La tesis de posgrado en arquitectura, diseño y urbanismo Sergio Zicovich-Wilson,Roberto Doberti,David Kullock,Rafael Iglesia,Ariel Misuraca,Jorge Sarquis,Ricardo Blanco,Federico Lerner,Guadalupe Granero,2021-06-01 Hoy en día, las Tesis de Maestría son un instituto universitario global, altamente protocolizado en sus características y condiciones de producción y evaluación y, por ello mismo, un factor curricular determinante para las oportunidades de los posgraduados en general, los investigadores y las instituciones en las que estos desarrollan su actividad. Sin embargo, esos protocolos originados en las disciplinas científicas -en particular las exactas y naturales y en detrimento de las pretensiones universalistas de sus métodos (avaladas por cierta pereza burocrática)- no deberían ser aplicados sin más a disciplinas no científicas como lo son, en principio, la arquitectura y los diseños. Más aún cuando en el interior mismo de éstos pueden reconocerse distintas áreas (proyectuales, sociales, tecnológicas, por utilizar sólo una de las taxonomías posibles) cuyas premisas y métodos de producción y transmisión de conocimiento no sólo no son completamente coincidentes entre sí sino que, además, se superponen parcialmente con los de otras disciplinas, incluso algunas científicas. Así las cosas, cuando se dice Tesis en una Facultad de Arquitectura, Diseño y Urbanismo, algunos no tienen una idea demasiado clara acerca de qué se está aludiendo; otros, por el contrario, tienen una idea clarísima pero se trata de una diferente -a veces radicalmente diferente- de la que tiene su interlocutor y otros, finalmente, responden con un gesto desdeñoso, como si se tratara de algo jerárquicamente inferior al Proyecto entendido como la forma dominante -cuando no excluyente- del ejercicio de la arquitectura y el diseño.

Enfoques en la enseñanza de la arquitectura y el diseño Andrea Wengrowicz,Silvia Saldaña,Graciela del Prado,Lucia de Lisi,Pablo Dallera,2021-06-01 ¿Cómo pensar la educación para un mundo de complejidad creciente sospechando, incluso, que formamos actores para una obra que, tal vez, ya ni existe?. Este dilema atraviesa, insoslayablemente, las prácticas pedagógicas del diseño, y es en él donde se sitúa la Carrera de Especialización en Docencia para Arquitectura, Diseño y Urbanismo, ámbito de formación de formadores orientado a desarrollar las actualizaciones e innovaciones pedagógicas, metodológicas y técnicas necesarias para la enseñanza universitaria. Este libro es una muestra

inicial de lo producido por cinco egresados que abordan reflexivamente situaciones didácticas singulares: los regímenes de visibilidad y su capacidad de generar subjetividades, la formación interdisciplinaria como promotora del pensamiento complejo y crítico, la elaboración de dispositivos de acompañamiento en procesos de exploración morfológica, la puesta en valor de prácticas tradicionales de evaluación en procesos proyectuales, y el potencial didáctico de la extensión universitaria integrada a la formación y la investigación. Enfoques que no pretenden erigirse en recetas sino, más bien, reformular de un modo crítico algunas prácticas vigentes en la enseñanza de la Arquitectura y el Diseño.

Enseñanza de matemáticas para arquitectos y diseñadores , Nottoli Hernán,2021-06-01 Este libro está basado en la tesis doctoral de su autor el Dr. Arq. Nottoli, trabajo en el cual, con cierto aire de aventura, se desarrolló la simiente de una teoría: que la puerta de entrada para los conocimientos matemáticos de los estudiantes de arquitectura y diseño debe centrarse en metodologías que contengan fundamentalmente imágenes y razonamientos topológicos, por encima de disquisiciones abstractas y cálculos puramente algebraicos. El texto aporta también la experiencia profesional del autor como arquitecto y docente de matemática, y su vocación por tratar de entender los procesos pedagógicos y didácticos que rigen la enseñanza y el aprendizaje, campo en el que sin ser un experto, puede exhibir el tránsito por variados libros especializados, cursos y seminarios, que sin dudas han sido el aporte que vuelca también en este libro. Por todo ello, esta obra puede considerarse un aporte original y específico para la enseñanza de matemática, orientado en particular a docentes y estudiantes de escuelas de arquitectura y diseño.

ARNOLDO GAITE . OBRAS Y PROYECTOS Arnoldo Gaite,2022-03-23 Esta recopilación de obras se origina en el deseo de aprovechar los medios digitales para registrarlas en un archivo sintético, se la ha separado en dos sectores. Uno, dedicado a viviendas individuales o colectivas, y otro a proyectos especiales de edificios comerciales, industriales, para educación o salud. En éste se incorporan algunos dibujos que fueron la propuesta inicial que condujo en definitiva a la obra realizada.

Palabra de ilustrador Daniel Roldán,2021-02-12 Recién en 2011, la Universidad de Buenos Aires tuvo su primera cátedra de Ilustración, nacida en la carrera de Diseño Gráfico de la mano de Daniel Roldán, por lo que la disciplina en su aspecto académico está en sus años formativos. De ello surgió la necesidad de sistematizar saberes y de tener un material específico para desarrollar la enseñanza en el aula. Una cátedra implica la construcción de un conocimiento colectivo. Hay un saber en el aire que va tomando forma, mediante la interrelación entre los docentes, los alumnos y los profesionales de la ilustración de nuestro país y del mundo que fueron convocados a exponer sus conocimientos. Esas charlas y clases magistrales son las que conforman Palabra de ilustrador, que como libro de cátedra -y más- se propone capturar algo de lo que sucede en esos entornos propicios que nos ayudan a pensar la disciplina, como bocetos de una posible teoría contemporánea de la

ilustración. Lejos de plantear que nuestro trabajo como ilustradores comienza apoyando un lápiz sobre el papel, lo que se desarrolla aquí son las dimensiones que anteceden a la imagen, los ejes conceptuales que la fundamentan, los problemas de su materialización y su impacto sociocultural. Se da cuenta del propósito de otorgarle las palabras adecuadas a los conceptos latentes que subyacen en la acción de ilustrar. Este libro, que compila múltiples y diversas voces del campo profesional, es un aporte tanto para los estudiantes de Diseño e Ilustración como para docentes en general y para todos aquellos que se interesen en el tema.

Arquicentrismo Cecilia Mazzeo, 2023-11-01 Mirada de prácticas discriminatorias que se dan desde sus inicios en los centros universitarios; aportando a construir una comunidad más igualitaria. Una nueva colección donde nuestros autores dan como su nombre lo indica, su mirada sobre los temas de la actualidad. En este nuestro primer libro la doctora Mazzeo nos instruye sobre las prácticas discriminatorias que se dan desde sus inicios en los centros universitarios con una mirada objetiva que le dan sus 30 años como profesora en estos centros educativos, y nos invita a cambiar nuestra perspectiva y, al alejarnos, observar y observarnos esperando también que este trabajo aporte a construir una comunidad más igualitaria y permita a otras comunidades mirarse a sí mismas desde una nueva perspectiva.

Arquitectura y ciudades inclusivas ARRESE ALVARO, 2025-07-21 El contenido de esta obra fue seleccionado entre el material teórico utilizado en el Taller para producir proyectos y también los proyectos producidos. Es resultado de un collage de clases teóricas, artículos y proyectos, realizado con un entusiasta grupo de colaboradores. Es por lo tanto un libro plural que abarca distintas concepciones y matices generacionales, desde los fundadores a los aprendices, así como distintos ejercicios profesionales, que van de la investigación teórica al cemento. Sin embargo, tienen entre todos un denominador común: han decidido explorar con proyectos dentro del campo teórico general, definido por las relaciones existentes entre arquitectura y ciudad, compartiendo sus preocupaciones. Apuestan a la reconstrucción de una ciudad más inclusiva, y en ese sentido debe entenderse su búsqueda. Como diseñadores, además, enfrentan nuevos desafíos que cuestionan su saber para responder a los nuevos requisitos funcionales y a los también nuevos imaginarios urbanos. Deben incorporar nuevos componentes edilicios e infraestructuras a la escena siempre cambiante de la ciudad, diseñarlos como piezas componentes y estructurantes de la arquitectura urbana e intentar una nueva síntesis lingüística que los incluya. El material que integra la obra está constituido por sus respuestas a estos desafíos, tanto en el campo reflexivo como en el de los proyectos, organizado en tres bloques temáticos básicos: Ciudad y Arquitectura, sus manifestaciones en el marco de Buenos Aires y los interrogantes que despierta hoy la Enseñanza del Proyecto. El orden en que aparece dentro de cada bloque pretende organizar las distintas ideas y propuestas dentro de una sucesión que, quizás, sólo en apariencia resulte consistente, pero refleja el pluralismo intentado en el Taller para aventurar nuevas respuestas a los problemas planteados.

Investigacion y tesis en disciplinas proyectuales Ana Cravino, 2021-06-01 Iniciar una investigación en el campo de las

disciplinas proyectuales puede ser un desafío ya que en estas no existe una tradición arraigada de investigación. Los investigadores que se han animado a hacerlo han debido enfrentar enormes retos e incertidumbres, pues las propias características de este campo dificultan la extrapolación de modelos metodológicos útiles y afincados en otras áreas del saber. Han sido caminantes que, sin brújula o mapa, trazaron un camino en un territorio no explorado. No obstante, producir conocimiento en Diseño, Arquitectura y Urbanismo es una práctica habitual sobre la que tenemos que reflexionar; sabemos que se puede obtener conocimiento útil para, sobre y en el Proyecto. El objetivo de este trabajo es brindar un acompañamiento metodológico para que los investigadores puedan recorrer su camino con menos dudas e incertidumbres. No pretende, en modo alguno, ser un repertorio de instrucciones sino una guía en el proceso de construcción de conocimiento disciplinar.

Argumentos textiles Marisa Camargo,2021-01-01 El propósito fundamental de este libro es analizar el campo del diseño textil, el rol del diseñador y su vínculo con la industria textil en nuestro país. Se realiza un recorrido por el origen, la evolución y los escenarios sociopolíticos-culturales y tecnológicos que influyeron en el desarrollo de esta disciplina y también se examina la asociación que existe entre el diseño textil con objetos provenientes de la indumentaria, la decoración y la arquitectura. El presente trabajo tiene la intención de develar el origen de la desvinculación que parece observarse entre el campo del diseño y el de la industria y, en consecuencia, su frágil comunicación. Asimismo, se interesa en la interrelación entre ambos sectores y, a su vez, entre ellos, el mercado y el contexto sociopolítico tanto a nivel local como global. En sus capítulos relata y explica cómo fue la creación de la carrera de Diseño de Indumentaria y Textil en la Facultad de Arquitectura, Diseño y Urbanismo de la Universidad de Buenos Aires; la evolución del diseño textil como especialidad independiente; el vínculo que existe entre estas áreas con la producción de bienes y servicios; el valor fundamental de la figura del diseñador como un actor cultural; las lógicas que imperan en estas disciplinas y en la industria; el concepto de proyectualidad como pilar de estas carreras y, finalmente, realiza una especulación sobre cómo podrían vincularse en el futuro el diseño y la industria.

Radical Pedagogies Beatriz Colomina,Ignacio G. Galán,Evangelos Kotsioris,Anna-Maria Meister,2022-05-31

Experiments in architectural education in the post-World War II era that challenged and transformed architectural discourse and practice. In the decades after World War II, new forms of learning transformed architectural education. These radical

experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms, decentered building, imagined new roles for the architect, and envisioned participatory forms of practice. Although many of the experimental programs were subsequently abandoned, terminated, or assimilated, they nevertheless helped shape and in some sense define architectural discourse and practice. This book explores and documents these radical pedagogies and efforts to defy architecture's status quo. The experiments include the adaptation of Bauhaus pedagogy as a means of "unlearning" under the conditions of decolonization in Africa; a movement to design for "every body," including the disabled, by architecture students and faculty at the University of California, Berkeley; the founding of a support network for women interested in the built environment, regardless of their academic backgrounds; and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design. Viewed through their dissolution and afterlife as well as through their founding stories, these projects from the last century raise provocative questions about architecture's role in the new century.
