

The Many Hidden Messages Of Water

Masaru Emoto

The Hidden Messages in Water Masaru Emoto, 2011-07-05 In this New York Times bestseller, internationally renowned Japanese scientist Masaru Emoto shows how the influence of our thoughts, words and feelings on molecules of water can positively impact the earth and our personal health. This book has the potential to profoundly transform your world view. Using high-speed photography, Dr. Masaru Emoto discovered that crystals formed in frozen water reveal changes when specific, concentrated thoughts are directed toward them. He found that water from clear springs and water that has been exposed to loving words shows brilliant, complex, and colorful snowflake patterns. In contrast, polluted water, or water exposed to negative thoughts, forms incomplete, asymmetrical patterns with dull colors. The implications of this research create a new awareness of how we can positively impact the earth and our personal health.

The True Power of Water Masaru Emoto, 2005-09-20 This book contains the unique properties of water and its ability to improve your health and your life, and how you and water interact with each other.

The Secret of Water Masaru Emoto, 2011-09-13 Dr. Masaru Emoto's stunning water-crystal photographs have enchanted millions of people in his many books. His groundbreaking work has shown that thoughts and words have a direct effect on water-crystal formation, and since our bodies are mostly water, our thoughts and words certainly affect not only ourselves but the world around us. In *The Secret of Water*, Dr. Emoto brings water's message of love, peace, and hope to the next generation in his first children's book. Entertaining and educational, this book offers an understanding of water that will encourage parents and children alike to value and give thanks to our most precious resource. In 2003 the United Nations proclaimed the years 2005 to 2015 as its International Water for Life Decade, which urges citizens of the world to take individual responsibility to learn all about water. In a time wrought with environmental catastrophes and natural disasters, *The Secret of Water* shows the necessity of protecting water and offers a message of hope and empowerment. Help us shift consciousness

The Miracle of Water Masaru Emoto, 2010-06-22 This thoughtful book includes new and extraordinary water-crystal photographs that provide convincing reasons for all of us to choose positive words and strive for perfect resonance for a more healthy, peaceful, and happy life. Masaru Emoto has photographed thousands of water crystals throughout his years of research, yet few have been as beautiful and life affirming as those formed from the words "love and gratitude." In *The*

Miracle of Water, Dr. Emoto demonstrates how water's unique role in transporting the natural vibration of these words can help you welcome change and live a more positive and happy life. When we speak positive words, we send out a special vibration to others. They in turn emit positive words and, as a result, we are touched by the energy of love and gratitude. Words expressed in kindness and compassion are certain to result in positive effects for the giver. As Emoto says: 'If you shine a light on those around you with the words you use, you won't ever have to walk in the dark again.' This reflective, contemplative book explores water's critical role in transporting 'vibration information' to the body, and what we can learn from water crystals. There are compelling insights on using the lessons of resonance to mend disharmonious relationships, restore health and bring positive energy into your life.

Messages from Water and the Universe Masaru Emoto, 2010-07-01 Heal yourself through the power of water and goodwill Masaru Emoto's extensive years spent studying the power and potential of water have provided him with the knowledge to discuss its properties; its role in the creation of the universe and all of life; and why a perfect ratio of love and gratitude can usher in a new age of happiness, well-being, and peace on Earth. This cutting-edge book offers us proof that our prayers, goodwill, and positive words can heal us . . . as well as the planet. Through his fascinating accounts and stunning photographs, Emoto reveals the urgent messages from water and reminds us that the essence of life (and our own potential) lies in the love and gratitude we hold within our hearts.

The Shape of Love Masaru Emoto, 2007-04-17 This cutting-edge new work, by the author of the New York Times bestseller *The Hidden Messages in Water*, presents a revolutionary understanding of life and consciousness and provides answers to the most profound questions of existence. Introduced in the bestselling *The Hidden Messages in Water* and the hit cult film *What the Bleep Do We Know?*, the groundbreaking work of Japanese scientist Masaru Emoto captured the popular imagination and launched a worldwide movement. Using high-speed photography, Dr. Emoto discovered that crystals formed in frozen water are affected by our thoughts, words, and feelings. Since humans and the earth are composed mostly of water, his findings have far-reaching ramifications for individuals, for human society, and for the global environment. In *The Shape of Love*, Dr. Emoto shares new images from his research and for the first time draws out the significant lessons of his work. In a clear, conversational style, he interprets the messages hidden in his extraordinary photographs and explains how his discoveries can help us find answers to these eternal questions: Where did we come from? Why are we here? Where will we go after we die? Providing a new way of looking at such important issues as how we treat others and the earth itself, Dr. Emoto's findings encourage the positive actions that spell a better future for all. A magnificent follow-up to *The Hidden Messages in Water*, *The Shape of Love* is a fascinating investigation into the intersection of science and spirituality and its impact on our lives and our world.

Water for Unity Masaru Emoto, Sandra Ingerman, Sobonfu Somé, Lynne McTaggart, 2015-06-15 This book is connected to a worldwide movement which is going to organise several large international events in 2016, as they already did in 2015. The essayists themselves are part of this movement and readers can join too. They will experiment, for instance, with using intention to lower the radioactivity level of Fukushima's water. It is a very young movement but one that has already generated much interest. This is a collection of short essays from 17 very well-known authors who have a solid scientific background or renown within their ancestral traditions. What they have in common is that each one, within their discipline, is aiming to use water's molecular structure and memory to improve our world.

Looking At The World Through a Fractured Lens Donna T. Haddad, C.C.H.T., HBt., 2007-06-27 It is long past time for the subconscious mind and the effects of subconscious clutter to be given front and center attention. The same attention should also be given to the effects of grief that has never been acknowledged, resolved, or completed. The residue of our past is imprinted and stored in the body and subconscious mind, and has shaped our beliefs about ourselves, others, and the world around us. It is my heartfelt belief that the root causes of a significant number of the physical, mental, and emotional diseases that thousands of people endure each day originate in the subconscious. Starting in the womb, and on through childhood, adolescence, and adulthood our subconscious mind and the cells of our body have been “recording” the words and experiences we have encountered. These words and experiences imprinted on our subconscious mind have played a significant role in the formation of mental blocks, habit patterns, and beliefs that are now shaping our lives. It has been estimated that at least ninety per cent of what is referred to as our “mind” is the subconscious mind. That is a vast and fertile area below our conscious awareness that has, and continues to, record all that is happening to us and around us every single day of our lives. Our unconscious mind and the cells of our body are holding an enormous amount of emotional memory that we are not consciously aware of, and is impacting our lives every day. Every person on earth experiences multiple losses throughout her/his life, and some losses are small while others are large. These losses start early in life and continue throughout our life. Each time we experience a loss we will grieve to one degree or another, and the majority of the time there will be some things that are left unfinished, unresolved, or incomplete. When we experience the death of someone we love, a divorce, or breakup of a relationship, there will be much we wish had been different. The residue of each loss builds on the previous loss. So, the grief we feel is compounded and complicated by the previous losses we have experienced. When we suffer a significant loss, the subconscious clutter of our past will deeply impact the grief we feel surrounding the present loss. The grief we are feeling due to the present loss will resonate and awaken a variety of past subconscious memories. It could be memories of long forgotten feelings from previous loss, forgotten feelings of abandonment, mistreatment, or any number of other emotional or mental wounds suffered long ago. The impact of our subconscious mind and grief that was never resolved, cannot, and should not, be underestimated. What is the relationship between the subconscious and prolonged anxiety, or depression, or insecurity, or a variety of physical ailments? Are we experiencing depression, anger, or anxiety because we are still grieving a loss from long ago that we thought we had “gotten over”? Is our grief more prolonged and intense because we are already angry, depressed, or chronically anxious due to a forgotten past wound that is still thriving in our body and subconscious? Are we angry, guilt ridden, or depressed because we have an addiction, or do we have an addiction because we are angry, guilt ridden, or depressed about something that happened long ago and cannot be consciously remembered? Is something that happened years ago still exerting a toxic influence on our lives today? Most people tend to ignore the signs of emotional or mental pain, and too often, even physical pain. If we do not ignore the pain,

we put a band-aid of some sort over the wound so we can” keep on keeping on”. Consequently, in one form or another, adults will pass on to their children, the indignities, pain, criticism, or judgment that was inflicted on them. The pain is perpetuated from one generation to the next. Most adults are not consciously trying to pass on their pain, disappointment
