Caregiving Sharon Wegscheider-Cruse, 2019-05-21 After a life-threatening accident stopped her completely in her tracks a few years ago, author Sharon Wegscheider-Cruse and her family came to truly understand that we are all one event from a lifestyle change. Former First Lady Rosalyn Carter clearly illustrated the importance of this when she said: There are only four kinds of people in this world: those who have been caregivers; those who currently are caregivers; those who will be caregivers; and those who will need caregivers. While some people choose to take care of loved ones after they can no longer take care of themselves, many others must do so for a myriad of other reasons, often financial. It can be a crisis situation, such as an accident, or the long-term effects of aging. In any case, the days are often long and draining, both for the family caregiver and the paid professional, and the choices to be made are often confusing, difficult, and daunting. In this illuminating book filled with practical, easily implementable advice, Wegscheider-Cruse helps readers sort through the puzzle that forms the caregiving world. Chapter topics include: identifying the roles of caregivers; how to deal with burnout; finding ways to compartmentalize and separate without guilt; using technology to make life easier; building bridges through teamwork; downsizing; and navigating end-of-life issues. Most importantly, the book offers readers a deep toolkit of invaluable suggestions for navigating tough issues with positivity and optimism. It is also the first book to provide stories from the perspective of not just the caregiver, but the caree, thus enabling caregivers to better understand their fears and feelings. The result is a positive, unified approach to care.

The Pooh Perplex Frederick Crews, 2003-02-14 In this devastatingly funny classic, Frederick Crews skewers the ego-inflated pretensions of the schools and practitioners of literary criticism popular in the 1960s, including Freudians, Aristotelians, and New Critics. Modeled on the casebooks often used in freshman English classes at the time, The Pooh Perplex contains twelve essays written in different critical voices, complete with ridiculous footnotes, tongue-in-cheek questions and study projects, and hilarious biographical notes on the contributors. This edition contains a new preface by the author that compares literary theory then and now and identifies some of the real-life critics who were spoofed in certain chapters.

Resetting Susan B. Hassmiller,2020-01-07 A wife and medical professional reflects on the loss of her husband in a series of reflections that reveal the emotional stages of grief and healing. Although grief and loss are universal human conditions, the idea of losing those we love is still greatly feared, largely undiscussed, and certainly not prepared for. It is no wonder people feel alone and isolated in their feelings and thoughts when loss comes to them. Longtime nurse and Red Cross volunteer Susan Beth Hassmiller is no stranger to death. Not only has she experienced the suffering of death alongside her patients, but she was blindsided by the physical and emotional toll of loss in her personal life when her husband was fatally injured in an accident. *Resetting* is written in a daily diary format in which Susan opens a very private window to the actual feelings and thoughts she lived through during her grief process. Raw and gripping, *Resetting* reveals a profound understanding of the human experience of death. By sharing her perspective as a wife, widow and medical professional, Susan helps those who going through grief gain a new perspective and a greater understanding of death, while also offering ideas on how to help those who are experiencing bereavement—from words to say to providing support.

The Otherworld in Myth, Folklore, Cinema, and Brain Science Jim Kline,2019-04-09 This volume explores a dimension of

reality usually scoffed at by rational-thinking individuals living in modern industrialized societies, but still experienced by these same individuals when they are in a stage of sleep known as rapid eye movement (REM) sleep; this is the stage in which vivid and bizarre dreams are a person's living reality. While in this stage, we believe what we experience is real, but then deny its reality upon awakening as we go about our daily routines. Yet, in many cases, a dream with vivid imagery and bizarre goings on is communicating with the dreamer in an archaic language directly associated with an "Otherworld" reality. This reality exists within us and expresses concepts and ideas about our realm of existence that pertain to our waking lives, as well as to an alternate, archaic life with its own language and ideas transcending physical reality. By studying various myths and folk tales, along with cinematic portrayals of otherworldly experiences, commentary from modern individuals, and reports from traditional shamans who are experts at traversing the Otherworld reality, this text discerns the features and characteristics of this supernatural realm. Contemporary research into the Otherworld marks this realm as corresponding to the unconscious substratum of the human psyche, what C.G. Jung referred to as the collective unconscious. Certain scientists have found evidence of its connection with various aspects of brain functioning, suggesting that the brain in many ways encourages a belief in the Otherworld. However, it would be a mistake to call the Otherworld a figment of the human imagination, since this realm seems to have a type of physical existence. The book considers the Otherworld to exist and provides reasons why rational-thinking individuals are hesitant to accept its existence even when their brains are telling them: the Otherworld is real, and you have just experienced it.
