Transnational Mobility and Global Health Peter H. Koehn, 2018-09-05 Transnational Mobility and Global Health spotlights the powerful and dynamic intersections of human movement, inequality, and health. The book explores the interacting political, economic, social, cultural, and climatic drivers of health and migration, proposing innovative ways to enhance global health and care provision in an era of transnational mobility. As health security continues to rise up the agenda in international politics, the book also analyses the political determinants of health and migration. Within the framework of key drivers of unequal mobilities, this book treats interconnected health and migration themes not covered elsewhere under one cover: health tourism, conflict-induced and other vulnerable-population movements, humanitarian crises, human rights, the health-development linkage, migrant health-care, and health-competency education. The book also considers global health vulnerabilities in the wake of climate change, and the biomedical, ethical, and governance challenges of emerging and reemerging infectious diseases. Finally, the book suggests ways of evaluating mobility-influenced health outcomes and equity impacts, and explores how the global circulation of health expertise could help to rectify care-provider shortages. The challenges to global health considered in this book are only likely to become more intense as the 21st-Century surge in transnational migration continues. Readers will gain interdisciplinary appreciation for the relevance of health for migration and of migration for global health. Researchers, students, practitioners, and policy makers interested in individual and population health, sustainable development, and migration studies will find this book a useful and inspiring guide to contemporary global challenges.

Labour in the 21st Century Emanuele Dagnino, Anthony Forsyth, Silvia Fernández Martínez, 2017-06-23 Several major transformations have characterized the world of work in recent years. Those transformations follow different patterns in different countries, yet their dynamics are so interrelated that it is often hard, if not impossible, to distinguish the causal relationships among them. Technological advances, globalization, old and new media, demographic changes, and new production and economic systems are all key factors acting on this ongoing transformation which is impacting both the world of work and society as a whole. In the spirit of Karl Polanyi, the well-known scholar who described the rise of market-based societies, we are led to wonder if we are witnessing a new “Great Transformation of Work”, on such a scale that it might change the very meaning of work in our society, and even its anthropological connotations. Accordingly, this volume investigates and discusses the different aspects of this transformation from a comparative perspective. In order to propose better solutions to cope with these changes, it is necessary to analyze their ongoing dynamics. Lawmakers, unions, scholars and practitioners are all called to do their part in order to achieve the goals of sustainability and fairness of our economic systems.
