Latin for the Illiterati Jon R. Stone,2013-04-15 This revised and updated edition includes a brand new foreword by Richard LaFleur and more than fifteen hundred new entries and abbreviations. Organized alphabetically within the categories of verba (common words and expressions), dicta (common phrases and familiar sayings), and abbreviations, this practical and helpful reference guide is a comprehensive compendium of more than 7,000 Latin words, expressions, phrases, and sayings taken from the world of art, music, law, philosophy, theology, medicine and the theatre, as well as witty remarks and sage advice from ancient writers such as Virgil, Ovid, Cicero, and more.

Emblems and the Natural World Paul J. Smith,Karl A.E. Enenkel,2017-09-11 Since its invention by Andrea Alciato, the emblem is inextricably connected to the natural world. Alciato and his followers drew massively their inspiration from it. For their information about nature, the emblem authors were greatly indebted to ancient natural history, the medieval bestiaries, and the 15th- and 16th-century proto-emblematics, especially the imprese. The natural world became the main topic of, for instance, Camerarius's botanical and zoological emblem books, and also of the 'applied' emblematics in drawings and decorative arts. Animal emblems are frequently quoted by naturalists (Gesner, Aldrovandi). This interdisciplinary volume aims to address these multiple connections between emblematics and Natural History in the broader perspective of their underlying ideologies – scientific, artistic, literary, political and/or religious. Contributors: Alison Saunders, Anne Rolet, Marisa Bass, Bernhard Schirg, Maren Biederbick, Sabine Kalff, Christian Peters, Frederik Knegt, Agnes Kusler, Aline Smeesters, Astrid Zenker, Tobias Bulang, Sonja Schreiner, Paul Smith, and Karl Enenkel.

Günter Grass's Use of Baroque Literature Alexander Weber,1995 This is the first study to discuss the affinity between Grass's complete works and baroque literature. Grass's employment of baroque literature is of particular interest because it takes up a tradition from which German literature has long broken away. Alexander Weber's argument moves from an outline

of general thematic parallels in the early works to an analysis of the conscious use of baroque literature in *Der Butt* and *Das Treffen in Telgte*. He offers both a close reading of Grass and general reflections on how a past literary tradition can be adopted by a modern writer. The study focuses on the themes of vanity, *carpe diem*, and Senecan Stoicism in the early works; it discusses parallels between the rhetorical structure of the courtly-historical novel and *Der Butt* and traces the artist's melancholy and baroque allegories in *Der Butt* and *Das Treffen in Telgte*.

Just a Word, Doctor Bernard J. Freedman,1987 Here is an erudite yet light-hearted account of the origins and associations of about 500 medical and paramedical terms. The author presents words and usages from the ordinary, the curious, and the quaint, and examines such topics as how some words in current use were derived from archaic concepts of body function, why there are some words for which no polite terms were introduced, and the clarification of differences between similar words such as pill and tablet, trot and jog. The aim of this enjoyable work is to entertain rather than to instruct, and it will be of interest to medical professionals who use such terms every day, as well as anyone with an interest in the origin of words.

Omne Agens Agit Sibi Simile Philipp W. Rosemann,1996 The principle, *omne agens agit sibi simile*, every agent causes something similar to itself, is fundamental to Scholastic metaphysics, and especially natural theology. In fact, it is only upon its basis that inferences can be made from creaturely characteristics to the nature of the Creator. However, *omne agens agit sibi simile*, is taken for granted even by an author such as Saint Thomas Aquinas, who never feels any need to justify its validity, in spite of the fact that there is hardly a phrase which occurs more often in Saint Thomas, as Etienne Gilson remarked. Tracing the historical roots of *omne agens agit sibi simile* is an indispensable first step in trying to explain the import of this principle in Scholastic Thought. The first part of the book is devoted to this task. It argues that the mediaeval

metaphysics of causal similarity is rooted in a conception of the cosmos which goes back to the Presocratics, and according to which being is essentially circular, or self-reflexive. This conception was further elaborated by Plato, Aristotle, the Neoplatonists, and their mediaeval successors. The second part examines *omne agens agit sibi simile* in Thomistic metaphysics. Without neglecting Aquinas's sources, it attempts to elucidate the structure of his thought in the light of contemporary philosophical questions. It is stressed, for instance, that in Aquinas's thought, causality involves a process of 'concealing revelation of the cause in and through its effect--an idea which was later to become a central element in Heidegger's philosophy.
