The Prediction Birthday Book Joan Revill, Jo Logan, 1984-01-01

The Birthday Book Holt N. Censorinus, 2008-09-15 Nearly 2,000 years ago, the Roman scholar Censorinus bestowed upon his best friend a charming birthday present: The Birthday Book, which appears here in its long-awaited first English translation. Laying out everything he knew about birthdays, the book starts simply, but by the conclusion of this brief yet brilliant gem, Censorinus has sketched a glorious vision of a universe ruled by harmony and order, where the microcosm of the child in the womb corresponds to the macrocosm of the planets. Alternately serious and playful, Censorinus touches on music, history, astronomy, astrology, and every aspect of time as it was understood in third-century Rome. He also provides ancient answers to perennial questions: Why does the day begin at midnight? Where did Leap Year come from? Which came first, the chicken or the egg? Embodying the proverbial gift that keeps on giving, The Birthday Book has long been treasured by scientists, poets, and scholars, and Holt Parker's graceful and lively new translation—accompanied by an illuminating introduction and detailed notes—is itself a present for Latinists, historians of science, and anyone looking for an unusual birthday gift.

Birthday book, 1994

Ogilvie's Astrological Birthday Book Leo Bernart, 2017-11-22 Excerpt from Ogilvie's Astrological Birthday Book: Is Your Birthday to-Day? Your birthday is the most important day in your life for unless you had been born, you certainly would not be here at all! And yet how few people realize the importance and significance of that event! Out Of all eternity, how came it about that you were born just when you were? Why should that moment of time be set apart for your birth more than any other? Wise men who have thought on this question say that this cannot be due to mere chance; there must be some reason, some law, at work. They set about ascertaining this law - which relates to the time of birth - and discovered it in the science of Astrology. Every one is born under slightly different influences and circumstances; so no two people are exactly alike. NO matter whether they are members of the same family, they may be strikingly dissimilar, and outsiders would not recognize them as brothers and sisters. This, says Astrology, is because the aspects of the heavens - the influences brought to bear upon the infant at the moment of birth - are so different. Astrology was believed in by many of the wisest men in history. To test the claims of astrology, it is only necessary to have a personal reading made of the life. About the Publisher Forgotten
