Foreign Actors' Influence on Azerbaijan's Energy Policy Tina Flegel,2015-10-03 The author traces several energy policy decisions taken between 2006 and 2013 in Azerbaijan to find out how international actors tried to influence policy-making. The book facilitates understanding of the political mechanisms, threats and opportunities that characterize activities in Azerbaijan's energy sector illustrating strategic pitfalls and chances. Based on a detailed country analysis and the in depth comparison of four policy cases, the book deduces the political elite's rationale, and its practical consequences for transnational relations. It is relevant for scholars studying the political economy of rentier states and regimes in the authoritarian realm, as well as for young strategists in organizations that conduct business in countries dominated by tight informal networks.

Nanocolloids for Petroleum Engineering Baghir A. Suleimanov,Elchin F. Veliyev,Vladimir Vishnyakov,2022-08-08 Nanocolloids for Petroleum Engineering Enables readers to understand nanocolloids in upstream operations in the oil industry from an applied and theoretical point of view Nanocolloids for Petroleum Engineering brings together the background, latest advances, and practical and theoretical information about nanocolloids for petroleum engineering in one comprehensive volume. The text is structured in such a way to allow readers to easily distinguish key points and quickly gain the expertise they need to become more effective in their respective disciplines. For practical purposes and to aid in

seamless reader comprehension, experiences of service companies, general guidance, and problem solving exercises are included throughout the text. The highly qualified authors specifically present the subject as petroleum experts and use a niche industry point of view, which means petroleum, reservoir, and drilling engineers will be able to quickly understand and digest the information contained within. Sample topics covered in the work include: A brief introduction to and classification of colloid systems, describing the main properties of nanocolloids crucial for practical application in petroleum engineering Nanocolloids application in reservoir engineering and development, illustrating reservoir conditions necessary for nanocolloids formation Nanocolloid applications in production operations, including the mechanism of nanoscale dispersion phase impact on physical properties of conventional substances utilized in upstream processes Nanocolloid application in Enhanced Oil Recovery (EOR) and the impact of nanoparticles on conventional displacement agents Nanocolloids for Petroleum Engineering serves as a comprehensive reference work and standalone guide for petroleum engineers who are interested in gaining knowledge surrounding nanocolloids and harnessing that knowledge to aid in solving a wide variety of conventional challenges in the field.

Baku-Tbilisi-Kars Railroad: Future Opportunities and Prospects Mahir Humbatov, Evaldas Klimas, 2016-11-11 After centuries of neglect, the land transport corridors connecting Asia and Europe are on the brink of a rebirth. From practically nothing, a revived network of these land corridors is likely to lead to a considerable share of the freight revenues being generated by the increased trade between Asia and Europe. That is why there is fierce competition among the major players for control in shaping the Asia-Europe railway transport corridors. However, there are also new and exciting possibilities for cooperation among the various players. We will extensively examine and evaluate the transport corridors linking Asia and Europe. The Baku-Tbilisi-Kars railway project will be assessed from the perspectives of the three countries involved: Azerbaijan, Georgia and Turkey. It has been shown that the railroad will economically strengthen the region and better integrate the three host countries into international transport corridors. The Baku-Tbilisi-Kars railroad will certainly play a key role in helping to revive the Silk Road connection, thereby creating common interests and facilitating the transformation of the region. The BTK transport corridor will not only stimulate the economies of the countries involved but help wean them their off oil-dependence and restore their rightful place as major commercial hubs along the once-legendary Silk Road. The attraction of direct foreign investment and establishment of partnerships between the public and private sectors are key issues that will be explored in-depth in this book. By 2025, the region is expected to become a prosperous financial sector and transit area; a comprehensive strategy to that end which incorporates the principles of sustainable growth is being formulated by the countries involved.

Energy Security Gawdat Bahgat, 2011-03-31 Security of Energy supply is a major concern for all modern societies, intensified by skyrocketing demand in India and China and increasing international competition over fossil fuel deposits. Energy Security: An Interdisciplinary Approach gives A comparative analysis from both consumers' and producers' perspectives. It uniquely combines economics, geology, international relations, business, history, public management and political science, in one comprehensive volume, highlighting the vulnerabilities and need to move to more sustainable energy sources. The author provides a number of useful case studies to demonstrate the theory, including perspectives from consuming regions such as the United States, the European Union, and China, and from exporting regions; the Middle East, Africa, Russia and the Caspian Sea. Key features include: coverage on theoretical and empirical frameworks so readers are able to analyse concepts relevant to new laws and policies in energy security up-to-date coverage on 'green energy', outlining research on the balance between meeting energy needs and avoiding polluting the environment an examination of the three most prominent international energy organizations; International Energy Agency, International Energy Forum, and Organization of Petroleum Exporting Countries a full Glossary listing all important terms used in the energy field This study holds important information for policymakers, politicians, energy specialists, scientists and post-graduate and final year students of energy and international relations. With its clear written style, it will also engage other professionals who are interested in international political economy and the future of global energy.

The Caspian Shirin Akiner, 2004-07-05 Reflecting the particular concerns of each of the Caspian countries, this book offers a unique perspective on the prospects and priorities for long-term development round the Caspian basin.

Politics and Oil in Kazakhstan Wojciech Ostrowski, 2010-02-25 Based on extensive field work and in-depth interviews in Kazakhstan, this book provides a comprehensive study of the issues of politics of oil and state-business relationships in Kazakhstan. It examines the ways in which the post-Soviet Kazakh regime has managed to sustain itself in power, and the regime maintenance techniques it has used in the process of establishing and upholding its position.

The South Caucasus-centred Transport Hub: The Crossroads of the East-West and the North-South Corridors Mahir Humbatov, 2017-11-30 Countries situated mainly between China and the European Union are currently participating in

a race to develop their transport, trade and logistics infrastructure to attract at least one of the threads of Silk Road that will carry goods and people across Eurasia. It is believed that development of the Europe-South Caucasus-Asia transport, trade and logistics infrastructure will reduce the cost of production and services, which are important to raise competitiveness and social well-being. Although the Europe-South Caucasus-Asia transport route is a shortcut way between the two continents, the soft and hard infrastructure along this way is not enough developed to meet the emerging demand for goods and passenger turnover. Huge investments required for the development of these routes could be invested by development banks (WB, EBRD, EIB, ADB, AIIB, IDB, BSTDB, ECO bank, and so on), governments and private sector. Different types of infrastructure financing models, including public private partnerships, for the upgrading of relevant infrastructure are options on the table to discuss further. Moreover, harmonization of standards, reducing procedures, electronisation of facilities and co-ordination of activities require a new approach and many adaptations. The Europe-South Caucasus-Asia transport, trade and logistics nexus and the International North-South Transport Corridor are not only economic projects, but also carry political elements, which are backed by certain political agendas. However, it is clear that any type of old Silk Road revival initiative will drive many countries to develop their infrastructure as well as superstructure and coordinate this with other participating countries, which as a result will be beneficial for all of them. It is also believed that every single country may benefit and generate revenues from old Silk Road revival process in case of possible collaboration with its neighbouring countries. Azerbaijan enjoys an advantageous geographical position at a crossroads of East-West and North-South corridors, which leads the country to become a regional transport, production, and trade and logistics hub. The country makes huge investments into its own infrastructure as well as supports certain other neighbouring countries. Within this framework, common will based on the reciprocity and mutual benefit can foster enhanced cooperation along with the Great Silk Road and International North- South Transportation Corridor projects.

The A to Z of the Petroleum Industry Marius S. Vassiliou, 2009-09-24 The world as we have known it for the past century would have been very different without petroleum. Petroleum, particularly in the form of crude oil and its refined products, has been central to all aspects of modern industrial society and has been a major strategic geopolitical objective for nations. The 20th century was the age of oil, and at least part of the 21st century will be as well. Petroleum is used as an energy source and as a raw material for the production of an immense variety of chemicals and synthetic materials. Almost all the world's food relies on petroleum for fertilizer, pesticides, cultivation, or transport. Petroleum has been particularly dominant as a source of transportation fuels, an application for which cost-effective substitutes will be especially difficult to find. *The A to Z of the Petroleum Industry* presents a concise but complete one-volume reference on the history of the petroleum industry from pre-modern times to the present day. This is done through a chronology, an introductory essay, and over 400 cross-referenced dictionary entries on companies, people, places, events, technologies, and phenomena related to the history

of the world's petroleum industry. Anyone interested in the history, status, and outlook for the petroleum industry will find this book a uniquely valuable source.

Conflict Resolution in South Caucasus Esmira Jafarova, 2014-12-18 This book aims to highlight the efforts by the international community to facilitate solutions to the conflicts in the South Caucasus, and focuses particularly on the existing challenges to these efforts. The South Caucasus region has long been roiled by the lingering ethno-national conflicts—Nagorno-Karabakh conflict between Armenia and Azerbaijan, Abkhazia and South Ossetia conflicts within Georgia—that continue to disrupt security and stability in the entire region. Throughout different phases of the conflicts the international community has shown varying degrees of activism in conflict resolution. For clarity purposes, it should be emphasized that the notion of “international community” will be confined to the relevant organizations that have palpable share in the process—the UN, the OSCE, and the EU—and the states that have the biggest impact on conflict resolution and the leverage on the conflicting parties—Russia, Turkey, and the United States.

Russian Energy Security and Foreign Policy Adrian Dellecker, Thomas Gomart, 2011-05-03 This book provides an original and thoroughly academic analysis of the link between Russian energy and foreign policies in Eurasia, as well as offering an interpretation of Russia's coherence on the international stage, seeking to understand Russia and explain its behaviour. The authors analyse both energy and foreign policies together, in order to better grasp their correlation and gain deeper understanding of broader geopolitical issues in Eurasia at a time when things could go either way—towards producers or towards consumers. Questioning the concept of ‘energy deterrence’ which aims to fuel uncertainty in Russia's relations with its partners, as well as projecting its overall power on the international scene, this provocative volume seeks to stimulate debate on this very important issue. Assessing the weight that energy has in Russia's foreign policy and in its pursuit of power on the international stage, this book will be of interest to students and scholars of international relations, energy politics, geopolitics and Russian and Central Asian Studies.

Law and Practice of International Arbitration in the CIS Region Kaj Hober, Yarik Kryvoi, 2016-04-24 The former Soviet republics of the Commonwealth of Independent States (CIS) generate a significant and growing amount of work for the major Western and CIS regional international arbitral institutions. This book, a country-by-country analysis of regulation and practice of international arbitration in ten CIS jurisdictions, offers the first comprehensive review of commercial arbitration in the region. It also analyses notable developments in the use of arbitration mechanisms contained in bilateral and multilateral investment treaties affecting the region. The book provides not only a detailed analysis of the law, but also insight from local practitioners into the culture of arbitration and how the law is applied in each jurisdiction. Jurisdictions covered include Armenia, Azerbaijan, Belarus, Kazakhstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine and Uzbekistan. In addition to detailed discussion of the particular features of arbitral practice in each jurisdiction, contributions

cover the following issues and topics: • arbitrability of disputes and public policy; • arbitral procedure; • recognition and enforcement of commercial and investor-state arbitration awards; • implementation of the UNCITRAL Model Law and other instruments affecting arbitral practice and procedure; • statistics from key arbitration institutions; • adherence to the ICSID, New York and key regional conventions relevant to arbitration; • relevant regulations, cases as well as applicable bilateral investment treaties; • law and practice related to investor-state arbitration; and • role of the Court of the Eurasian Economic Union. An informative introductory chapter provides detailed discussion and analysis of historic and current trends affecting arbitration practice among the CIS countries, including the role of regional conventions relatively unknown in the West. As a comprehensive overview of international arbitration in this burgeoning region, this book has no peers. It is sure to be highly valued and used by lawyers, arbitrators, and academics concerned with alternative dispute resolution, as well as by arbitration institutions, companies, states, and individuals engaged in arbitration.

Human Geopolitics Alan Gamlen, 2019-05-02 Human geopolitics, the competition for population rather than territory, is an essential but weakly understood dimension of world politics today. Such competition has preceded violent conflict throughout history, but has been muted since the Treaties of Westphalia laid the territorial foundations of the modern international system in the mid-seventeenth century. Today, however, human geopolitics is being resurrected in unanticipated ways, as governments are enabled and encouraged to engage their emigrant diasporas. How and why is this happening? Until now these questions have been difficult to answer. The majority of research attention has focused on questions of immigration policy in a handful of wealthy migrant destination countries, largely ignoring the emigration policies that preoccupy the world's many migrant origin states. This book addresses that research imbalance, by focusing on the overlooked sending side of migration policy. Drawing on data covering all UN members across the post-WWII period, and fieldwork with high-level policy makers across 60 states and a dozen international organisations, the book charts the re-emergence of human geopolitics through the global spread of diaspora institutions government ministries and offices dedicated to emigrants and their descendants. It calls for the development of stronger guiding principles and evaluation frameworks to govern these new state-diaspora relations in an era of unprecedented global interdependence.

The Caspian Sea Encyclopedia Igor S. Zonn, Aleksey N Kosarev, Michael Glantz, Andrey G. Kostianoy, 2010-05-26 "The Caspian Sea Encyclopedia" is the second one in the new series of encyclo- dias about the seas of the former Soviet Union published by Springer-Verlag. The first volume - "The Aral Sea Encyclopedia" was published by Springer in 2009. The series will be continued by "The Black Sea Encyclopedia" in 2010. Today the Caspian Sea is known to readers thanks to its oil and gas resources, sturgeon and caviar, significant sea-level variations, socio-economic and political problems. The Caucasus and

Central Asia (http://eurodialogue.org/?les/fckeditor_?les/Caspian-s-map2.png) vii viii Introduction For more than 250 years the Caspian Sea was shared by two states: Russia (the Soviet Union) and Persia (Iran). After the disintegration of the USSR in 1992, the new independent states of Azerbaijan, Turkmenistan and Kazakhstan have radically changed the political and economic situation in the region. In addition to Russia and Iran, who had determined the situation on the Caspian for a long period, Azerbaijan, Turkmenistan and Kazakhstan are now interested parties, beginning a new stage in the historical development of the Caspian region. This increase in the number of the Caspian legal entities from two to three has given rise to a whole tangle of geopolitical, economic, international legal, ethnic and environmental problems, each of which demands its own approach and settlement mechanism.

Governing Law and Dispute Resolution in the Oil and Gas Industry Pereira, Eduardo G., Timonen, Tuuli, Aleynikova, Elina, 2022-08-23 The oil and gas industry's wide international exposure and constantly changing landscape leave it particularly vulnerable to disputes. As this practical book demonstrates, the risks associated with disputes can be mitigated by parties utilising governing law and dispute resolution clauses in contractual agreements within the sector. Examining a global range of jurisdictions, the book offers clear guidance on the most appropriate choice of law and choice of dispute resolution forum for oil and gas contracts, analysing the key issues and defining the legal contours involved.
