Cuestionario de intereses profesionales [I.P.] Louis Leon Thurstone,1967

Evaluación y tratamiento psicopedagógicos Ana Salvador Alcaide,1993-06-02 El presente libro está especialmente dirigido a psicólogos y pedagogos que se enfrentan con las tareas propias del Departamento de Orientación, en un centro educativo. Estas tareas son complejas, difíciles y de una gran responsabilidad, y van encaminadas a enriquecer el proceso educativo en todos sus ámbitos. Por tanto, de la forma en que se lleven a cabo y de su rigor y eficacia, depende en gran medida el que ese derecho esencial del alumno a la ayuda, que a lo largo de toda su escolaridad le debe proporcionar el Departamento de Orientación , se convierta en una realidad fructífera y bien lograda. En esta tercera edición se han incorporado las últimas novedades legislativas y se ha actualizado el capítulo dedicado a la ética profesional con los principios éticos básicos del orientador. También se ha hecho una revisión bibliográfica de la obra. Finalmente se aportan novedades importantes, en los Anexos, con la incorporación de dos técnicas muy actuales, la Batería IGF (1995) de Yuste y el ACRA (1994) de Román y Gallego sobre Estrategias de aprendizaje. La intención de la autora ha sido poner en manos de los responsables de la orientación escolar, casi un manual que exponga de manera clara y práctica dichas tareas, poniendo a contribución su ya larga experiencia en este ejercicio profesional.

Manual de orientación educativa Ana Cobos Cedillo, 2022-05-31 Este libro es un manual de orientación educativa que recoge los pilares teóricos y prácticos que necesita conocer un profesional de la orientación para abordar esta compleja labor en el siglo XXI. Comienza por asentar las bases teóricas de la Psicopedagogía para a partir de ahí, conocer cómo se ha ido materializando esta ciencia teórica en otra aplicada: la orientación educativa. Desde los orígenes de la orientación en el siglo XX, y desde una perspectiva universal, trasciende la normativa española a fin de que los orientadores dispongan de un manual susceptible de uso en otros contextos y territorios. Se tratan con profundidad las técnicas, instrumentos y procedimientos de la orientación educativa y se disecciona cada intervención en las dimensiones académica, personal, socioafectiva y emocional. El objetivo es que este manual se constituya en una referencia para quienes se están formando para ejercer como orientadores, docentes u otra profesión del ámbito educativo. El conocimiento que recoge este libro está fundamentado en décadas de práctica de la orientación, por lo que las propuestas indicadas pueden extrapolarse a contextos reales. Para ello hay un capítulo específico en el que se expone un Método práctico de aplicación durante un curso completo. Como colofón del manual se dedica un capítulo a la deontología, asunto imprescindible para el desarrollo de un perfil profesional. Un siglo después del nacimiento de la orientación, con profesionales trabajando en todo el mundo, era necesario sistematizar el saber basado en la experiencia. Un manual pertinente para recopilar lo aprendido y sugerente para seguir abordando los retos del futuro.

Validity of Educational Assessments in Chile and Latin America Jorge Manzi, María Rosa García, Sandy Taut, 2021-09-11 This edited volume presents a systematic analysis of conceptual, methodological and applied aspects related to the validation of educational tests used in Latin American countries. Inspired by international standards on educational measurement and evaluation, this book illustrates efforts that have been made in several countries to validate different types of educational assessments, including student learning assessments, measurements of non-cognitive aspects in students, teacher evaluations, and tests for certification and selection. It gathers the experience of validity studies from the main international assessments in Latin America (PISA, TIMSS, ERCE, and ICCS). Additionally, it shows the challenges that must

be taken into account when evaluations are used to compare countries, groups or trends of achievement over time. The book builds on the premise that measurements in the educational field should not be used if there are no studies that support the validity of the interpretation of their scores, or the use made of such tests. It shows that, despite the recognition given to validity, relatively few educational measurement assessments have accumulated enough evidence to support their interpretation and use. In doing so, this volume increases awareness about the relevance of validity, especially when assessments are key component of educational policies.
