How Does Foster Care Work? Elizabeth Fernandez,Richard Barth,2011-01-15 How Does Foster Care Work? is an international collection of empirical studies on the outcomes of children in foster care. Drawing on research and perspectives from leading international figures in children's services across the developed world, the book provides an evidence base for programme planning, policy and practice.

Accomplishing Permanency: Reunification Pathways and Outcomes for Foster Children Elizabeth Fernandez,2012-09-13 Reunification is a primary goal of foster care systems and the most common permanency planning decision. It is defined as the return of children placed in protective care to the home of their birth family and used to describe the act of restoring a child in out-of-home care back to the biological family. Yet reunification decision-making and the process of reintegrating children into birth families remains under researched. This Brief takes a look at family reunification knowledge and research in Australia where there is evidence that most children placed in protective care are eventually reunited with their birth parents. It explores how a knowledge of reunification decision making and outcomes can contribute to strengthening practice and informing policy formulation and program planning in Child Welfare.

Children in Foster Care James Barber,Paul Delfabbro,Robyn Gilbertson,2004-08-02 Researchers, practitioners, journalists and politicians increasingly recognise that foster care throughout the world is in a state of crisis. There are more and more children needing care and, as residential alternatives dry up, more of these children are being assigned to foster families. This book reports the major findings of a two-year longitudinal study of 235 such children who entered the foster care system in Southern Australia between 1998 and 1999. As well as examining the changing policy context of children's services, the book documents the psychosocial outcomes for these children, their feedback on their experiences of care, and the views of their social workers and carers. In the process, the book examines some cherished beliefs about foster care policy and sheds new light on them. The research reveals that while most children do quite well in foster care up to the two-year point, there

is a worrying amount of placement instability at a time when the concentration of emotionally troubled children in care is increasing throughout the western world. Although, surprisingly, placement instability does not appear to produce psychosocial impairment for a period of up to eight months in care, it has an extreme effect on children who are moved from placement to placement because no carer will tolerate their behaviour. These children are consigned to a life of distribution and emotional upheaval because of the lack of alternative forms of care. Another unexpected finding of the research is that increasing the rate of parental contact achieves little or nothing in relation to the likelihood of family reunification. As child welfare increasingly enters a world of research-based practice, *Children in Foster Care* provides some much needed hard evidence of how foster care policy and practice can be improved.

Child Welfare Systems and Migrant Children Marit Skivenes, 2015 The book examines where, why and to what extent immigrant children are represented in the child welfare system in 11 high-income countries. By comparing policies and practices in child welfare systems (and welfare states), especially in terms of how they conceptualize and deal with immigrant children and their families, we address an immensely important and pressing issue in modern societies.

The Slow Evolution of Foster Care in Australia Nell Musgrove, Deidre Michell, 2018-08-10 This book draws on archival, oral history and public policy sources to tell a history of foster care in Australia from the nineteenth century to the present day. It is, primarily, a social history which places the voices of people directly touched by foster care at the centre of the story, but also within the wider social and political debates which have shaped foster care across more than a century. The book confronts foster care's difficult past—death and abuse of foster children, family separation, and a general public apathy towards these issues—but it also acknowledges the resilience of people who have survived a childhood in foster care, and the challenges faced by those who have worked hard to provide good foster homes and to make child welfare systems better. These are themes which the book examines from an Australian perspective, but which often resonate with foster care globally.

Social Policy and Its Administration Joanna Monie, Adrienne Wise, 2013-10-22 Social Policy and Its Administration contains an index of literature that defines the output created by social scientists for the welfare of human beings. This literary survey originates out of the need to present a comprehensive bibliographic work. The book covers areas that encompass the concept social policy. Topics such as the standards in social welfare services are also the focus of the book. The book traces the beginning of social science and the major proponents of the subject. The improvements made on the field are also enumerated and the countries that contributed to the progress of society are named in the book. Social revolutions such as the liberation of women and the abolishment of servitude as well as the transition from colonial status to political

independence are discussed in the book. The text will be a useful tool for sociologists, historians, students, and researchers in the field of political science.
