Visual Culture of the Ancient Americas Esther Pasztory, 2017-01-26 In the past fifty years, the study of indigenous and pre-Columbian art has evolved from a groundbreaking area of inquiry in the mid-1960s to an established field of research. This period also spans the career of art historian Esther Pasztory. Few scholars have made such a broad and lasting impact as Pasztory, both in terms of our understanding of specific facets of ancient American art as well as in our appreciation of the evolving analytical tendencies related to the broader field of study as it developed and matured. The essays collected in this volume reflect scholarly rigor and new perspectives on ancient American art and are contributed by many of Pasztory's former students and colleagues. A testament to the sheer breadth of Pasztory's accomplishments, *Visual Culture of the Ancient Americas* covers a wide range of topics, from Aztec picture-writing to nineteenth-century European scientific illustration of Andean sites in Peru. The essays, written by both established and rising scholars from across the field, focus on three areas: the ancient Andes, including its representation by European explorers and scholars of the nineteenth century; Classic period Mesoamerica and its uses within the cultural heritage debate of the twentieth and twenty-first centuries; and Postclassic Mesoamerica, particularly the deeper and heretofore often hidden meanings of its cultural production. Figures, maps, and color plates demonstrate the vibrancy and continued allure of indigenous artworks from the ancient Americas. "Pre-Columbian art can give more," Pasztory declares, and the scholars featured here make a compelling case for its incorporation into art theory as a whole. The result is a collection of essays that celebrates Pasztory's central role in the development of the field of Ancient American visual studies, even as it looks toward the future of the discipline.

Navajo and the Animal People Steve Pavlik,William B Tsosie,2014-07-01 This text examines the traditional Navajo relationship to the natural world. Specifically, how the tribe once related to the Animal People, and particularly a category of animals, which they collectively referred to as the naatl' eetsoh - the ones who hunt. These animals, like Native Americans, were once viewed as impediments to progress requiring extermination.

When the Owl Sings David C. Maloney ,2016-06-21 An ambitious and dynamic debut novel, "When the Owl Sings" centers around Mason Rhimes, a journalist whose ominous dreams hold the key that links him to an ancient Maya civilization that disappeared without a trace. Still reeling from the death of his fiancée, Mason sets out on a personal quest to find answers to the foreboding and spine-chilling events that torture him nightly. Mason's path will lead him to a town where nothing is as it appears, and where he quickly becomes an unwitting participant in a web of deceit and lies.

Culture Clash Kay Matthews,2016-06-20 The Culture Clash story begins in the 1970s in the village of Placitas, New Mexico at the north end of the Sandia Mountains, where author Kay Matthews built a house and began a family while involved in disputes with the Forest Service over forest management and with real estate developers bent on gentrification. It then moves to El Valle, a land grant village of 20 families at the base of the Pecos Wilderness, where she and her family moved in the early 1990s seeking a more rural life. Here, during the rest of that decade and into the 2000s, the small villages of el norte were engaged in battles on numerous fronts: protecting the integrity of traditional acequias; guaranteeing the rights of community-based foresters and ranchers to access public lands; addressing the long standing grievances of the loss of land grants; and maintaining the rural nature of communities through appropriate economic development. As a journalist documenting these struggles, and as a *norteño* living *la lucha*, Matthews weaves together a personal narrative and political analysis of a complex and dynamic rural New Mexico.

Animals and the Maya in Southeast Mexico E. N. Anderson,Felix Medina Tzuc,2022-09-13 In Mexico's southeastern

frontier state of Quintana Roo, game animals and other creatures that depend on old-growth forest are disappearing in the face of habitat destruction and overhunting. Traditionally, the Yucatec Maya have regarded animals as fellow members of a wider society, and in their religion animals enjoy the status of spiritual beings. But in recent years, the breakdown of cultural restraints on hunting has spiraled so far out of control that almost everything edible within easy reach of a road has become fair game. This book combines the insights of an anthropologist with the hands-on experience of a Maya campesino with the aim of improving the management of Quintana Roo's wild lands and animal resources. E. N. Anderson and Felix Medina Tzuc pool their knowledge to document Yucatec Maya understanding and use of animals and to address practical matters related to wider conservation issues. Although the Yucatec Maya's ethnobotany has been well documented, until now little has been recorded about their animal lore. Anderson and Medina Tzuc have compiled a wealth of information about traditional knowledge of animals in this corner of the Maya world. They have recorded most of the terms widely used for several hundred categories of animals in west central Quintana Roo, mapped them onto biological categories, and recorded basic information about wildlife management and uses. The book reflects a wealth of knowledge gathered from individuals regarded as experts on particular aspects of animal management, whether hunting, herding, or beekeeping. It also offers case studies of conservation successes and failures in various communities, pointing to the need for cooperation by the Mexican government and Maya people to save wildlife. Appendixes provide an extensive animal classification and a complete list of all birds identified in the area. Even though sustainable forestry has finally come to the Yucatán, sustainable game use is practiced by only a few communities. *Animals and the Maya in Southeast Mexico* is a complete ethnozoology for the region, offered in the hope that it will encourage the recognition of Quintana Roo's forests and wildlife as no less deserving of protection than ancient Maya cities.
