Old and New Questions in Physics, Cosmology, Philosophy, and Theoretical Biology Alwyn Van der Merwe, 2012-12-06 Simply to say that this is a collection of essays in honor of the late Wolfgang Yourgrau (1908-1979) is to explain, at least for the obviously many-insiders, the unusually wide-ranging title of the present volume. In a Foreword to the Proceedings of the First International Colloquium (focusing on logic, physical reality, and history), held at the University of Denver in May of 1966 under their leadership, Wolfgang Yourgrau and Allen Breck wrote, in an oblique reference to C. P. Snow: Indeed there are not two or three or four cultures: there is only one culture; our generation has lost its awareness of this Historians, logicians, physicists-all are banded in one common enterprise, namely in their desire to weave an enlightened fabric of human knowledge. Augment, if you will, the foregoing categories of scholars with biologists, philosophers, cosmologists, and theologians-all of whom, in addition to historians, Wolfgang Yourgrau, by dint of his inextinguishable enthusiasm and charismatic qualities, assembled in Denver for the Second and Third International Colloquia (in 1967 and 1974, respectively)-and a few other besides, and one arrives at a statement of the credo which Yourgrau not only professed, but consistently exemplified throughout his adult life.

How to Ace the Rest of Calculus Colin Adams, Abigail Thompson, Joel Hass, 2015-10-20 The sequel to *How to Ace Calculus*, *How to Ace the Rest of Calculus* provides humorous and highly readable explanations of the key topics of second and third semester calculus-such as sequences and series, polar coordinates, and multivariable calculus-without the technical details

and fine print that would be found in a formal text.
