Enabling Learning John Kinder, Nicola Frascini, Marinella Caruso, 2024-12-03 Enabling Learning: Language Teaching for Australian Universities illuminates efforts by tertiary language educators to facilitate the learning of languages at the university level. The educators' endeavours recounted in this volume address a range of specific aspects of the language learning experience or language teaching within tertiary education institutions. The chapters offer an overview of learning approaches and experiences, from the beginner to the advanced level, of different learning environments, from the traditional to online and hybrid, and of different languages, from Indigenous to European to East Asian. Performed Culture in Chinese Language Education Guangyan Chen,2020-06-22 Performed Culture in Chinese Language Education: A Culture-Based Approach for U.S. Collegiate Contexts elaborates on a cultural awareness-oriented, cultural performance-based, and cross-cultural communication-focused foreign language pedagogical paradigm—Performed Culture Approach — in the context of U.S. collegiate Chinese language education. Guangyan Chen draws on the data collected through questionnaires, comparisons between this pedagogy and mainstream pedagogical frameworks, and analyses of curricular development, lesson plans, and classroom discourses. Chen promotes the performed culture approach by delineating the theoretical framework of this pedagogy, reporting studies that empirically support cultural primacy in Chinese language education, and illustrating this pedagogy through analyses of a curricular structure, a lesson plan, and classroom discourses. Chen shows how this pedagogy addresses the gaps between the social need for global citizens and the insufficient integration of culture into foreign language education. The performed culture approach also addresses the overall drop in U.S. collegiate foreign language enrollment as this pedagogy connects foreign language programs to university missions and social needs.

Crossing Boundaries in Researching, Understanding, and Improving Language Education Dongbo Zhang,Ryan T.

Miller,2023-02-08 This volume brings together original papers from language education scholars from around the world to explore, exemplify, and discuss the multiplicity of boundary crossing in language education. It emphasizes the potential of boundary crossing for expansive learning, and aims to generate new insights, through boundary crossing, into the complexity of language education and approaches to innovative practices. This volume also underscores the important role of expert boundary crossers. In particular, it aims to honor G. Richard Tucker, Paul Mellon University Professor Emeritus of Applied Linguistics at Carnegie Mellon University, celebrating his distinguished scholarship on language education and paying tribute to the inspiration and mentorship he has given to the contributors of this volume to cross boundaries academically and professionally. This volume is organized into four sections, namely, language learning and development; teachers and instructional processes; program innovation, implementation, and evaluation; and language-in-education policy and planning. These sections or themes, which are necessarily cross-cutting, also represent the major areas of scholarship where Prof. Tucker has made distinguished contributions for over half a century.
