*The Italian Doctor's Bride* Margaret McDonagh, 2014-12-15 Dr. Nic di Angelis's arrival has stirred up considerable interest in the rural Scottish village of Lochanang! The gorgeous Italian is a wonderfully caring GP, and has won the hearts of the whole village—apart from that of his boss, Dr. Hannah Frost. Hannah has spent her adult life hiding away and devoting herself to her work. But she cannot ignore the warmth of attraction she feels for Nic, who is determined to make Hannah live and enjoy her life. It will take all the powers of Nic's Italian heat to break through Hannah's defenses. But only then will Hannah be able to appreciate what the fiery, passionate doctor has to offer her...

*The Comatose Patient* Eelco F.M. Wijdicks, 2014-04-28 The *Comatose Patient*, Second Edition, is a critical historical overview of the concepts of consciousness and unconsciousness, covering all aspects of coma within 100 detailed case vignettes. This comprehensive text includes principles of neurologic examination of comatose patients as well as instruction of the FOUR Score coma scale, and also discusses landmark legal cases and ethical problems. As the Chair of Division of Critical Care Neurology at Mayo Clinic, Dr. Wijdicks uses his extensive knowledge to discuss a new practical multistep approach to the diagnosis of the comatose patient. Additionally, this edition includes extensive coverage of the interpretation of neuroimaging and its role in daily practice and decision making, as well as management in the emergency room and ICU. Dr. Wijdicks details long-term supportive care and an appropriate approach to communication with family members about end-of-life decision making. In addition, video clips on neurologic examination and neurologic manifestations seen in comatose patients can be found here: <http://oxfordmedicine.com/comatosepatient2e>. All video recordings from the first edition have been reformatted and remastered for optimal use, and several more video clips of patients have also been included.

The Negotiation of Urgency Mirko Pasquini, 2025-06-17 Who is to be attended first? And how should such a decision be made? *The Negotiation of Urgency: Economies of Attention in an Italian Emergency Room* ethnographically explores the everyday life of one of the thickest places in contemporary societies: the ER, where aging, economic precarity, draconian migration laws, hospital overcrowding, and life and death, intersect daily. The book describes the effect of those intersections

for clinicians and their patients, as well as for policy makers and the health-care system more generally. Mirko Pasquini shows that there is more than medical urgency at stake in the ER, where mistrust of medical authority is fueled and violence often sparks. He analyzes the making of urgency, that is triage, not as a neutral medical way of sorting, but as a practice that actively creates difference through economies of attention. The Negotiation of Urgency illustrates both the limits of triage, and how those limits can spark improvisation and creative reinvention.

*Cardiovascular Interventions in Clinical Practice* Jürgen Haase, Hans-Joachim Schäfers, Horst Sievert, Ron

Waksman,2010-04-01 Until the publication of this exciting volume, new treatment modalities in the rapidly growing field of interventional cardiology were described based on individual research findings. Now, a multidisciplinary team of international experts puts catheter-based treatment techniques in context by exploring the pathobiology of specific diseases alongside a discussion of imaging tools and functional tests, and a comparison to alternative treatment approaches provided by cardiovascular surgery. This comprehensive overview of interventional cardiology represents a landmark in the field.

**Proceedings of the 8th European Congress of Neurosurgery Barcelona, September 6-11, 1987** Fabian Isamat,Antony Jefferson,Friedrich Loew,Lindsay Symon,2012-12-06 At the 8th European Congress of Neurosurgery, which took place in Barcelona, September 6-11, 1987, a great number of papers from all fields of neurosurgery were presented, reflecting the major advances that have been achieved in recent years. The Programme Committee of the European Association of Neurosurgical Societies has selected the highlights of the congress for publication. These contributions were carefully edited and compiled in two supplement volumes of Acta Neurochirurgica.

*Examining Neurocritical Patients* Eelco F. M. Wijdicks,2021-07-15 This indispensable title rethinks the neurologic examination in a format tailored, modified, and specialized for neurocritical illness. Generously illustrated, this book provides a detailed clinical assessment of the acutely ill neurologic patient. It explains why certain neurologic signs appear and provides fundamentals of localization. Certain situations demand certain structured examinations. Eventually, all information has to be integrated logically. Different examination techniques may be needed. Recognition of deterioration and increased vigilance with important mimickers and confounders are part of our professional fabric. Other necessary skills include predicting a clinical course and outcome, coordinating effective transfers of unstable patients, and communicating expected clinical changes. Neurologists traditionally have carefully considered the examination findings before acting and localized findings before ordering tests; these heuristics must remain. An indispensable title designed for all learners, *Examining Neurocritical Patients* preserves the beauty of a comprehensive clinical neurologic examination and serves as a high-yield master class for every health care professional tasked with clinical assessment of a neurocritically ill patient.

Landmark Papers in Neurology Martin R. Turner,Matthew C. Kiernan,2015 Brings together the ten most important papers for each sub-speciality within neurology, covering the full range of major neurological conditions. Papers are selected by international experts, who not only summarize what each paper showed, but place them into a wider context demonstrating how their sub-speciality has developed.

*Oxford Case Histories in Cardiology* Rajkumar Rajendram,Javed Ehtisham,Colin Forfar,2011-03-31 Based around the core curriculum for specialist trainees in cardiology, *Oxford Case Histories in Cardiology* contains 50 well-structured, peer-reviewed cases gathered from the Oxford Hospitals, comprehensively covering the various disorders of the cardiac system. Each case history is followed by questions on important aspects of the diagnosis, interpretation of investigations, and

management. The answers are accompanied by a detailed discussion, including the differential diagnosis where relevant and other clinically important aspects of the condition. The book contains numerous illustrations of echocardiographic, radiographic and electrocardiographic data. The list of cases by diagnosis and category according to the cardiology curriculum from the JRCPTB and the extensive index allows the book to be used for revision and reference. The book will be of particular use to post-membership trainees who are preparing for specialty knowledge based assessments in cardiology and acute general medicine in the UK and Europe, and will also be of interest to those who wish to improve their skills in diagnosis and management of a broad range of cardiac diseases.

**Brain Injury Treatment** Jose Leon-Carrion, Klaus R. H. von Wild, George A. Zitnay, 2006-09-27 *Brain Injury Treatment: Theories and Practices* is a thorough and wide-ranging account of the rehabilitation of brain injury. Written from an international perspective, this book presents a detailed discussion of the basic science of brain injury. It explains the treatments used in brain injury rehabilitation and covers new methods of rehabilitation, including complementary medicine theories. It contains a wealth of information on different neurosurgical and neuropsychological treatments. It also includes a comprehensive reference to the theories underlying rehabilitation practices and chapters on community reentry and family dynamics following brain injury. It will be an invaluable tool to students from psychology, medicine, physical and occupational therapy studying the treatment and aftercare of people with brain injury.

*Companion to Clinical Neurology* William Pryse-Phillips, 2009-06-03 This book is designed for the neurologist who (in this day of unusually strict accountability) needs to have at hand an authoritative guide to the diagnostic criteria for all conditions that he or she may be faced with in clinical practice. While originally conceived as a compendium of diagnostic criteria, the author has felt the need to expand the work to include definitions of practically all terms that are used in neurology today. Historical elements are also provided—including entries of important neurologists and neurosurgeons who have impacted the field. The result is an effective representation of the tools of the trade for the neurologist in training and a concise and precise source for the practicing neurologist. The second edition was published in 2003. Since then, advances in the definition of many neurological conditions have been made, all of which have been incorporated in the third edition. There has also been a fine tuning of the definitions and diagnostic criteria of many other conditions. The author has collated over 1300 articles since the last edition in order to update many of the entries. As such, the entries will have the most up-to-date definition of diseases, symptoms, diagnostic tests, and pearls of wisdom. The third edition remains an invaluable guide to the spectrum of neurological practice and with nearly 7,000 references this truly is the bible of neurological terms and conditions.
