Hooked in Film John Markert, 2013-05-23 Though drug use was widespread in the nineteenth century, the negative influence of narcotics was mostly unknown. Cinema of the early twentieth century was instrumental in making viewers aware of the harmful effects of drugs. Throughout the decades, images of drugs such as marijuana, LSD, and heroin in films impacted—both negatively and positively—the national perception of their use. In fact, the use, popularity, and opinion of certain drugs often follow their status on the big screen. In *Hooked in Film*, John Markert takes a close look at the correlation between social policies and the public view of drugs and their portrayals in film. In this volume, Markert examines the changing social attitudes toward illegal drugs and their cinematic depictions from as early as the 1894 film *Chinese Opium Den* to the present. The first section of this book focuses on the demonization of drugs between 1900 and 1959, followed by an assessment of marijuana on the big screen after 1960, when the drug was shown as part of everyday life with no serious consequences. Post-1960 depictions of heroin use, which have remained consistently negative, are also analyzed. Markert

then takes a close look at the portrayals of powdered cocaine after the 1960s and the emergence of crack in the mid-1980s. Finally, Markert discusses hallucinogens, Ecstasy, and methamphetamines and their roles on the big screen. Tracking hundreds of films spanning more than a century, *Hooked in Film* looks at camp classics like *Reefer Madness*, comedies such as Cheech and Chong's *Up in Smoke*, *Dazed and Confused*, and *Pineapple Express*, and dramas, including *Panic in Needle Park* and *Requiem for a Dream*. Scholars and students of cinema, popular culture, media studies, and sociology will find this book a valuable examination of how cinematic portrayals of drugs have changed over time, and how those images have influenced public perception of drugs and even public policy.

The Methamphetamine Industry in America Henry H Brownstein, Timothy M. Mulcahy, Johannes Huessy, 2014-07-31 Galax, a small Virginia town at the foot of the Blue Ridge Mountains, was one of the first places that Henry H. Brownstein, Timothy M. Mulcahy, and Johannes Huessy visited for their study of the social dynamics of methamphetamine markets—and what they found changed everything. They had begun by thinking of methamphetamine markets as primarily small-scale mom-and-pop businesses operated by individual cooks who served local users—generally stymied by ever more strenuous laws. But what they found was a thriving and complex transnational industry. And this reality was repeated in towns and cities across America, where the methamphetamine market was creating jobs and serving as a focus for daily lives and social experience. *The Methamphetamine Industry in America* describes the reality that the methamphetamine industry is a social phenomenon connecting local, national, and international communities and markets. The book details the results of a groundbreaking three-stage study, part of a joint initiative of the National Institute on Drug Abuse and the National Institute of Justice, in which police agencies across the United States were surveyed and their responses used to identify likely areas of study. The authors then visited these areas to observe and interview local participants, from users and dealers to law enforcement officers and clinical treatment workers. Through the eyes and words of these participants, the book tells the story of the evolution of methamphetamine markets in the United States over the past several years, given changes in public policies and practices and changing public opinion about methamphetamine. The authors look closely at how the markets are part of a larger industry, how they are socially organized, and how they operate. They also consider the relationships among the people involved and those around them, and the national, regional, and local culture of the markets. Their work demonstrates the importance of understanding the business of methamphetamine—and by extension other drugs in society—through a lens that focuses on social behavior, social relationships, and the cultural elements that shape the organization and operation of this illicit but effective industry.

The Truth About Methamphetamine and Crystal Meth Frank Spalding, Lara Norquist, 2011-08-15 Meth is affecting people of all ages, income levels, and backgrounds. The Routledge International Handbook of Rural Criminology Joseph F Donnermeyer, 2016-04-28 49% of the world's population lives in small towns, villages and farms, yet until recent years criminological scholarship has focused almost exclusively on urban crimes. The Routledge International Handbook of Rural Criminology is the first major publication to bring together this growing body of scholarship under a single cover. Pioneering in scope, this book brings together leading international scholars from fourteen different

countries to offer an authoritative synthesis of theoretical and empirical literature. This handbook is divided into seven parts, each addressing a different aspect of rural criminology: Rurality and crime Criminological dimensions of food and agriculture Violence and rurality Drug use, production and trafficking in the rural context Intersections between rural and green criminology Policing, justice and rurality Teaching rural criminology Edited by a world renowned scholar of rural criminology, this book explores rural crime issues in over thirty-five countries including Japan, Sweden, Brazil, Australia, Tanzania, the US, and the UK. The Sociology of Deviance Robert J. Franzese, 2015-08-11 This timely second edition remains essentially the same in overall organization and chapter layout and titles. New to the book is updated data and facts from empirical research and government and agency reports. Some information in some chapters was retained from the first edition if it was deemed still relevant and interesting. The definition of deviance has been modified to be more in line with standard understandings of the term which frequently describe deviance as violations of social norms. The word “differences” remains part of the definition and implies differences in attitudes, lifestyles, values, and choices that exist among individuals and groups in society. The concept of deviance is no longer treated as a label in itself, also placing the definition of the term more in alignment with its standard usage. The title of the book remains the same and “tradition” still implies the book covers areas that have long been addressed in deviance texts such as addictions, crime, and sexual behaviors, to name a few. The term “stigma” is retained for two reasons: it is in honor of Erving Goffman, a giant in the discipline of sociology who offered much to the study of differences, and it is used to accentuate the importance of societal reaction in a heterogeneous society. In this updated edition, every attempt has been made to respond to input from colleagues and students concerning text content and writing style. Chapters still include “In Recognition” or comments that honor scholars whose research and professional interests are related to the chapters under study. Effective case studies are again included in the chapters. Considerable effort went into decisions of what was to be added, changed, maintained, and deleted from the first edition, resulting in meaningful modifications throughout the book.

Trying to Make It Rajeev V. Gundur, 2022-08-15 *Trying to Make It* is R. V. Gundur's journey from the US-Mexico border to America's heartland, from America's prisons to its streets, in search of the true story of the drug trade and the people who participate in it. The book begins in the Paso del Norte area, encompassing the sister cities of Ciudad Juárez and El Paso, which has been in the public eye as calls for securing the border persist. From there, it moves on to Phoenix, which was infamously associated with the drug trade through a series of kidnappings. Finally, the book goes on to Chicago, which has been a lightning rod of criticism for its gangs and violence. Gundur highlights the similarities and differences that exist in the American drug trade within the three sites and how they relate to current drug trade narratives in the US. At each stop, the reader is transported to the city's historical and contemporary contexts of the drug trade and introduced to the individuals who have lived them. Drug retailers, street and prison gang members, wholesalers, and the law enforcement personnel who try to stop them offer readers a comprehensive look at how various illicit enterprises work together to supply the drugs that American users demand. Most importantly, through a combination of macro- and microlevel vantage points, and comparative analysis of three key sites in illicit drug operations, the stories in *Trying to Make It* remind us that the people involved in the drug trade, for the most part, do not deserve vilification. Far from being a seemingly uniform, widespread threat or an unlimited array of bogeymen and women, they are ordinary people, living ordinary lives, just trying to make it.

Originally given by the Nazis to their troops to fight the blitzkrieg, it has now conquered the whole world and is used at sex parties in Amsterdam and Antwerp, by former hippies in Prague, by the underclass in the slums of Harare, Cape Town, and Peshawar, by truck drivers in Thailand, and by workers in the sweatshops in Bangladesh. Researcher Teun Voeten traveled the globe for two years to investigate all sides of this diabolic drug, exploring the bizarre history and pharmacological effects. He talked to homeless addicts in Tijuana and Los Angeles, cartels in Mexico, international drug experts in Bangkok and Kabul, and more. Voeten also interviewed numerous authorities, judges, and social workers who are trying to stop the meth epidemic.

The use of bombs to disperse radioactive materials in the radiation dispersion device configuration is addressed along with

the technique used to disperse chemical and biological agents with explosives. Booby traps, especially those targeting law enforcement, are explained, and methods to detect booby traps are developed to allow a rudimentary understanding of the process. Methods to identify clandestine laboratories manufacturing explosives or other drugs such as methamphetamine are identified providing the reader with an understanding of the items to identify and differentiate the types of laboratories. Numerous bombings are examined providing an insight as to why and how the attacks were successful. Mitigation techniques such as using alcohol resistant aqueous film-forming foam to suppress blast and fragment formation are explained along with deployment methods. The text is richly illustrated with photographs depicting IEDs, explosives, and booby traps to assist in the identification of suspicious objects, suspect packages, or potential mail bombs.
