Injection-Induced Breast Siliconomas Gustavo Emilio Schenone, 2019-11-21 Although there is a current ban in many countries on the injection of liquid silicone, paraffin or polyacrylamide hydrogels or other gel or liquid materials into the breasts for the purpose of increasing size, there are still a large number of non-professionals who use these injections and offer them as a cheap alternative to plastic surgery. The results, at first, may seem cosmetically favorable for the patient, but these injections often lead to painful complications like mastitis (inflammation of the mammary gland) and can make it incredibly difficult to diagnose breast cancer early. Many patients suffer delayed complications that force them to seek expert care for corrective and reconstructive surgery. This book, the culmination of decades of research, aims to serve the surgeon faced with these complications, offering a detailed step-by-step guide of the pathology from clinical diagnosis and imaging studies to the different surgical and reconstructive procedures for reconstruction. As there is no clinical management consensus or international guideline, Injection-Induced Breast Siliconomas: Clinical Implications, Evaluation and Treatment fills the gap in the literature and encourages more research. Previously published in Spanish in 2017 under the title Siliconomas Mamarios por Inyeccion: Clinica, Diagnostico y Tratamiento, this English translation is a true re-edition of the original version with added updates for the English-speaking audience.

Perspectivas de la clínica de la urgencia Ines Sotelo, 2020-08-27 La urgencia se transforma día a día en un imperativo de la época. Lejos estaba de imaginarlo cuando en el año 1996 diseñé un espacio de formación para los estudiantes de la facultad de psicología, instalado en las guardias de los hospitales. Tampoco supuse que cientos de alumnos por año

Clínica de lo traumático Mariana Vazquez, 2022-11-09 Estamos frente a un texto que se propone comprender los mecanismos imperantes en los procesos de memoria a partir de lo traumático, y el lugar que los olvidos pueden ocupar en ella. Interpela las definiciones propiamente técnicas, ubicando a la memoria, no solo como una de las funciones psíquicas que selecciona, almacena y reconoce los contenidos que lleva a la conciencia, sino también nos lleva a pensar, la memoria en su íntima relación con el olvido. La dimensión de la memoria cobra una nueva significación a partir del olvido, y su vínculo directo, en esta conexión específica, con el silencio. Escribir sobre la memoria, es sin duda profundizar en el alma humana. Y si hablamos de alguien que ahondó sobre ella, el primero que surge es S. Freud, “Toda teoría psicológica digna de alguna consideración habrá de ofrecer una explicación de la memoria”. ¿Qué somos sin memoria? ¿Quiénes somos, si no hay recuerdos? “La Memoria es el único Paraíso del que no podemos ser expulsados”. El pasaje de lo traumático individual a lo traumático social es el capitón, la piedra angular que nos guía en la lectura. “La historia oficial” en pos de una memoria, que no es la sincronía de lo actual desde donde lo enfoca sino en la intersección que se propone en la diacronía de los tiempos históricos. Ese tiempo marcado por los acontecimientos y cuyas consecuencias son: dejar enfocado, cristalizado. De los que no podemos desligarnos, vigente y a la vez queriendo olvidar. [...] Los traumatismos sociales representan un desafío teórico, clínico, social y político, enfrentar este desafío puede llevarnos a descubrir un nuevo saber y desde allí intentar responder con herramientas más adecuadas a los problemas que la actualidad plantea, participando así, en la transformación de un “malestar social” a fin de que “la historia no se repita”. Audazmente propone dar un paso más; memoria, olvido y recuerdo se tornan cruciales cuando se vinculan a eventos traumáticos, cuando se trata de catástrofes sociales y situaciones de sufrimiento colectivo. Las respuestas sociales organizadas frente a las situaciones de traumatismo social tienen un papel fundamental en los procesos de reparación simbólica y reelaboración individual y colectiva. Fragmentos del prólogo de Norberto I. J. Pisoni

Clínica y psicopatología psicoanalíticas José Barrionuevo, Clínica y psicopatología tienen desde el psicoanálisis intercambio permanente, regulándose y enriqueciéndose mutuamente, esto es desde los primeros tiempos de la tarea de Freud en la construcción de su edificio conceptual a partir de la indagación de lo inconsciente que se expresa en el enigmático decir del síntoma, y continúa dicha atención en nuestros días en una disciplina que se renueva. Tomando en consideración la definición de sujeto del psicoanálisis, se plantean en la clínica criterios de base en la dirección de la cura a partir del análisis de estructura psicopatológica de quien consulta lo cual se evalúa en entrevistas preliminares. En cuanto a psicopatología en su relación con la clínica se consideran en este libro lo relativo a salud y enfermedad, la incidencia del deseo inconsciente en las producciones sintomáticas, desarrollos de angustia, dolor en duelo normal y en duelo patológico y las diferencias con la melancolía, lo peculiar de las patologías del acto específicamente en el terreno de la adicción a drogas y

la clínica con las mismas, teniéndose en cuenta las peculiaridades epocales que llevaron a Freud al estudio del “malestar en la cultura” en la producción de neurosis por la represión de mociones pulsionales agresivas y sexuales y a Lacan a proponer la existencia del “discurso capitalista” que exigiría el rechazo de la castración en tiempos del capitalismo tardío en el marco de la globalización. En el último capítulo de este libro se presta atención a los efectos o impactos en lo anímico de pandemia y pospandemia COVID19, con aportes de profesionales de la salud, la educación y la comunicación, y con Anexos de diálogos con Pedro Cahn y Alicia Stolkiner, especialistas en infectología y salud pública y salud mental, que fueran convocados en nuestro país ante crítica situación con propagación del virus a nivel mundial que, aunque se pretenda suponer sólo pretérito, tiene consecuencias en la actualidad evidenciándose sus secuelas psicológicas en la así denominada pospandemia.

Clínica y diagnósticos en la niñez y la infancia Pía Martina Roldán Viesti,2020-01-13 Es muy difícil, para los adultos, trabajar para los niños. Y cuando digo para los niños, me refiero a trabajar siendo sus secretarios, sus testigos, siendo aquellos que nos olvidamos de todos nuestros prejuicios, ideales frustrados, de nuestras tendencias a ese saber más. Porque esto nos aleja del punto medio y equilibrado que da lugar al saber del no-saber, y termina orientando toda intervención hacia el polo que objetiva y transforma al niño en una cosa. Me refiero, mejor dicho, a las intervenciones que continúan aportando experiencias en el niño que lo dejan en el lugar no-deseado (con toda la ambigüedad que esta expresión indica) de objeto, cosa, resto, apéndice de Otro. Ese Otro puede ser el Otro social, el Otro escuela, el Otro padres, el Otro pediatra, el Otro vecino, y por qué no... del Otro psicólogo, psicopedagogo, fonoaudiólogo, acompañante terapéutico, integrador escolar, etc. Este libro apunta a repensar dónde nos corresponde ubicarnos cuando nos vinculamos con los niños. Lejos de intentar agotar explicaciones teóricas o prestar herramientas para tomar acciones concretas en una terapéutica o en casa, la propuesta es correr hacia una mirada crítica que movilice, de algún modo, la cristalización engendrada durante las últimas décadas en relación a los diagnósticos y patologías en la infancia y la niñez.

Neurosis, psicosis y psicopatología de la vida cotidiana José Barrionuevo,Fernando Barrionuevo Cibeira,2022-11-07

El objetivo propuesto en este libro fue estudiar los planteos de Jacques Lacan en su última enseñanza respecto del nudo borromeo para centrarnos desde esa perspectiva en utilización para la comprensión de las neurosis y de las psicosis, haciendo previamente un acercamiento a la comprensión de las neurosis y de las psicosis, haciendo previamente un acercamiento a la comprensión de estas patologías desde las lecturas que proponen Sigmund Freud en sus Obras Completas y luego Jacques Lacan en sus escritos y seminarios con anterioridad a la conceptualización del nudo borromeo. En cuanto al por qué el Proyecto de Investigación, sobre el cual se basa este libro, se centra en neurosis y psicosis desde la teoría nodal sin incluir a las perversiones se debe a que si bien Lacan entre los Seminarios 10 y 16 se refiere a una tercera estructura subjetiva que denomina perversión, no retoma luego esta perspectiva ni tampoco considerará dicha estructura al proponer la teoría de los nudos que queda orientada entonces a su aplicación al estudio de neurosis y de psicosis. En un momento posterior del Proyecto, y por lo tanto de este libro, se aborda el planteo de “Inhibición, síntoma y angustia” que propusiera Freud, para realizar un recorrida general sobre expresiones de la “psicopatología de la vida cotidiana”, tal como en las consultas clínicas éstas se presentan: como inhibiciones, como síntomas o como angustia, considerando el aporte lacaniano de la teoría de los nudos a la mencionada tríada conceptual.

Mastología AMAR Asociación de Mastología Rosario,2022-03-01 Es un libro técnico, basado en conceptos básicos, actualizaciones y nuevas perspectivas en patología mamaria. Se propone un abordaje multidisciplinario de las enfermedades que pueden desarrollarse en la glándula mamaria. Su lectura, sencilla y amena, nos permite recorrer desde lo normal hasta la patología más compleja. El mismo está destinado a médicos y especialistas en ginecología general, médicos residentes de ginecología y obstetricia y médicos en formación de postgrado en mastología, kinesiólogos, psicólogos, oncólogos, etc., es decir, todos los enfoques que integran el manejo de esta patología que es ínter y multidisciplinaria. La Mastología es un tema muy fuerte para el género femenino, pues la Mama va mucho más allá de la función orgánica apreciada; forma parte principal de su imagen corporal y participa de su sexualidad. Cualquier daño a su integridad, aún terapéutico, produce cicatrices corporales, emocionales y de la autoestima. Al considerar los tratamientos, debe tomarse en cuenta esta complejidad.

XVIII JORNADAS DE CLÍNICA XVIII Jornadas de Clínica Psicoanalítica,2009-01-01 La elección del tema de estas Jornadas entronca con las de 2007 realizadas en Pamplona (Educar, gobernar, psicoanalizar, ¿es posible?). Las llamadas tres profesiones imposibles nos pusieron ante la evidencia de la imposibilidad de suturar todos aquellos ámbitos en los que se juega la subjetividad humana. A diferencia de la ciencia, no permiten predecir sin resto las consecuencias de los actos que se operen en ellas. También señalamos que imposibilidad no supone ni impotencia ni pesimismo, al contrario, esa imposibilidad funciona; pero su funcionamiento no se puede determinar en última instancia. Este año hemos circunscrito el problema a nuestro ámbito específico y nos preguntamos cómo se transmite y qué se juega en esta dificultad estructural que tiene que ver con la subjetividad. Verdad y transmisión se cruzan y hacen cuestión porque su relación no es evidente. A diferencia de la dicotomía verdadero-falso de la lógica formal, para el Psicoanálisis verdad y mentira están articuladas: porque la verdad sólo puede decirse a medias y la mentira apela, en algún lugar, a la referencia de la verdad. Lo que es verdadero para un sujeto no puede quedar agotado por ninguna escritura, aunque contingentemente algo se escriba como verdad para ese sujeto. La consecuencia es que no se transmite como una verdad científica: sin resto. Por ejemplo la fórmula: $E = m \times c^2$ es una verdad que puede ser transmitida de tal modo que cualquiera pueda fabricar una bomba atómica a partir de ella; no hace falta que nadie nos la cuente, con los conocimientos oportunos, un libro puede hacerlo. Pero decir esta mujer que no es mi madre es; por una parte, una obviedad que no dice nada y, por otra, una mentira que dice la verdad de que esa mujer es y no es mi madre, puesto que lo que se niega es afirmado en la medida en que se niega eso y no cualquier otra cosa. La particularidad de esta cuestión estriba en que el sujeto no accede a la verdad solo; en tanto es una verdad discursiva, cualquiera sea el agente de ese discurso tendrá la referencia de otro a quien se dirige su palabra en transferencia.
