Diabetes Mellitus William E. Winter, Maria Rita Signorino, 2002 Diabetes mellitus is an ancient disease that continues to plague modern man. Although the frequency of many serious disorders, such as coronary heart disease, has declined since the 1960's, diabetes rates are approaching epidemic proportions in Westernized countries. Although representing only 10% of cases of diabetes, type 1 diabetes is also rising in frequency. The economic cost of diabetes is staggering, costing the United States more than \$100 billion annually. Appropriate management of diabetes requires the efforts of clinicians, laboratorians, and pharmacologists. The goal of this book is to acquaint the laboratorian with the pathophysiology, the diverse etiologies, the complications, the clinical management, and, finally, the diagnostic and routine laboratory evaluation of diabetes.

Holland-Frei Cancer Medicine 8 James F. Holland, 2010 Holland Frei Cancer Medicine serves as a quick reference to current information on an extensive list of cancers, including breast, lung, thyroid, colorectal, ovarian, prostate, and gastric cancer, to name but a few. Presented as an accessible pocket-sized handbook, the chapters are organized in an outline format, offering only the most essential information on the etiology, staging (including TNM staging) and treatment for each cancer type. Individual chapters are devoted to the molecular biology of cancer, cancer prevention, cancer screening, the mechanisms of chemotherapy, and diagnostic imaging in cancer. Additionally, each chapter lists all the major phase III clinical trials, and therefore, serves as an excellent reference of the major randomized controlled trials for each cancer reported to date. Specific chapters are also dedicated to the discussion of oncologic emergencies, pain and palliation, and prescription complications. At the conclusion of the book, a glossary of oncologic terms and chemotherapeutic drug programs, a table of common cancer incidences, and an overview of the mechanisms, common uses, and related toxicities of various anti-cancer agents are featured. In addition, performance status tables, mathematical formulas and a listing of common biomedical / cancer web sites are highlighted.

BOPOD - Wong's Nursing Care of Infants and Children Marilyn J. Hockenberry, David Wilson, 2014-01-30 The most trusted authority in pediatric nursing, Wong's Nursing Care of Infants and Children provides unmatched, comprehensive coverage of pediatric growth, development, and conditions. Its unique 'age and stage' approach covers child development and health promotion as well as specific health problems organized by age groups and body systems. Leading pediatric experts Dr. Marilyn Hockenberry and David Wilson provide an evidence-based, clinical perspective based on nearly 30 years of hands-on experience. Easy to read and extensively illustrated, this edition focuses on patient-centered outcomes and includes updates on topics such as the late preterm infant, immunizations, the H1N1 virus, and childhood obesity. A clear, straightforward writing style makes content easy to understand. Unique Evidence-Based Practice boxes help you apply both research and critical thought processes to support and guide the outcomes of nursing care. Unique Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Unique Critical Thinking exercises help you test and develop your own analytical skills. A unique focus on family content emphasizes the role and influence of the family in health and illness with a separate chapter, discussions throughout the text, and family-centered care boxes. Nursing Care Guidelines

provide clear, step-by-step, detailed instructions on performing specific skills or procedures. Unique Emergency Treatment boxes serve as a quick reference for critical situations. Health promotion chapters emphasize principles of wellness and injury prevention for each age group. Student-friendly features include chapter outlines, learning objectives, key points, references, and related topics and electronic resources to help you study and review important content. A community focus helps you care for children outside the clinical setting. Nursing Care Plans include models for planning patient care, with nursing diagnoses, patient/family goals, nursing interventions/rationales, expected outcomes, and NIC and NOC guidelines. Nursing Tips include helpful hints and practical, clinical information, and Nursing Alerts provide critical information that must be considered in providing care.

Pediatric Drug Development Andrew E. Mulberg, Steven A. Silber, John N. van den Anker, 2011-09-20 *Pediatric Drug Development: Concepts and Applications* is designed as a reference and textbook and is meant to address the science of differences between the pediatric and adult subject in the development of pharmaceutical products. Considered are the ethics and medical needs of proper understanding the pediatric and adult differences, the business case for proper development of drugs for children, as well as the technical feasibility studies and processes that are necessary for a proper pediatric drug development program. The applications of these approaches will benefit all stakeholders and ultimately not only educate but also provide better and safer drugs for pediatric patients.

Diabetes in Old Age Alan J. Sinclair, Trisha Dunning, Leocadio Rodríguez Mañas, Medha Munshi, 2017-02-13 This new edition of the popular and market-leading *Diabetes in Old Age* features up-to-date and comprehensive information about the key aspects of managing older people with diabetes, predominantly type 2 diabetes. With a strong evidence-based focus throughout, the entire range of issues surrounding diabetes and its many complications are covered, each with a clear focus on how they relate directly to the older patient. Varying approaches to optimizing diabetes care in the community, primary care and secondary care health care arenas are presented, and the importance of comprehensive functional assessment is emphasized. Coverage of areas unique to an ageing population of older people with diabetes such as falls management, frailty and sarcopenia, and cognitive dysfunction form a key cornerstone of the book. In every chapter, best practice points and key learning outcomes are provided, as well as published evidence bases for each major conclusion. *Diabetes in Old Age*, 4th edition is essential reading for diabetologists and endocrinologists, diabetes specialist nurses, primary care physicians, general physicians and geriatricians, podiatrists and dieticians with an interest in diabetes, as well as all health professionals engaged in the delivery of diabetes care to older people.

The Diabetes Textbook Joel Rodriguez-Saldana, 2019-06-27 Diabetes has become a worldwide health problem, the global estimated prevalence approaches ten percent and the burden of this disease in terms of morbidity and mortality is unprecedented. The advances acquired through the knowledge of the mechanisms of the disease and the variety of therapeutic approaches contrast with the inability of private and public health systems in underdeveloped and even

developed countries to achieve the goals of treatment. This paradox has been described in many sources: the surge of scientific advances contrast with an unprecedented amount of human suffering. Thus, a patient centered and an evidence based approach with the capacity to produce measurable clinical and economic outcomes is required. The purpose of this textbook is multiple: to offer a comprehensive resource covering all aspects of outpatient management; to address diabetes as a health problem from an epidemiological, economic and clinical perspective; to discuss the role of social determinants of health on the worldwide increase in diabetes; to highlight the challenges and obstacles in providing adequate care; and to outline a multidisciplinary approach to management in which medical visits retain their importance as part of a team comprising the patient, his or her family and a multidisciplinary group of health professionals who are able to move beyond the traditional approach of diabetes as a disease and greatly improve outcomes.
