation specialists and students of applied linguistics.

Air Quality and Livestock Farming Thomas Banhazi, Andres Aland, Jörg Hartung, 2018-06-13 Air quality has a direct

influence on health, welfare and production performance of livestock as the high concentrations of noxious gases, dust and airborne microorganisms are likely to reduce production efficiency and the general welfare of farm animals. Long term exposure to particulates in livestock buildings might also affect the respiratory health of farm workers. Dust in animal buildings contains many biologically active substances such as bacteria, fungi, endotoxins and residues of antibiotics (as a result of veterinary treatments) that are suspected to be hazardous to human health. Furthermore, air pollutants emitted from livestock buildings can reduce air, water and soil quality and can potentially undermine the health of nearby residents. Airborne emissions include ammonia, methane, nitrous oxide, particulates like dust and microorganisms. In addition, other potentially harmful substances such as heavy metals, antibiotic residues and components of disinfectants might be also emitted from livestock building that are potentially damaging to ecosystems. In this book, key aspects of agricultural air quality, such as monitoring, managing and reducing airborne pollutants in and around livestock facilities are reviewed. Features: addressing the raising awareness of the importance of optimal health and welfare for livestock species with contributions from international specialists and researchers providing up-to-date information for professionals involved in modern animal producti This book will be useful for farming professionals, academics, students, policy makers, business leaders, regulatory bodies and agricultural consultants.

Ecofeminism, Second Edition Carol J. Adams, Lori Gruen, 2021-12-16 This new edition of *Ecofeminism: Feminist Intersections with Other Animals and the Earth* begins with an historical, grounding overview that situates ecofeminist theory and activism within the larger field of ecocriticism and provides a timeline for important publications and events. Throughout the book, authors engage with intersections of gender, sexuality, gender expression, race, disability, and species to address the various ways that sexism, heteronormativity, racism, colonialism, and ableism are informed by and support animal oppression. This collection is broken down into three separate sections: -Affect includes contributions from leading theorists and activists on how our emotions and embodiment can and must inform our relationships with the more-than-human world -Context explores the complexities of appreciating difference and the possibilities of living less violently -Climate, new to the second edition, provides an overview of our climate crisis as well as the climate for critical discussion and debate about ecofeminist ideas and actions Drawing on animal studies, environmental studies, feminist/gender studies, and practical ethics, the ecofeminist contributors to this volume stress the need to move beyond binaries and attend to context over universal judgments; spotlight the importance of care as well as justice, emotion as well as reason; and work to undo the logic of domination and its material implications.
