Teaching English as a Second Language Angela L. Carrasquillo, 2013-10-15 First Published in 1994. Educators will welcome this cohesive and comprehensive volume on the research and practice of teaching English as a second language (TESOL). The author, director of the TESOL program at Fordham University Graduate School of Education, provides a holistic view of the field-its practical and philosophical considerations. Of particular interest is the coverage of such new research areas as ESL literacy, cultural literacy, thinking in a second language (TSL), and pragmatic writing.

Language in Focus Kasia Papaja, Katarzyna Papaja, 2016-12-14 Applied Linguistics is a field of academic enquiry that deals with the theoretical and empirical investigation of real issues which focus on language. These issues include aspects of linguistics, first or second language acquisition, literacy, language disorders, foreign language learning and teaching, bilingual education, linguistic discrimination, and language policy, among others. New approaches, new theoretical concepts and new methods are a prerequisite for dealing with particular educational issues, and, as such, this book focuses on the challenges and opportunities that emerge from this. It brings together selected presentations given at the LIF2014 conference, which took place in Antalya, Turkey. The main focus of this event was to reflect the internationality of the English language by drawing academicians, researchers, teachers and educational authorities from all over the world and providing them with the opportunity to exchange an interdisciplinary dialogue on the theoretical as well as purely practical implications of Applied Linguistics and ELT.

EFL Learners' Acquisition of the English Article System Mahmoud Hajar, 2024-03-11 This book addresses several issues that have been controversial in the literature surrounding second language (L2) acquisition, including the role that the first language (L1) plays in development, the ability of L2 learners to acquire properties of functional categories not realised in

their L1, the nature of L2 development itself, and the extent to which such development is constrained by innate linguistic capacities (universal grammar). These issues are considered by investigating the acquisition of the English articles by speakers of an L1 that has an article system encoding definiteness (Arabic), and an L1 that lacks articles (Japanese), at different proficiency levels in English. Those who will find this book useful include policy makers in language education as well as students and their teachers. Researchers in the field of second language acquisition can benefit from reading this book to keep abreast of the latest developments in this area in the hope of stimulating further research.

Emergentist Approaches to Language Brian MacWhinney, Vera Kempe, Ping Li, Patricia J. Brooks, 2022-02-16

Towards Multilingual Education Jasone Cenoz, 2009 This volume focuses on research in bilingual and multilingual education. It discusses the results of research conducted in different multilingual educational contexts and particularly in Basque schools and universities where Basque, Spanish and English are used as subjects and as languages of instruction.

Multimedia, Computer Graphics and Broadcasting Dominik Slezak, William I. Grosky, Niki Pissinou, Timothy K. Shih, Tai-hoon Kim, Byeong-Ho Kang, 2010-05-10 As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines. FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications (ASEA), Bio-Science and Bio-Technology (BSBT), Control and Automation (CA), Database Theory and Application (DTA), Disaster Recovery and Business Continuity (DRBC; published independently), Future Generation Communication and Networking (FGCN) that was combined with Advanced Communication and Networking (ACN), Grid and Distributed Computing (GDC), Multimedia, Computer Graphics and Broadcasting (MulGraB), Security Technology (SecTech), Signal Processing, Image Processing and Pattern Recognition (SIP), and e-Service, Science and Technology (UNESST).
