**Global Heritage Stone** D. Pereira, B.R. Marker, S. Kramar, B.J. Cooper, B.E. Schouenborg, 2015-06-04 This Special Publication is dedicated to heritage stone: those natural stones that have special significance in human culture. Some stones that have had important uses in the past are now neglected because they are no longer extracted. Others are still commercially important, but their heritage uses have not been well documented in widely available sources. The Heritage Stone Task Group of the International Union of Geological Sciences is working to establish a new formal designation of 'Global Heritage Stone Resource' to recognize those stones that have had internationally significant architectural and ornamental uses. The aim is to spread awareness of the cultural heritage aspects of these stones, to help to encourage continued supply for maintenance and repair of important monuments and to preserve historically important quarries. The aim is neither to promote nor to limit these stones for new construction: in some cases continuing commercial use might help

to ensure future supplies for building conservation purposes.

*Michelangelo's Mountain* Eric Scigliano, 2007-11-01 Discover the fascinating, crucial, and often dangerous relationship between Michelangelo and the stone quarries of Carrara in this clear-eyed and well-researched exploration that “recounts the artist's large life and lasting works with care and reverence” (Booklist). No artist looms so large in Western consciousness and culture as Michelangelo Buonarroti, the most celebrated sculptor of all time. And no place on earth provides a stone so capable of simulating the warmth and vitality of human flesh and incarnating the genius of a Michelangelo as the statuario of Carrara, the storied marble mecca at Tuscany's northwest corner. It was there, where shadowy Etruscans and Roman slaves once toiled, that Michelangelo risked his life in dozens of harrowing expeditions to secure the precious stone for his Pietà, Moses, and other masterpieces. Many books have recounted Michelangelo's achievements in Florence and Rome. Michelangelo's Mountain goes beyond all of them, revealing his escapades and ordeals in the spectacular landscape that was the third pole of his tumultuous career and the third wellspring of his art. Eric Scigliano brings this haunting place and eternally fascinating artist to life in a sweeping tale peopled by popes and poets, mad dukes and mythic monsters, scheming courtiers and rough-hewn quarrymen. He recounts the saga of the David, the improbable masterpiece that Michelangelo created against all odds, of the twin Hercules that he tried to erect beside it, and of the Salieri-like nemesis who snatched away the commission, turning a sculptural testament to liberty into a bitter symbol of tyranny and giving Florence the colossus it loves to hate. In showing how the artist, land, and stone transformed one another, Scigliano brings fresh insight to Michelangelo's most cherished works and illuminates his struggles with the princes and potentates of Carrara, Rome, and Medici Florence, who raised intrigue to a high art.

Roman Decorative Stone Collections in the Kelsey Museum of Archaeology J. Clayton Fant, Leah E. Long, Lynley J. McAlpine, 2024 At the turn of the twentieth century, Francis W. Kelsey began to amass a large collection of artifacts from ancient sites across the Mediterranean, with an emphasis on Imperial Rome, to broaden the teaching of antiquity at the University of Michigan. Among the objects now housed in the museum that bears his name is a collection of seven hundred colorful stones dating to the Roman period, one of the largest and most varied collections of Roman decorative stones outside Europe. These pieces were obtained as archaeological artifacts, mostly architectural, with many deriving from well-known ancient buildings, such as the Baths of Diocletian in Rome and the Palace of Herod in Jericho, allowing for new interpretations of their architectural decoration and design. Chapters trace the formation of the collection, study the archaeology of the artifacts, and detail the history of each stone and its study with a comprehensive bibliography. In keeping

with the nature of the collection, Roman Decorative Stone Collections focuses on archaeological contexts and object biographies, from the stones' first use to their eventual display in the Kelsey Museum. Entries are accompanied by rich photographs detailing the stones' appearances, environmental factors, and their collectors. The fully illustrated catalog includes essays deriving from Kelsey's original notes on sources, buildings, sites, and dealers. As the first formal catalog of these items, Roman Decorative Stone Collections is an accessible resource of Roman archaeology, antiquities, and the decorative arts.

**Forsaken Relics** Alessandro Buono, Gianluca Miniaci, Anna Anguissola, 2024-12-31 Uses case studies to examine the social context and cultural and political management of appropriating abandoned objects and assets. Forsaken Relics is the result of an interdisciplinary dialogue between history, archaeology, and ethnography on the topic of the appropriation of disputed goods and places. Scholars with diverse backgrounds convened to address this common challenge: how different societies in time and space managed to claim and re-appropriate alleged "abandoned" or "ownerless" goods or things "in

ruin. The volume includes a diverse range of case studies – from Neolithic sites in Eastern Europe to ancient Egypt and the Mediterranean, encompassing early modern and present-day Europe – reflecting on the ways in which actions can be used to legitimise appropriation, with a particular focus on ritual actions and practices. The objective of this book is to stimulate comparative analysis of this topic in both ancient and modern societies, by identifying the actors of appropriation, examining the definition of abandonment, and exploring the ritual aspects intrinsic in actions such as inventorying, dedication and communication to ancestors, and prayers to gods. Ritual actions, in the last instance, were designed to legitimise the reappropriation and resignification of places and goods classified as abandoned or in a state of ruin, and to recreate locality, kinship, and communities.

*Cycling & Walking for Regional Development* Paolo Pileri, Rossella Moscarelli, 2020-08-28 This book investigates why and how cycle and walking paths can help to promote the regeneration of marginalized areas facing depopulation and economic decline. In addition, it offers a broad overview of recent scientific research into slow tourism and marginality/spatial inequality and explores the linkages between these topics. Key issues are addressed by experts from various disciplinary backgrounds, and potential measures are proposed for the integration of slow tourism into strategies for regional development. Particular attention is devoted to the VENTO project, which involves the creation of a 700-km-long cycle route from Venice to Turin that passes through various rural and marginalized areas of northern Italy. The goal, research process, design, and early lessons from this important project are all discussed in detail. Moreover, the book describes policies and strategies that have successfully been used to enhance the slow tourism infrastructure in other European countries. Given its scope, the book will appeal to researchers, professionals, and students interested in e.g. policymaking, tourism planning, regional development, and landscape and urban planning.
