The Mystery of Doggerland Graham Phillips, 2023-07-25 A scientific exploration of the advanced ancient civilization known as Doggerland or Fairland that disappeared 5,000 years ago • Looks at the latest archaeological and scientific evidence preserved beneath the North Sea and on the tiny island of Fair Isle • Examines Doggerland's sophisticated technology, including how its people were able to melt solid rock to create vitrified structures far stronger than concrete • Shows how the survivors of the destruction of Doggerland sailed to the British Isles and established the megalithic culture that built Stonehenge New marine archaeological evidence has revealed the remains of a large landmass to the north of Britain that hosted an advanced civilization 1,000 years before the recognized "first" civilizations of ancient Egypt, Mesopotamia, or India. Remembered in Celtic legends as Tu-lay, and referred to by geologists as Doggerland or Fairland, this civilization began at least as early as 4000 BCE but was ultimately destroyed by rising sea levels, huge tsunamis, and a terrible viral epidemic released from melting permafrost during a cataclysmic period of global warming. Exploring the latest archaeological findings and recent scientific analysis of Doggerland's underwater remains, Graham Phillips shows that this ancient culture had sophisticated technology and advanced medical knowledge. He looks at evidence detected with remote sensing and seismic profiling of many artificial structures, complex settlements, gigantic earthworks, epic monoliths, and huge stone circles dated to more than 5,500 years ago preserved beneath the ground and on the ocean floor. He also looks at the small part of the Fairland landmass that still exists: Fair Isle, a tiny island some 45 miles north of the Orkney Islands of Scotland. Phillips shows how, when Fairland sank beneath the waves around 3100 BCE, its last survivors traveled by boat to settle in the British Isles, where they established the megalithic culture that built Stonehenge. Revealing the vast archaeological evidence in support of the existence of Doggerland, as well as its threads of influence in early cultures around the world, Phillips also shows how the fate of this sophisticated ancient culture is a warning from history: the cataclysmic events that happened to the first civilizations could happen again as the world heats up.

Pyramids Joyce Filer, 2006-01-16 *Pyramids* tells the story of these Egyptian monuments from their earliest beginnings, following their development from the first step pyramid to the Great Pyramid of Giza. Unlike most books on the subject, the volume describes not only the pyramids themselves but also the complexes of temples and walls that surrounded them. It also tells the stories of the kings and builders who created them. Filer follows the story of the pyramids through a study of eight

individual sites, each with something different to tell us about the construction of the pyramid complexes, the architects who designed them, the workers who built them, the kings who were buried in them, and the robbers who plundered them.

Esoteric, Astrology and Tarot classes Angeline A Rubi and Alina A. Rubi, 2023-04-09 Tarot is an ancient practice, a path by which we begin understanding oneself, towards our inner sacred. The Tarot is an oracle, a means, by which, in some way, and through its drawings and colors, we stimulate our psychic sphere, the deepest part that goes beyond the rational. When we move the cards, a secret and powerful mechanism is put into operation, to open doors and means that connect us to the Universe. The Tarot is full of secrets, wonderful and powerful symbolisms that go beyond a great pictorial work. Magic, clairvoyance, or however you want to define it in you, will awaken little by little, as you practice and enter the intimate world of each card. Astrology is an exact, holistic science. In ancient times, in medieval times, you had to study many years to be an astrologer. Being the mother science, you had to learn seven years of astrology in advance to be able to dedicate yourself to medicine, architecture, painting, or any other discipline. Astrology is the complement to any technique of personal growth, it offers you the opportunity to know what your vital mission is, to know what you have come to in this reincarnation and what your challenges are in this life, that is, to know your natal map. The natal chart allows you to know yourself much better to the point of understanding, for example, because you do not find your ideal partner, or because your partners last you so little time, or confirm that you made a good decision, or because you have such a conflictive relationship with a member of your family, or because you live a very strong crisis in your work etc. The natal chart explains why and why you give a situation and who you are, gives you information about how and when these issues will be resolved, marking the changes that your soul asks you to make.

Myths and Realities John Whedbee, 2005 Myths and Realities creates a comprehensive picture of human life and culture, while at the same time placing it within the larger cosmic context. In recent decades, all areas of human knowledge have expanded to an unprecedented degree, so the overall context of human existence is at last beginning to emerge. In order to present such a wide-ranging portrait, Myths and Realities looks at history and human nature from several different viewpoints, giving special attention to four major topics: culture, science, religion and war. Science is a major contributor because it is the most reliable means of acquiring knowledge. Religion is part of the wider subject of beliefs in general, and these have been given particular consideration because any kind of ideology or belief tends to distort the worldview. War has been mankind's constant companion, but without its underlying mythology, it would lose all glory and romance. It would just be senseless savagery. Although man has many distinctive qualities, one of his most remarkable characteristics is his capacity to believe in all kinds of nonsensical notions. In fact, the human animal will believe practically anything-so long as it makes absolutely no sense at all.

The World Below Mihaela Moraru,

Disappearing Architecture Georg Flachbart,Peter Weibel,2005-09-09 The creation of new environments through the use of developments in Information Technology is significantly altering not only architecture itself but also the roles and tasks of the architects. Architecture can no longer be described in the terms we are familiar with since it no longer corresponds to the form of architecture as we know it: an inclusive and exclusive structure, clearly defined, with a single interior and a single exterior. For architects, the challenge of the future will increasingly lie in creatively coming to terms with hybrid environments, understanding and exploiting the design potential of digital spaces within the physical world, and redefining the role of architecture within a visually dominated culture. This volume presents a valuable and attractive contribution to the contemporary discussion on this subject.

The Paradigm Trilogy Gerry Burney,2003-08

Of Cigarettes, High Heels, and Other Interesting Things Marcel Danesi,2018-04-27 This book deals with one the most interesting aspects of human life—the search for meaning. It discusses how the science of semiotics is equipped to provide insight on what meaning is and how we produce it. Why is it that certain people routinely put their survival at risk by smoking? Why is it that some women make locomotion difficult for themselves by donning high-heel footwear? Are there unconscious forces at work behind such strange behaviors? This book will attempt to answer such questions by claiming that these behaviors are meaningful in culture-specific ways. The discipline that studies such behaviors and their relation to meanings is called semiotics. Semiotics probes the human condition in its own peculiar way, by unraveling the meanings of signs, which motivate not only the wearing of high heel shoes, but also the construction of words and art forms. Now in its third edition, this landmark introduction to semiotics has been updated with a wealth of new content, focusing on the many developments in digital culture since the previous edition. With the addition of topics such as memes, Selfies, social media profiles, and even Mafia discourse, the new edition comprehensively covers new trends in culture while streamlining treatments of basic semiotics contents.

The Militant Middle Ages Tommaso di Carpegna Falconieri,2019-11-04 In *The Militant Middle Ages*, historian Tommaso di Carpegna Falconieri delves into common perceptions of the Middle Ages and how these views shape contemporary political contexts. Today more than ever, the medieval era is mined from across the political spectrum for

symbols, examples, allegories, and models to represent and interpret the present. From “new crusades” to fantasy literature and cosplay, from Catholic Traditionalism to environmentalism, from neo-Vikings to medieval tourism and festivals, Carpegna Falconieri leads us in an impassioned and often disquieting journey through the “Modern Middle Ages.” The first book-length study dedicated to the broad phenomenon of political medievalism, *The Militant Middle Ages* offers a new lens for scrutinizing contemporary society through its instrumentalization of the medieval past. First published in Italian as *Medioevo militante. La politica di oggi alle prese con barbari e crociati* - © 2011 Giulio Einaudi editore s.p.a., Torino.

Magic: A History Chris Gosden, 2020-11-10 An Oxford professor of archaeology explores the unique history of magic—the oldest and most neglected strand of human behavior and its resurgence today Three great strands of belief run through human history: Religion is the relationship with one god or many gods, masters of our lives and destinies. Science distances us from the world, turning us into observers and collectors of knowledge. And magic is direct human participation in the universe: we have influence on the world around us, and the world has influence on us. Over the last few centuries, magic has developed a bad reputation—thanks to the unsavory tactics of shady practitioners, and to a successful propaganda campaign on the part of religion and science, which denigrated magic as backward, irrational, and primitive. In *Magic*, however, the Oxford professor of archaeology Chris Gosden restores magic to its essential place in the history of the world—revealing it to be an enduring element of human behavior that plays an important role for individuals and cultures. From the curses and charms of ancient Greek, Roman, and Jewish magic, to the shamanistic traditions of Eurasia, indigenous America, and Africa; from the alchemy of the Renaissance to the condemnation of magic in the colonial period and the mysteries of modern quantum physics—Gosden's startling, fun, and colorful history supplies a missing chapter of the story of our civilization. Drawing on decades of research around the world—touching on the first known horoscope, a statue ordered into exile, and the mystical power of tattoos—Gosden shows what magic can offer us today, and how we might use it to rethink our relationship with the world. *Magic* is an original, singular, and sweeping work of scholarship, and its revelations will leave a spell on the reader.

The Lost Continent of Pan Susan B. Martinez, 2016-12-15 Reveals the Pacific Ur-culture that seeded the ancient civilizations of China, Egypt, India, Mexico, and Peru • Shows how the Pan diaspora explains the similarities between Gobekli Tepe and Toltec carvings and stone towers in Japan and on Easter Island • Reveals the mother tongue of Pan hidden in shared word roots in vastly different languages, including Quechua, Sanskrit, Japanese, Greek, and Sumerian • Explains the red-haired Caucasian mummies of China, the Ainu of Japan, the presence of “white” humans in early Native American legend, and other light-skinned peoples found in Southeast Asia and the Middle East The destruction of the vast continent of Pan--also known as Lemuria or Mu--in the Pacific Ocean 24,000 years ago was the greatest catastrophe that ever befell humanity. Yet it resulted in a prehistoric Golden Age of arts and technology thanks to the Sons of Noah, who, forewarned and prepared for the disaster, escaped in 5 organized fleets. Theirs was the masterful Ur-culture that seeded China, Egypt, India, Mexico, and Peru, explaining the sudden injection of the same advanced knowledge and sophisticated arts into those widely separated lands. Examining the diaspora from the sunken continent of Pan, Susan B. Martinez finds traces of the oceanic Pan civilization in arts and technologies from canal-works, masonry, and agriculture to writing, weaving, and pottery, but most importantly in the art of navigation, the hallmark of the survivors of the catastrophe. Using archaeo-linguistic analysis, she reveals the mother tongue of Pan hidden in strikingly similar words for royalty, deities, and important places in vastly different languages, including Quechua, Maori, Sanskrit, Japanese, Chinese, Greek, and Sumerian, as well as English through the prefix “pan” which denotes “all-encompassing.” The author reveals how the Pan diaspora explains the mound builders on each continent, the presence of “white” humans in Native American legend, the red-haired mummies found in China, and the Ainu of Japan. She shares recent genetic studies that reveal Polynesian DNA in central Europeans, Mesopotamians, South Americans, and the 9000-year-old Kennewick man and shows how Pan provides the missing link. She reveals why carvings at Gobekli Tepe are similar to Toltec artistry, why stone towers in Japan and Easter Island are identical, and how the Pacific Ring of Fire was activated. Moving the Garden of Eden from the Fertile Crescent to the South Seas, Martinez strikes down the pervasive view of Atlantis as the source of ancient knowledge and exposes the original unity of mankind on the ancient Pacific continent of Pan.

Empire of Ruins Miles Orvell, 2021-01-06 Once symbols of the past, ruins have become ubiquitous signs of our future. Americans today encounter ruins in the media on a daily basis--images of abandoned factories and malls, toxic landscapes, devastating fires, hurricanes, and floods. In this sweeping study, Miles Orvell offers a new understanding of the spectacle of ruins in US culture, exploring how photographers, writers, painters, and filmmakers have responded to ruin and destruction, both real and imaginary, in an effort to make sense of the past and envision the future. Empire of Ruins explains why Americans in the nineteenth century yearned for the ruins of Rome and Egypt and how they portrayed a past as ancient and

mysterious in the remains of Native American cultures. As the romance of ruins gave way to twentieth-century capitalism, older structures were demolished to make way for grander ones, a process interpreted by artists as a symptom of America's creative destruction. In the late twentieth century, Americans began to inhabit a perpetual state of ruins, made visible by photographs of decaying inner cities, derelict factories and malls, and the waste lands of the mining industry. This interdisciplinary work focuses on how visual media have transformed disaster and decay into spectacles that compel our moral attention even as they balance horror and beauty. Looking to the future, Orvell considers the visual portrayal of climate ruins as we face the political and ethical responsibilities of our changing world. A wide-ranging work by an acclaimed urban, cultural, and photography scholar, *Empire of Ruins* offers a provocative and lavishly illustrated look at the American past, present, and future.

Rhythm Alchemy Martin Ivanov, 2014-08-18 According to Socrates, humans have nothing more to learn because we already know everything we need to know. We have simply forgotten it. A true teacher is one who can help us to remember forgotten knowledge. The great Michelangelo perceived his unique creations in rough and uncultured stone blocks. He said that to see the finished sculpture, one only needs to eliminate the unnecessary particles and debris. Just like these stone blocks, we all possess hidden and forgotten wisdom. To live our true nature, we need to separate ourselves from our limited beliefs and understandings. This is the very essence of the book you have in your hands. "Rhythm Alchemy" is full of insights from ancient times and from our deepest self. The book synthesizes the ancient knowledge of numbers, the heartbeat, the rhythm of breathing and our personal situation within the bigger, universal vibrations, as well as our interactions with people and nature around us. "Rhythm Alchemy" offers invaluable knowledge about ourselves and the unique harmony between the human being, his or her inner world, his or her rhythm and the surrounding reality. We may not realize how often we use musical terms like rhythm, melody and harmony to refer to things which happen to us in our daily lives: the rhythm of our heart, how our feelings soar in space, the melody of our personal inner voice trying to interweave with the harmony of other voices around us. We are constantly seeking and wanting to write the composition of our happiness. When we compose this work, even though we tirelessly seek inspiration from outside us, our score often stays blank. This is because we do not pay sufficient attention to the true inspiration which lies within us. In order to reach this inspiration, we need to rebuild the bridges linking us to the roots of our true nature - rhythm. When we begin the intimate dance with the vibrations of our existence and begin to experience the real flavor of each wave which colors our emotions, then we will attain the creative power of the composer expressed in what we call "happiness". Martin Ivanov's book *Rhythm Alchemy* provides us with the spiritual and physical parameters of our cosmic score. It will guide us to our place in the composition and provide us with the ideas and knowledge we need to participate fully in both - how to compose our life and fulfill our innermost dreams.
