Transboundary Environmental Negotiation Lawrence Susskind, William Moomaw, Kevin Gallagher, 2002-10-08

Transboundary Environmental Negotiation is an important collection of articles generated by faculty and graduate students at MIT, the Fletcher School of Law and Diplomacy at Tufts University, and the Program on Negotiation at Harvard Law School. The contributors emphasize the ways in which global environmental treaty-making can be improved. They highlight new environmental problems that pose difficult global negotiation challenges and suggest new strategies for involving a range of nongovernmental actors in ways that can overcome the obstacles to transboundary environmentalism.

Shi'i Islam Najam Haider, 2014-08-11 This book examines the development of Shi'i Islam through the lenses of belief, narrative, and memory.

A Globally Integrated Climate Policy for Canada Steven Bernstein, Jutta Brunnée, David Duff, Andrew Green, 2008-01-01 A

Globally Integrated Climate Policy for Canada builds on the premise that Canada is in need of an approach that effectively integrates domestic priorities and global policy imperatives.

The Implementation and Effectiveness of International Environmental Commitments David G. Victor, Kal

Raustiala, Eugene B. Skolnikoff, 1998 Because environmental problems do not respect borders, their solutions often require international cooperation and agreements. The contributors to this book examine how international environmental agreements are put into practice. Their main concern is effectiveness -- the degree to which such agreements lead to changes in behavior that help to solve environmental problems. Their focus is on implementation -- the process that turns commitments into action, at both domestic and international levels. Implementation is the key to effectiveness because these agreements aim to constrain not just governments but a wide array of actors, including individuals, firms, and agencies whose behavior does not change simply because governments have made international commitments. The book is divided into two parts. Part I looks at international systems for implementation review, through which parties share information, review performance, handle noncompliance, and adjust commitments. Part II looks at implementation at the national level, with particular attention to participation by governmental and nongovernmental actors and to problems in states with economies in transition. The book includes fourteen case studies that cover eight major areas of international environmental regulation: conservation and preservation of fauna and flora, stratospheric ozone depletion, pollution in the Baltic Sea,

pollution in the North Sea, trade in hazardous chemicals and pesticides, air pollution in Europe, whaling, and marine dumping of nuclear waste. Contributors: Steinar Andresen, Juan Carlos di Primio, Owen Greene, Ronnie Hjorth, Vladimir Kotov, John Lanchbery, Elena Nikitina, Kal Raustiala, Alexei Roginko, Jon Birger Skj rseth, Eugene B. Skolnikoff, Olav Schram Stokke, David G. Victor, J rgen Wettestad. Copublished with the International Institute for Applied Systems Analysis

Envisioning a Sustainable Development Agenda for Trade and Environment A. Najam, M. Halle, R. Mel ndez-Ortiz, 2007-07-23 This book systematically explores the trade and environment interests of developing countries from a Southern perspective. The contributors write explicitly about both hopes and fears in the South. Essays are from leading experts and thought leaders from various regions of the South who work for bold new agendas and priorities for their region.

Public Sociology and Civil Society Patricia Mooney Nickel, 2015-11-17 During the past ten years the terms public sociology, civil society, and governance have been used with increasing frequency to describe a wide array of political and social practices. Nickel provides a critical clarification of the concepts of civil society and governance, moving beyond traditional disciplinary boundaries. With her unique international background in the practice of public service and social policy Nickel is able to provide a nuanced explanation of how civil society and governance are interrelated and the implications for the organisation of knowledge and public life. The book is framed in three parts. Part one explores the emergence of public sociology as an ideal, as well as the broader public turn in the social sciences. Part two explores the changing relationship between government and civil society, including non-profit organisations. Part three draws these two themes together in an exploration of the politics of practice and relations of power.

Corporate Environmental Accountability in Nigeria Felix Moses Edoho, 2023-10-18 This book examines the imperative role of global environmental governance, and the need to incorporate corporate environmental accountability and mechanisms for enforcement, to effectively address the global environmental crisis. The author, Felix Moses Edoho, Sr., examines the issues at the various global, national, and regional levels. In Part I the book examines the issues at the global level and looks at the impact of transnational corporations (TNCs) and globalization on the global environmental crisis. Furthermore, it also examines the efforts of the United Nations in initiating global environmental architecture to tackle the crisis. Part II considers the issues at the national level and focuses on Nigeria. The author explores Nigeria's regulatory and institutional framework for environmental governance and implementation. Lastly, at the regional level in Part III, the discourse centers on how decades of oil exploration and production have unleashed monumental ecological tragedies in the Niger Delta region of Nigeria due to the lack of corporate environmental accountability. This book will be of great interest to academics and students who are interested in broadening their knowledge of environmental governance and policy in developing countries. It will also be of value to environmental regulatory agencies and public administrators, development

professionals, and TNCs.

International Encyclopedia of Civil Society Helmut K. Anheier, Stefan Toepler, 2009-11-24 Recently the topic of civil society has generated a wave of interest, and a wealth of new information. Until now no publication has attempted to organize and consolidate this knowledge. The International Encyclopedia of Civil Society fills this gap, establishing a common set of understandings and terminology, and an analytical starting point for future research. Global in scope and authoritative in content, the Encyclopedia offers succinct summaries of core concepts and theories; definitions of terms; biographical entries on important figures and organizational profiles. In addition, it serves as a reliable and up-to-date guide to additional sources of information. In sum, the Encyclopedia provides an overview of the contours of civil society, social capital, philanthropy and nonprofits across cultures and historical periods. For researchers in nonprofit and civil society studies, political science, economics, management and social enterprise, this is the most systematic appraisal of a rapidly growing field.

Handbook on Sustainability Transition and Sustainable Peace Hans Günter Brauch, Ursula Oswald Spring, John Grin, Jürgen Scheffran, 2016-08-10 In this book 60 authors from many disciplines and from 18 countries on five continents examine in ten parts: Moving towards Sustainability Transition; Aiming at Sustainable Peace; Meeting Challenges of the 21st Century: Demographic Imbalances, Temperature Rise and the Climate–Conflict Nexus; Initiating Research on Global Environmental Change, Limits to Growth, Decoupling of Growth and Resource Needs; Developing Theoretical Approaches on Sustainability and Transitions; Analysing National Debates on Sustainability in North America; Preparing Transitions towards a Sustainable Economy and Society, Production and Consumption and Urbanization; Examining Sustainability Transitions in the Water, Food and Health Sectors from Latin American and European Perspectives; Preparing Sustainability Transitions in the Energy Sector; and Relying on Transnational, International, Regional and National Governance for Strategies and Policies Towards Sustainability Transition. This book is based on workshops held in Mexico (2012) and in the US (2013), on a winter school at Chulalongkorn University, Thailand (2013), and on commissioned chapters. The workshop in Mexico and the publication were supported by two grants by the German Foundation for Peace Research (DSF). All texts in this book were peer-reviewed by scholars from all parts of the world.

Governance in Turbulent Times Christopher K. Ansell, Jarle Trondal, Morten Øgård, 2016-12-06 What are the conditions for political development and decay, and the likelihood of sustained political order? What are the limits of established rule as we know it? How much stress can systems tackle before they reach some kind of limit? How do governments tackle enduring ambiguity and uncertainty in their systems and environments? These are some of the big questions of our time. Governance in turbulent times may serve as a stress-test of well-known ways of governing in the 21st century. Governance in Turbulent

Times discusses this pertinent challenge and suggests how governments and organizations cope with and live with turbulence. The book explores how organizations and institutions respond to precipitous, conflicting, and novel-in short, turbulent-governance challenges. This book is a comprehensive and ground-breaking endeavor to understand how governance systems respond to turbulent challenges, and how turbulent times provide excellent opportunities to investigate the sustainability of governance systems. The book illustrates how politics, administrative scale and complexity, uncertainty, and time constraints can collide to produce turbulence. Building on prior work in organization theory and political science, we argue that turbulence refers to four properties related to the interaction of demands for action: variability, consistency, expectation, and unpredictability. Turbulence occurs where the interaction of demands is experienced as highly variable, inconsistent, unexpected, and/or unpredictable.
