Policy Development in TESOL and Multilingualism Kashif Raza,Christine Coombe,Dudley Reynolds,2021-08-22 The book is of interest to scholars of multilingualism, language teachers, researchers, and administrators who are developing policies on teaching English and promoting multilingualism. Given its scope, this edited collection provides an overview of how multilingualism is transforming the practice of Teaching English to Speakers of Other Languages (TESOL) in diverse contexts around the world. It serves as a platform for discussions related to policy enactment where TESOL and multilingualism are viewed as collaborative endeavours and approaches the topic from three different angles. The first section of the book provides critical examinations of previous initiatives and accomplishments in the area of language policy development and implementation. The second section describes current projects and initiatives intended to expand and strengthen the field of TESOL while providing space for local and indigenous languages to develop. The third and last part of the book highlights policy development areas that need special consideration in order to develop a form of TESOL that builds on and contributes to multilingualism.

Early Professional Development in EFL Teaching Chitose Asaoka,2019-04-10 This book examines the perspectives and experiences of student teachers who are in the process of becoming secondary school English teachers in Japan. It reports on the trainee teachers' attitudes towards theory and practice in their professional development. Through a discussion of what professional expertise should look like in this context, the book identifies the challenges faced by the Initial Teacher Education (ITE) system in Japan, and suggests support and mediational activities that should be included as components of the ITE curriculum. The book contains valuable rich descriptions of trainee teachers' experiences, and will be of interest to those working in EFL both in Japan and elsewhere.

Teacher Education for Global Englishes Language Teaching Denchai Prabjandee,2024-12-12 This book presents a model of transformative, empowering and critically oriented language teacher education to prepare English teachers to implement Global Englishes Language Teaching (GELT). GELT's importance to learners' needs for communication in the globalized world means that it receives tremendous interest from language teacher educators worldwide, underlining the risks posed by gaps in teachers' knowledge of how to implement it. This book fills in those gaps, with accessible theoretical foundations and practical examples drawn from the successful work of the M.Ed. in Teaching English as a Global Language (TEGL) at Burapha University, Thailand. Through critically oriented frameworks, the TEGL program equips in-service English teachers with a critical lens to examine their current practices, challenge the sociocultural and educational backgrounds that teachers bring into teacher education, and empower them in transforming their classroom practices to correspond with the GELT paradigm. The book highlights how the global spread of English impacts language teacher education, discusses the theoretical foundations underlying the design of teacher education for GELT, addresses the knowledge base for preparing teachers to use GELT and examines the applications of teacher education for GELT. It is vital reading for graduate students, teacher educators, and researchers in language teacher education and beyond.

Bilingual Pre-teens Janet M. Fuller,2012 This volume examines the connection between socio-economic class and bilingual practices, a previously under-researched area, through looking at differences in bilingual settings that are classified as immigrant or elite and are thus linked to socio-economic class categories. Fuller chooses for this examination bilingual pre-teen children in Germany and the U.S. in order to demonstrate how local identities are embedded in a wider social world and how ideologies and identities both produce and reproduce each other. In so doing, she argues that while pre-teen children are clearly influenced by macro-level ideologies, they also have agency in how they choose to construct their identities with relation to hegemonic societal discourses, and have many other motivations and identities aside from social class membership which shape their linguistic practices.

Early Language Learning in Context David Hayes,2022-08-19 This book critically analyses early school foreign language teaching policy and practice, foregrounding the influence of the socioeducational and cultural context on how policies are implemented and assessing the factors which either promote or constrain their effectiveness. It focuses on four Asian contexts - Malaysia, South Korea, Sri Lanka and Thailand - while providing a discussion of policy and practice in Canada and Finland as a comparison. Concentrating on the state school sector, it criticises the worldwide trend for a focus on English as the principal or only foreign language taught in primary schools, founded on a rationale that widespread proficiency in English is important for future national success in a globalised economy. It maintains that the economic rationale is not only largely unfounded and irrelevant to the language learning experiences of young children but also that the focus on English exacerbates system inequalities rather than contributing to their reduction. The book argues for a broader perspective on language learning in primary schools, one that values multilingualism and knowledge of regional and indigenous languages alongside a more diverse range of foreign languages. This book will appeal to educational policymakers, researchers and students interested in early foreign language learning in state educational systems worldwide.

Research as a Tool for Empowerment David Schwarzer,Melanie Bloom,Sarah Shono,2006-03-01 Research as a Tool for Empowerment: Theory Informing Practice is an edited volume that includes an array of research-based chapters that not only further the field of second/foreign language research, but also provide practical implications to language classrooms in international and national settings. Chapters in this volume present a bridge between methodologically sound second/foreign language research and strong pedagogical implications. This volume includes the voices of researchers, graduate students, teachers, parents, and learners exploring the second/foreign language phenomena. The multiple voices of the contributing authors reflect the diverse readership of the Research in Second Language Learning series. Unlike previous anthologies in second/foreign language research, this volume presents studies from various research paradigms. Chapters include examples of various research methods from both quantitative and qualitative paradigms. Few previous anthologies have presented

research based in multiple paradigms and from multiple perspectives. Research as a Tool for Empowerment: Theory Informing Practice not only presents these various perspectives, but it also makes the link from research to classroom implications and applications. The volume is unique as it makes a connection between different types of research and research methods and empowerment and issues of empowerment.

Language Diversity in the Sinophone World Henning Klöter, Mårten Söderblom Saarela, 2020-10-06 Language Diversity in the Sinophone World offers interdisciplinary insights into social, cultural, and linguistic aspects of multilingualism in the Sinophone world, highlighting language diversity and opening up the burgeoning field of Sinophone studies to new perspectives from sociolinguistics. The book begins by charting historical trajectories in Sinophone multilingualism, beginning with late imperial China through to the emergence of English in the mid-19th century. The volume uses this foundation as a jumping off point from which to provide an in-depth comparison of modern language planning and policies throughout the Sinophone world, with the final section examining multilingual practices not readily captured by planning frameworks and the ideologies, identities, repertoires, and competences intertwined within these different multilingual configurations. Taken together, the collection makes a unique sociolinguistic-focused intervention into emerging research in Sinophone studies and will be of interest to students and scholars within the discipline.
