The Self and Community in Star Trek: Voyager Susan M. Bernardo, 2022-05-20 After they are pulled 70,000 light-years away from Alpha Quadrant, the captain and crew of Star Trek: Voyager must travel homeward while exploring new challenges to their relationships, views of others, and themselves. As the first extended, critical study dedicated to Star Trek: Voyager, this book examines how the series uses the physical distance from the crew's home quadrant and the effect this has on the dynamics among community formation, self-creation and a sense of place. Chapters cover topics such as time travel, leadership models, interspecies relationships, the impact of trauma, models of self-creation and individuality, environmental influences on groups and individuals, memory, nostalgia, and how spiritual experiences affect people. The holographic Doctor and the former Borg, Seven of Nine, stand out as complex and boundary-stretching figures.

Exploring Star Trek: Voyager Robert L. Lively, 2020-04-16 In 1995, Star Trek: Voyager brought a new dynamic to Star Trek's familiar, starship oriented, show. Lost 70,000 light-years in space, Voyager and its crew faced an uncertain and changeable future, echoing anxieties felt in the United States at the time. These fifteen essays explore the context, characters, and themes of Star Trek: Voyager, as they relate to the culture and zeitgeist of the 1990s. Essays on gender show how the series both challenges and reinforces typical SF stereotypes through the characters of Captain Janeway, Kes and Seven of Nine, while essays on identity examine the show's intersections with disability studies, race and multiracial identities, family dynamics, and emerging AI and humanity. Using the epic journey of Homer's Odyssey as a starting point for the series, and ending with an examination of the impacts of inception at the birth of the internet age, this book shows the many ways in which Voyager negotiated different perspectives for what the future of the galaxy and the USA could be.

Ladies who Lunge Tara Brabazon, 2002 *Ladies who Lunge: Essays on Difficult Women* dances through history with the unconventional woman. Witty and refreshing, the tone, texture and feeling of the words on the page are as unconventional as the plucky women who punctuate the prose. It is a tough, determined, moving, frank and funny review of difficult women: how they got there, how we can understand their actions, and how we can learn from them.

Fantasy Girls Elyce Rae Helford, 2000 A new collection on women in American television in the 90s uncovers a cultural obsession with tough yet sexy heroines in mythical pasts, the girl power present, and utopic futures. Xena, Buffy, Sabrina, and a host of other characters have become household words, as well as icons of pop culture 'feminism.' Their popularity makes for successful programming, however, how much does this trend truly represent a contemporary feminist breakthrough? And what does it mean for feminism in the next few decades? *Fantasy Girls: Navigating the New Universe of Science Fiction and Fantasy Television* seeks to explore as well as challenge the power and the promises of this recent media phenomenon. Such TV programming offers the exciting opportunity to rethink established gender norms, but how far is it really pushing the limits of the status quo? Amidst the exuberant optimism of fanzines and doting fan websites, the contributors to this volume endeavor to provide us with a much needed critical analysis of this contemporary trend. These essays explore the contradictions and limitations inherent in the genre, forcing readers to take a fresh and critical look through a variety of lenses including girl power, postfeminism, cyborg feminism, disability politics, queer studies, and much more. Programs covered are *Babylon 5*, *Buffy the Vampire Slayer*, Disney's *Cinderella*, *Lois and Clark*, *Mystery Science Theater 3000*, *Sabrina the Teenage Witch*, *Star Trek: Voyager*, *The X-Files*, *Third Rock from the Sun*, and *Xena: Warrior Princess*.

The Sex Is Out of This World Sherry Ginn,Michael G. Cornelius,Donald E. Palumbo,2012-11-08 Science fiction can be translated into real unreality. More than a genre like fantasy, which creates entirely new realms of possibility, science fiction constructs its possibilities from what is real, from what is, indeed, possible, or conceivably so. This collection, then, looks to understand and explore the unreal reality, to note ways in which our culture's continually changing and evolving mores of sex and sexuality are reflected in, dissected by, and deconstructed through the genre of science fiction. This book is a collection of new essays, with the general objective of filling a gap in the literature about sex and science fiction (although some work has gone before, none of it is recent). The essays herein explore the myriad ways in which authors--regardless of format (print, film, television, etc.)--envision very different beings expressing this most fundamental of human behaviors.

Time-Travel Television Sherry Ginn,Gillian I. Leitch,2015-10-08 Stories of time travel have been part of science fiction since H. G. Wells sent his nameless hero hurtling into Earth's distant future in The Time Machine. Time travel enables the storyteller to depict alternate realities, bring fictional characters face to face with historical figures, and depict moral and ethical dilemmas in which millions of lives (or the world as we know it) are at stake. From Doctor Who and Quantum Leap to the multiple incarnations of Star Trek, time travel has been a staple of science fiction television for more than fifty years. Time-Travel Television: The Past from the Present, the Future from the Past surveys the whole range of time travel stories on the small screen. The essays in this collection explore time travel series both familiar (Babylon 5, Stargate SG-1) and forgotten (The Time Tunnel, Voyagers!), as well as time-travel themed episodes and arcs in series where it is not central, such as Red Dwarf, Lost, and Heroes. Contributors to this volume consider some of the classic themes of time-travel stories: the promise (and peril) of "fixing" the past, the chance to experience (and choose) possible futures, and the potential for small changes to have great effects. Exploring time travel as a teaching tool, as a vehicle for moral lessons, and as a background for high adventure, this book offers new perspectives on many familiar programs and the first serious study of several unjustly neglected ones. Time-Travel Television is essential reading for science fiction scholars and fans, and for anyone interested in the many ways that television brings the fantastic into viewers' living rooms.

Homecoming Christie Golden,2003-05-12 This thrilling adventure from Star Trek: Voyager follows Kathryn Janeway and her crew as they return home, only to face a devastating plague. After seven long years in the Delta Quadrant, the crew of the USS Voyager now confront the strangest world of all: home. For Admiral Kathryn Janeway and her stalwart officers, Voyager's miraculous return brings new honors and responsibilities, reunions with long-lost loved ones, and for some, such as the Doctor and Seven of Nine, the challenge of forging new lives in a Federation that seems to hold little place for them. But even as Janeway and the others go their separate ways, pursuing new adventures and opportunities, a mysterious cybernetic plague strikes Earth, transforming innocent men, women, and children into an entirely new generation of Borg. Now the entire planet faces assimilation, and Voyager may be to blame!

Science Fiction and The Abolition of Man Mark J. Boone,Kevin C. Neece,2016-12-13 The Abolition of Man, C. S. Lewis's masterpiece in ethics and the philosophy of science, warns of the danger of combining modern moral skepticism with the technological pursuit of human desires. The end result is the final destruction of human nature. From Brave New World to Star Trek, from steampunk to starships, science fiction film has considered from nearly every conceivable angle the same nexus of morality, technology, and humanity of which C. S. Lewis wrote. As a result, science fiction film has unintentionally given us stunning depictions of Lewis's terrifying vision of the future. In Science Fiction Film and the Abolition of Man, scholars of religion, philosophy, literature, and film explore the connections between sci-fi film and the three parts of Lewis's book: how sci-fi portrays Men without Chests incapable of responding properly to moral good, how it teaches the Tao or The Way, and how it portrays The Abolition of Man.

Star Trek: Voyager: String Theory #2: Fusion Kirsten Beyer,2005-11-01 As the Cosmos Unravels The disruption in the space-time continuum caused by the creation of the Blue Eye singularity continues: Thread by thread, the fabric slowly frays and peels away, breaking down barriers between dimensions. As the lines between realities blur, the consequences cascade. A Sleeping City Awakes Voyager pursues Tuvok to a long-dormant space station, a place of astonishing grandeur and wonder. Ancient almost beyond imagining, the city seduces the crew with the promise that their greatest aspirations might be realized. Such promise requires sacrifice, however, and the price of fulfilling them will be high for Voyager. A Mysterious Power Stirs Unseen sentries, alarmed by Voyager's meddling in the Monoharan system, send emissaries to ascertain Janeway's intentions. Unbeknownst to the captain, she is being tested and must persuade her evaluators that their contention -- that Voyager poses a threat to the delicate web of cosmic ecology -- is baseless. And failure to vindicate her choices will

bring certain retribution to her crew.

Physical Chemistry Kenneth S Schmitz, 2018-06-14 The advancements in society are intertwined with the advancements in science. To understand how changes in society occurred, and will continue to change, one has to have a basic understanding of the laws of physics and chemistry. Physical Chemistry: Multidisciplinary Applications in Society examines how the laws of physics and chemistry (physical chemistry) explain the dynamic nature of the Universe and events on Earth, and how these events affect the evolution of society (multidisciplinary applications). The ordering of the chapters reflects the natural flow of events in an evolving Universe: Philosophy of Science, the basis of the view that natural events have natural causes - Cosmology, the origin of everything from the Big Bang to the current state of the Universe - Geoscience, the physics and chemistry behind the evolution of the planet Earth from its birth to the present - Life Science, the molecules and mechanisms of life on Earth - Ecology, the interdependence of all components within the Ecosphere and the Universe - Information Content, emphasis on how words and phrases and framing of issues affect opinions, reliability of sources, and the limitations of knowledge. - Addresses the four Ws of science: Why scientists believe Nature works the way it does, Who helped develop the fields of science, What theories of natural processes tell us about the nature of Nature, and Where our scientific knowledge is taking us into the future - Gives a historical review of the evolution of science, and the accompanying changes in the philosophy of how science views the nature of the Universe - Explores the physics and chemistry of Nature with minimal reliance on mathematics - Examines the structure and dynamics of the Universe and our Home Planet Earth - Provides a detailed analysis of how humans, as members of the Ecosphere, have influenced, and are continuing to influence, the dynamics of events on the paludarium called Earth - Presents underlying science of current political issues that shape the future of humankind - Emphasizes how words and phrases and framing of issues can influence the opinions of members of society - Makes extensive use of metaphors and everyday experiences to illustrate principles in science and social interactions

Indian Stereotypes in TV Science Fiction Sierra S. Adare, 2009-08-17 According to an early 1990s study, 95 percent of what college students know about Native Americans was acquired through the media, leading to widespread misunderstandings of First Nations peoples. Sierra Adare contends that negative Indian stereotypes do physical, mental, emotional, and financial harm to First Nations individuals. At its core, this book is a social study whose purpose is to explore the responses of First Nations peoples to representative Indian stereotypes portrayed within the TV science fiction genre. Participants in Adare's study viewed episodes from My Favorite Martian, Star Trek, Star Trek: Voyager, Quantum Leap, The Adventures of Superman, and Star Trek: The Next Generation. Reactions by viewers range from optimism to a deep-rooted sadness. The strongest responses came after viewing a Superman episode's depiction of an evil medicine man who uses a ceremonial pipe to kill a warrior. The significance of First Nations peoples' responses and reactions are both surprising and

profound. After publication of *Indian Stereotypes in TV Science Fiction*, ignorance can no longer be used as an excuse for Hollywood's irresponsible depiction of First Nations peoples' culture, traditions, elders, religious beliefs, and sacred objects.

Why TV is Not Our Fault Eileen R. Meehan, 2005 For more than five decades, we've been told by pundits, commentators, advertisers, scholars, and politicians that television is both a window on the world and a mirror reflecting our culture. We've been led to believe that it shows us the world's events through news programs and, through entertainment programs, reflects the preferences, values, beliefs, and understandings shared by most Americans. We're told that if you don't like what you see on TV, don't blame the industry, blame yourself. This book dispels the myth that the television industry is just giving viewers the programming they want to see and, thus, we as viewers are responsible for the existence of shows like *Fear Factor* and yet another *Survivor*. In fact, Eileen Meehan explains, viewers exert no demand in the market for ratings, advertising slots, program production, or telecasting. She also counters the idea that TV programs reflect our culture directly. Introducing us to the political economy of television, Meehan covers programming, corporate strategies, advertising, the misnomer of competition among networks, and organizations that seek more industry accountability. She tells us why TV isn't our fault--and who's really to blame.

Educational Research and the Question(s) of Time David R. Cole, Mehri Mirzaei Rafe, Gui Ying Annie Yang-Heim, 2024-06-24 This book fully explores the question(s) of time in educational research and achieves the acceleration and merging of inquiry with action to understand change and implement these findings through practice. It deals with the philosophy of education, higher education, schooling (the curriculum), time displacement, technology, the environment and policy. This book focuses on time revolution(s). It explores new ways of thinking about time, that question a linear/arrow in time, and sets into motion an educational research agenda to extract revolutions of time. Furthermore, this book figures the dimension of time in teaching and learning by extending and deepening the engagement with time in education. For example, it analyzes the climate crisis in terms of education and how the realization that the climate is changing sits parallel and adjacent to pedagogy. The climate crisis and how to do anything about it through education is an example of how considering the dimension of time opens up education beyond quick or narrow fixes and introduces a profound synthesis for the future.
