Betrayal Dr. Carolyn LaDelle Bennett,2020-04-13 Betrayal goes to the heart of US officials' (and their partners') self-serving injury to the health and welfare of the United States and the world. US public officials' abandonment of public health for private wealth leaves the world and nation reeling from one USA-made (deliberate) crisis—of violence and disease, hunger and homelessness, deterioration and diminishment of quality conditions in workplaces and public education—to another. Their all-round acts of “legalized” corruption, their international crimes with impunity, and their deregulation-driven denial of essential needs such as clean water and air, food and work safety, shelter, and life itself constitute ultimate and everlasting betrayal. The nonfiction account in the areas of US politics, domestic affairs and foreign relations, leadership, law

and democracy, and war and peace cites examples of callous, crisis-driven betrayal.

Domino Effects in the Process Industries Ernesto Salzano,Pol Hoorelbeke,Faisal Khan,Paul Amyotte,2013-07-08 Explosions produce pressure waves which expand in the atmosphere. When impacting industrial equipment, domino effects may be caused if the equipment content is flammable or toxic. A detailed analysis of these scenarios requires complex computational techniques based on finite element analysis. Simplified methodologies have been developed in the past years for land use planning and quantitative risk assessment. These approaches are based on the definition of probability functions and threshold values for the occurrence of loss of containment from damaged systems and rely on the prediction of peak overpressure with respect to distance from the explosion source and on the structural category of the target equipment.
