Speaking in Styles Jason Cranford Teague,2009-06-30 Speaking in Styles aims to help Web designers learn the language that will be used to take their vision from the static comp to the live Internet. Many designers think that CSS is code, and that it's too hard to learn. Jason takes an approach to CSS that breaks it down around common design tasks and helps the reader learn that they already think in styles--they just need to learn to speak the language. Jason helps Web designers find their voice, walks them through the grammar of CSS, shows them how to write their design specs in CSS, and how to prepare it for screen, printer or handheld devices. Along the way designers will learn to optimize their code, make it accessible, optimize for search engines, mix it up with Flash, and more.

Famous and Infamous Quotes Raymond a. Grillo,2013-10-31 The pursuit of knowledge should not only be for purposes of entertainment, but should also be for purposes of education as well. And that knowledge should not just be obtained in the classroom environment, but should also be obtained in the classroom of one's experience. Self-education is often an adjunct to the classroom environment, and can lead very often to the ultimate goal of wisdom for the student of life, and hence, the self-ful fillment of his soul.

Alice's Adventures in Wonderland and Through the Looking Glass Lewis Carroll,2003-03-27 'A work of glorious intelligence and literary devices . . . Nonsense becomes a form of higher sense' Malcolm Bradbury 'I had sent my heroine straight down a rabbit-hole . . . without the least idea what was to happen afterwards,' wrote Lewis Carroll, describing how Alice was conjured up one 'golden afternoon' to entertain a young girl. His dream worlds of nonsensical Wonderland and the back-to-front Looking-Glass kingdom depict order turned upside-down: a baby turns into a pig, time is abandoned at a disordered tea-party and a seven-year-old girl is made Queen. But amongst the anarchic humour and sparkling word play, puzzles and riddles, are poignant moments of nostalgia for lost childhood. Edited with an Introduction and notes by Hugh Haughton

Quotes to Inspire Elsinore Books,2020-04-13 With a carefully chosen quote for each day of the year, this book will be a constant source of inspiration, accompanying you through the depths of winter to starry summer nights, and on again to Christmas and the New Year. You'll encounter lines from novels, short stories, essays, journals, and poems, as well as zen-like meditations, and classic aphorisms. The quotes come from more than a hundred different authors—including many of the world's great literary figures. There are quotes to inspire courage: "The thing is—fear can't hurt you any more than a dream" (William Golding); ignite creativity: "The Possible's slow fuse is lit/ By the Imagination!" (Emily Dickinson); and enjoin us to action and goodness: "Do not act as if you were going to live ten thousand years. Death hangs over you. While you live, while it is in your power, be good" (Marcus Aurelius). You'll meet more playful inspiration in quotes from Douglas Adams and Dr. Seuss. And we've also found room for the kind of mystical reflections that poets such as Wallace Stevens so excelled in composing. In these quotes you'll find a wealth of wisdom distilled into a few choice words. But of course, it is not always the full picture—while the main aim of this collection is to offer day-by-day inspiration, we hope it will also be a springboard for discovering new writers. When you are inspired by a writer's words, we encourage you to seek out the original work, and rediscover the quote in its natural environment. We have rigorously tracked down the source of each quote and attributed it accordingly. This book was designed to be as easily navigable as possible on your e-reader. To begin, you need only turn to the Contents page and follow the link to the current month. We wish you an inspirational voyage of discovery.

Out of the Cradle Endlessly Rocking Nephie Christodoulides,2021-11-15 Out of the Cradle Endlessly Rocking delves deeply into the notion of motherhood in Sylvia Plath's work in order to redeem Plath from the one-dimensional role assigned

to her of the suicidal, father-obsessed poet. Written from the theoretical perspective of Julia Kristeva's theory of subject formation, the book focuses on Plath's baby poems in which mother figures are seen as subjects-in-process oscillating between authentication and non-authentication in motherhood. Furthermore, since the mother is always a daughter, part of the discussion centers on Plath's daughterhood poetry in which daughter figures are engaged in an endless struggle to release themselves from a suffocating maternal hold and achieve their own linguistic individuation. Finally Plath's works for children, *The Bed Book*, *The-It-Doesn't-Matter Suit*, "Mrs. Cherry's Kitchen", as well as her fairy tale poems, largely ignored until now, are read as manifestations of the self's regressive journey to "once below a time" to grasp an elusive pre-symbolic organization and take signification back to infancy. The book makes extensive use of Plath's drafts, mainly of the Ariel poems, her recycled materials, annotated books from her personal library, published and unpublished material from The Lilly Library Archive, The Mortimer Rare Book Room, and The Ted Hughes Archive in Emory.

100 Best Quotes from Children's Books Susan Gabrielle, 2012-07-30 ABOUT THE BOOK Storytelling has been around as long as humankind, although the ability to be a storyteller or history-keeper is a special gift not everyone possesses. Generations of our ancestors told oral tales of encounters with nature-with wild animals or with the land itself, real or imagined. Clans gathered around to hear of dreams or of explanations of certain unexplainable phenomena, such as thunder and lightning. These stories were often illustrated by scratching them or painting them onto cave walls or on rocks, and especially those tales of great battles against warring tribes. Some of the stories only existed as verbal histories passed from grandfathers to sons to grandsons. MEET THE AUTHOR Susan Gabrielle has had work published in *The Christian Science Monitor*, *TheBatShat*, *New Verse News*, and local publications, and was a finalist in the Tiny Lights Narrative Essay Contest. Her short story *What she should have said* was published in the Social Justice issue of the *Little Patuxent Review*, and she has been nominated for a Pushcart Prize for her poem *After 10 years of War*. She currently teaches writing and literature classes as a university instructor, and is at work on a nonfiction writers' guide. You can reach her at Susan-Gabrielle.com EXCERPT FROM THE BOOK But while storytelling itself is an ancient art form, the genre of children's literature is relatively new, and children's book publishing only came to prominence beginning in Great Britain in the 18th century. As Allen notes, From the time John Newbery, publisher and bookseller, decided to create books just for children in 18th-century England until the end of the 19th century, when English industry produced children's books of the highest quality, the body of children's literature that became available from England earned a growing respect throughout the literary world. Before that time, children were treated as miniature adults, useful only insofar as their ability to bring income to the home. Most children up to the 1800s worked on the family farm, so there was little free time for play, and since many children did not attend school, they could not read. The family may have owned a Bible, but it most likely would have been read to them by the father, perhaps after dinner. Mathematics in Postmodern American Fiction Stuart J. Taylor, 2024-04-23 This book delivers an innovative critical approach to better understand U.S. fiction of the information age, and argues that in the last eighty years, fiction has become increasingly concerned with its representations of mathematical ideas, images, and practices. In so doing, this book provides a fuller, transnational account of the place of mathematics in understanding mathematically informed novels. Literature and science studies have acknowledged and situated historical points of cultural crossover; by emphasising mathematics within this larger intellectual context – and not as an unlikely and alien adjunct to post-war culture – this monograph clarifies how mathematically informed postmodern fictions work in a cognate fashion to other fields undergoing structuralist revolutions. This is especially evident in fiction by the key, mathematically-literate Postmodern authors upon whom this study focuses, namely, Thomas Pynchon, Don DeLillo, and David Foster Wallace, through which recent the technological revolutions, facilitated by mathematics, manifest in cultural discourse.
